With proven success, Mastering has helped students make strides in learning for over 10 years. MasteringChemistry has immersive content and tools that are so engaging that Ann Verner, at the University of Toronto

Scarborough, Canada, said, "MasteringChemistry is the best online chemistry homework program that I have used. The structure of the questions and the hints motivate the students to continue working on the problems, and the immediate feedback increases their confidence." With MasteringChemistry, students gain knowledge that they will use throughout their lives, and universities gain a partner deeply committed to helping students and educators achieve their goals. For students Pearson eText gives you access to an eBook that can be used on the go, and allows you to highlight, search and take notes as you read online. Access to the eBook depends on the package you have bought. You can work through the problems at your own pace, opening hints if you need help. If you make an error, you are given feedback based on that specific mistake so you can learn from it. PhET simulations let you to get hands on to understand how the theory and daily life link up. These fun, interactive, research-based simulations of physical phenomena come from the PhET(tm) project at the University of Colorado.
