Death Waits in the Dark Routledge

To Mr. Tate Howard, You are quite possibly the most infuriating, annoying and grumpy man I've ever met in my life. I know you think that you're God's gift to women, but I have a secret to let you in on: you're not. You're God's gift to yourself. Get over your wanna-be cool surfer self and grow up. I thought it was time that someone addressed your big head and told you straight to your face that you're not all that. Just because you have an Ivy league education doesn't mean you're the smartest man in the world. In fact, I'm not even sure if you would have gotten in if you didn't have rich parents. Yes, I went there. Every woman doesn't want to sleep with you and I'm sure you're not even good in bed. And I'm someone that would know.

In the summer of 1864, sixteen-year-old Rhoda Strong lives in the Lumbee Indian settlement of Robeson County, North Carolina, which has become a pawn in the bloody struggle between the Union and Confederate armies. The community is besieged by the marauding Union Army as well as the desperate Home Guard who are hell-bent on conscripting the young men into deadly forced labor. Daughter of a Scotsman and his formidable Lumbee wife, Rhoda is fiercely loyal to her family and desperately fears for their safety, but her love for the outlaw hero Henry Berry Lowrie forces her to cast her lot with danger. Her struggle becomes part of the community's in a powerful story of love and survival. Nowhere Else on Earth is a moving saga that magnificently captures a little-known piece of American history.

Natalie Pritchard doesn't want to come between the men of Chaos Bleeds. So when Slash and Butler both try to compete for her, she's not having any of it, and steps away from them.

Slash is pissed. He's wanted Natalie from the first moment he saw her, and he knows that Butler only wants her because he can't have someone else. There's no way Slash is going to lose the only woman he's ever loved, especially when he's not even gotten her yet. When Natalie goes on a date with an old friend, Slash is tempted to follow her, but decides against it. When they get a call to say Natalie's been badly beaten, Slash knows he's wasted enough time. He should have been there. Waking up to see Slash there, Natalie is brought back to the first time she saw him, how he made her heart flutter, and the crush that thrived before her father died. Will Slash finally be able to woo his woman, and to have the family he's been craving? Will they get their happily ever after? "A sweet, sexy read, featuring a couple that feels both true-to-life and aspirational." Kirkus Review, Starred Review American Angie Donovan has never wanted much. When you grow up getting bounced from foster home to foster home, you learn not to become attached to anything, anyone, or any place. But it only took her two days to fall in love with Australia. With her visa clock ticking, surely she can fall in love with an Australian—and get hitched—in two months. Especially if he's as hot and funny as her next-door neighbor... Jace Walters has never wanted much—except a bathroom he didn't have to share. The last cookie all to himself. And solitude. But when you grow up in a family of seven, you can kiss those things goodbye. He's finally living alone and working on his syndicated comic strip in privacy. Sure, his American neighbor is distractingly sexy and annoyingly nosy, but she'll be gone in a few months... Except now she's determined to find her perfect match by checking out every eligible male in the town, and her choices are even more distracting. So why does it suddenly feel like he—and his obnoxious tight-knit family, and even these two wayward dogs—could be exactly what she needs? The war is over and blackouts are a thing of the past, except in the village of Melchester, where the local council has refused to sully its streets with unsightly lamps. The night is pitch black, but hardly quiet. Young lovers are rendezvousing, a police constable is helping himself to a few of his neighbor's partridges, and a poet is going to visit his beloved, a new verse on his lips. She will never hear it, sadly, for the young man is stopped along his way – stopped forever, by the tight grip of the garrote. The local constabulary wastes no time reaching out to Scotland Yard, which sends its best man: the easygoing detective-inspector Littlejohn. In Melchester he will find unspeakable secrets – and one citizen whose soul is as dark as the village night.

Beyond simulation and algorithm development, many developers increasingly use MATLAB even for product deployment in computationally heavy fields. This often demands that MATLAB codes run faster by leveraging

the distributed parallelism of Graphics Processing Units (GPUs). While MATLAB successfully provides high-level functions as a simulation tool for rapid prototyping, the underlying details and knowledge needed for utilizing GPUs make MATLAB users hesitate to step into it. Accelerating MATLAB with GPUs offers a primer on bridging this gap. Starting with the basics, setting up MATLAB for CUDA (in Windows, Linux and Mac OS X) and profiling, it then guides users through advanced topics such as CUDA libraries. The authors share their experience developing algorithms using MATLAB, C++ and GPUs for huge datasets, modifying MATLAB codes to better utilize the computational power of GPUs, and integrating them into commercial software products.

