This fully updated Ninth Edition of Steven and Susan Zumdahl's CHEMISTRY brings together the solid pedagogy, easy-to-use media, and interactive exercises that today's instructors need for their general chemistry course. Rather than focusing on rote memorization, CHEMISTRY uses a thoughtful approach built on problem-solving. For the Ninth Edition, the authors have added a new emphasis on critical systematic problem solving, new critical thinking questions, and new computer-based interactive examples to help students learn how to approach and solve chemical problems--to learn to think like chemists--so that they can apply the process of problem solving to all aspects of their lives. Students are provided with the tools to become critical thinkers: to ask questions, to apply rules and develop models, and to evaluate the outcome. In addition, Steven and Susan Zumdahl crafted ChemWork, an online program included in OWL Online Web Learning to support their approach, much as an instructor would offer support during office hours. ChemWork is just one of many study aids available with CHEMISTRY that supports the hallmarks of the textbook--a strong emphasis on models, real world applications, visual learning, and independent problem solving. The BMAT (BioMedical Admissions Tests) is a subject-specific admissions test taken by applicants to medicine, veterinary science and related courses at Cambridge, Oxford, Imperial College, UCL and Royal Veterinary College. With more students than ever achieving A grades at A-level, BMAT testing is becoming increasingly popular as a way for universities to identify the most able and dedicated applicants. How to Master the BMAT consists of six sections of revision materials for the maths, physics, chemistry and biology components of the BMAT, with additional notes for problem solving and the writing task. At the end of each of these six sections, a set of review questions enables you to check that you have the necessary core knowledge (some of which you will have already acquired through your GCSE and A-level studies). The additional mock tests should be attempted under exam conditions for the best possible preparation. They provide the equivalent of three full BMAT tests (nine papers). Whatever your knowledge base you are supported throughout the book and where possible each question is complete with revision topics, indicated in brackets.
