Chainsaw Lumbermaking Once you're familiar with Will Malloff's method of chainsaw lumbermaking, you'll be simply and economically turning trees into lumber on your own Learn how to select the tree you want, fell it safely, and saw it into a fine pile of building or cabinet lumber. With detailed instructions and over 400 photographs, Will Malloff tells you everything you need to know to turn a chainsaw into a lumbermill, including how to: Modify the chainsaw and make numerous accessories for milling Use the equipment in the woods Grind a smooth-cutting ripping chain Build your own mill from a 2 x 4 and scraps of plywood Cut burls, shape ovals and mill natural knees for boatbuilding Malloff's method is the fruit of over 30 years' experience of felling trees and making lumber. He's logged everything from giant redwoods to desert mesquite and fulfilled his youthful ambition to fell timber in every major forest of North America. Drawing on this experience, he has invented several chainsaw mills, and perfected the easy, efficient method of chainsaw lumbermaking that he describes in this book. If you've ever had trouble finding the lumber you need, or wanted to build something with your own trees, "Chainsaw Lumbermaking" is the book you've been waiting for. Will Malloff has built a variety of mills and is the designer of what many consider the most effective chainsaw lumbermaking system available. Malloff has spent nearly half a century researching and developing tools and wood technology that minimize ecological impact. In an endeavor to build his own blacksmith shop on a

Canadian Pacific island, he invented a state-of-the-art ripping chain, which made chainsaw lumbermaking more feasible and economical than ever before. Public Television

An essential guide for artist that teaches them how to skip the gallery system, find their niche, and connect directly with collectors to profitably sell their art. For years, galleries have acted as gatekeeper separating artists and collectors. But with the explosion of the Internet, a new generation of savvy,

independent artists is connecting with buyers and making a substantial living doing what they love. *How to Sell Your Art Online* shows any artist how to make a successful living from their work. Cory Huff dispels the myth of the starving artist and provides the effective business strategies necessary to make artistic creations pay. He helps individual artists find their niche; outlines the elements essential for an effective website; and provides invaluable advice on e-mail marketing, blogging, social media marketing, and paid advertising—explaining how to tie all these online activities into offline success. Most importantly, he shares the secret to overcoming the biggest challenge artists face when self-marketing: learning how to tell their unique stories. Every artist has a reason for making art, but can't always find the right way to express it. Huff provides exercises artists can use to clarify the intellectual and emotional process behind their art, and teaches them how to turn that knowledge into stories they can tell online and in person—and expand their reach through blogs and social media to build their art business. Drawing from the stories of successful artists, thoroughly describing how art is sold today, and providing tips on how to build connections personally and electronically, *How to Sell Your Art Online* illustrates the countless ways artists can take control of their creative careers—and sell their work without selling out.

Ernest Dichter is famous as one of the founding fathers of motivational research. In applying the social sciences to a variety of problems, Dichter emphasized new approaches to problem solving, advertising, politics, and selling, and issues of social significance such as urban renewal, productivity, and drug addiction. As an author and corporate adviser, he used psychoanalytic theory and depth interviewing to uncover unconsciously held attitudes and beliefs. His goal was to help explain why people act the way they do and how positive behavioral change might be achieved. In *The Strategy of Desire*, Dichter both counters the argument that motivational research amounts to manipulation, and shows

how the understanding and modification of human behavior is necessary for progress. Dichter's survey and analysis of behavior ranges widely. He examines everyday matters of product choice, as well as such broad civic issues as voter participation, religious toleration, and racial understanding. He shows that in order to achieve socially constructive goals, it is necessary to move beyond theological exhortation, which takes an unrealistic view of human morality, as well as beyond the limits of empirically oriented social science research, which only deals in appearances. Dichter sees human action as rooted in irrational and often unconscious motivation, which can usually be uncovered if the correct approach is used. In his consumer research, he analyzes the nonutilitarian importance of objects in everyday life, as well as how products and materials become bound with emotional resonance or acquire different meanings from different contexts or points of view. Dichter shows that success depends on the satisfaction of desires and a movement beyond the ethic of work and saving. Arguing that in an increasingly technological world, progress and social harmony are materially based, he advocates a morality of the good life in which prosperity and leisure lead to greater h
