State DOT Experiences with Primavera P6 Project Management Software
FT Press

Minnesota DOT is considering various project management software applications for use in a range of highway construction activities. One of the applications under consideration is Primavera P6 Enterprise Project Portfolio Management software. The product is now available through Oracle, which acquired Primavera Software Inc. in October 2008. We were asked to survey several state DOTs currently using this application to gather preliminary information about its potential applicability to MnDOT. CTC approached Oracle to identify states using Primavera P6. The Oracle representative we spoke with thought that the following 13 states were using P6: Connecticut, Florida, Illinois, Massachusetts, New Jersey, New Mexico, New York, Puerto Rico, South Carolina, South Dakota, Texas, Virginia and Washington. We queried DOT research directors for the names of Primavera managers we could interview and were able to identify appropriate individuals in the following state DOTs: Connecticut, Florida, New York, South Carolina, South Dakota, Texas and Washington. We also identified and interviewed the Primavera manager for the Port Authority of New York & New Jersey. Below are the questions we posed, based on input from the Mn/DOT team that is investigating the project management applications. Names and contact information for interviewees are included in the Interview Responses section that begins on page 4.

Commerce Business Daily Little, Brown

The approach used on a given spend item should largely depend on the balance between supply power and demand power. That is the logic behind the bestselling Purchasing Chessboard®, used by hundreds of corporations worldwide to reduce costs and increase value with suppliers. The 64 squares in the Purchasing Chessboard provide a rich reservoir of methods that can be applied either individually or combined. And because many of these methods are not customarily used by procurement, the Purchasing Chessboard is also the perfect tool for helping buyers to think and act outside the box and find

new solutions. A well-proven concept that works across all industries and all categories in any given situation, it is little wonder that business leaders and procurement professionals alike are excited by, and enjoy strategizing around, the Purchasing Chessboard. This second edition of *The Purchasing Chessboard* addresses the new realities of a highly volatile economic environment and describes the many—sometimes surprising—ways in which the Purchasing Chessboard is being used in today's business world. Yet despite all of the great achievements of procurement executives and their teams, they do not always receive the recognition they deserve. In response, the authors have developed and outlined within the book an unequivocal approach to measure procurement's impact on a company's performance—Return on Supply Management Assets (ROSMA®).

Rezherad looked at the princess and then stood up from her chair. She reached back with her hand and pulled out her sword which was hidden in a sheath slung over her back. Fahiram gave a silent

nod and in the next moment, she stood ready with the same weapon. Stealthily, they approached the table where the peasant was still trying to pull the jug of wine from the drunk man's grasp. They gave one another a signal with a hand: a letter X which they wrote in the air, and then Fahiram led her sword from the man's left shoulder, across his neck to his front where the blade met Rezherad's sword, brought there from the other side. The man's eyes grew wide and he stared, frozen, at the two swords, which could cut off his head at any moment like scissors. Without moving his body, he set the jug of wine down on the table with care, adding a few coins from the pocket of his jacket.