Throughout the book, they demonstrate many example codes that can be used as templates of C-MEX and CUDA codes for readers' projects. Download example codes from the publisher's website:

Burnout is common among doctors in the West, so one might assume that a medical career in Malawi, one of the poorest countries in the world, would place far greater strain on the idealism that drives many doctors. But, as *A Heart for the Work* makes clear, Malawian medical students learn to confront poverty creatively, experiencing fatigue and frustration but also joy and commitment on their way to becoming physicians. The first ethnography of medical training in the global South, Claire L. Wendland's book is a moving and perceptive look at medicine in a world where the transnational movement of people and ideas creates both devastation and possibility.

Wendland, a physician anthropologist, conducted extensive interviews and worked in wards, clinics, and operating theaters alongside the student doctors whose stories she relates. From the relative calm of Malawi's College of Medicine to the turbulence of training at hospitals with gravely ill patients and dramatically inadequate supplies, staff, and technology, Wendland's work reveals the way these young doctors engage the contradictions of their circumstances, shedding new light on debates about the effects of medical training, the impact of traditional healing, and the purposes of medicine.

Numerical Methods with VBA Programming provides a unique and unified treatment of numerical methods and VBA computer programming, topics that naturally support one another within the study of engineering and science. This engaging text incorporates real-world scenarios to motivate technical material, helping students understand and retain difficult and key concepts. Such examples include comparing a two-point boundary value problem to determining when you should leave for the airport to catch a scheduled flight. Numerical examples are accompanied by closed-form solutions to demonstrate their correctness. Within the programming sections, tips are included that go beyond language basics to make programming more accessible for students. A unique section suggest ways in which the starting values for non-linear equations may be estimated. Flow charts for many of the numerical techniques discussed provide general guidance to students without revealing all of the details. Useful appendices provide summaries of Excel and VBA commands, Excel functions accessible in VBA, basics of differentiation, and more!

Co-written by the author of the best-seller *An Aid to the MRCP Short Cases* this new, systematically organized text concentrates on examples that are frequently examined in the MRCP Part 2 written examination - saving candidates time during revision and enabling them to concentrate on weaker specialities. By including high quality images and labelling abnormal findings on the original images, the authors enable the reader to feel confident about recognizing specific radiological abnormalities, instead of guessing where the abnormality lies. In order to avoid guessing, the reader is asked to describe the radiological findings in each case. In the Question section, each page is dedicated to an X-ray and sample questions. An Answer section, with further radiographs to highlight variations and details, is given at the end of the book to provide background knowledge.

A Comprehensive Course in Analysis by Poincaré Prize winner Barry Simon is a five-volume set that can serve as a graduate-level analysis textbook with a lot of additional bonus information, including hundreds of problems and numerous notes that extend the text and provide important historical background. Depth and breadth of exposition make this set a valuable reference source for almost all areas of classical analysis. Part 1 is devoted to real analysis. From one point of view, it presents the infinitesimal calculus of the twentieth century with the ultimate integral calculus (measure theory) and the ultimate differential calculus (distribution theory). From another, it shows the triumph of abstract spaces: topological spaces, Banach and Hilbert spaces, measure spaces, Riesz spaces, Polish spaces, locally convex spaces, Fréchet spaces, Schwartz space, and spaces. Finally it is the study of big techniques, including the Fourier series and transform, dual spaces, the Baire category, fixed point theorems, probability ideas, and Hausdorff dimension. Applications include the constructions of nowhere differentiable functions, Brownian motion, space-filling curves, solutions of the moment problem, Haar measure, and equilibrium measures in potential theory.

"Victor C. Strasburger has given us a clear, concise summary of a massive amount of information on a very important subject. This slim volume should be read by every professional who cares for and about adolescents." --Michael B. Rothenberg, M.D., Professor Emeritus, University of Washington School of Medicine "There is much of value here. An opening chapter provides an excellent overview of how mass communication research is conducted, and subsequent chapters focus on current findings regarding the effects of televised portrayals of violence, sex, and the consumption of alcohol, tobacco, and food on adolescents. . . . Comprehensive and well-referenced bibliography. . . . Adolescents and the Media is recommended for a general readership and for undergraduate collections in media studies, health care, and education." --Choice Violent television programs, gory video games, print tobacco advertising, TV beer commercials, and sexually suggestive music videos. How do these and other forms of popular media affect the thinking, behavior, and health of America's teenagers? Adolescents and the Media provides a state-of-the-art review of research findings on the influence of such media as television, movies, video games, print advertising, rock music, and music videos on adolescents. Beginning from a theoretical and conceptual background of adolescent development, the book covers findings on violence, sexual activity, substance abuse, and eating disorders and makes a clear case that media play a role in

diverse facets of at-risk behavior and adjustment. It concludes with recommended strategies for preventing adverse media effects on youths. Mental health professionals and policy makers, primary care physicians and nurses, educators, and almost anyone who works with and cares about adolescents, will find this an eye-opening work.
