In applications where the SQL query is not known in advance, this method sometimes involves appending the OFFSET clause to the 'real' user query. Be very careful to avoid SQL injection security issues. For Oracle Database 11g and earlier there are several alternative ways to limit the number of rows returned. The old, canonical paging query is:
Oracle SQL Developer User's Guide
2.2.1. Dedicated user This script creates a new user and grants the necessary privileges to him. Connect to SQL*Plus as privileged user (sysdba or DBA) and execute the following script:
oracle_util_suite\logger\user_dedicated.sql
2.2.2. Existing user This script assumes that the user already exists.

Intelligence engine to execute SQL syntax rules and apply Oracle optimization hints to create semantically equivalent SQL statement alternatives. In addition, you can create user-defined alternatives to test with your database environment.

Oracle PL/SQL Logger / Wiki / User Guide

SQL and PL/SQL statements that pass data to and from Oracle Database should use placeholders in SQL and PL/SQL statements that mark where data is supplied or returned. These placeholders are referred to as bind variables or bind parameters. A bind variable is a colon-prefixed identifier or numeral.
