[Organisation and Management of Intensive Care](#) Taylor & Francis
In today's academic environment, the challenge of ensuring lasting commercial and economic success for organizations has become more daunting than ever before. The relentless surge in data-driven

decision-making, based on innovative technologies such as blockchain, IoT, and AI, has created a digital frontier filled with complexity. Maintaining a healthy firm that can continually provide innovative products and services to the public while fueling economic growth has become a formidable puzzle. Moreover, this digital transformation has ushered in new risks, from pervasive cybersecurity threats to the ethical challenges surrounding artificial intelligence. In this evolving landscape, academic scholars face the pressing challenge of deciphering the path to long-term organizational prosperity in an era dominated by data. Data-Driven Decision Making for Long-Term Business Success serves as guidance and insights amidst this academic challenge. It is the definitive solution for scholars seeking to uncover the complexities of data-driven decision-making and its profound impact on organizational success. Each meticulously curated chapter delves into a specific facet of this transformative journey, from the implications of modern technologies and pricing optimization to the ethics underpinning data-driven strategies and the metaverse's influence on decision-

making.

NCERT Textbooks play the most vital role in developing student's understanding and knowledge about a subject and the concepts or topics covered under a particular subject. Keeping in mind this immense importance and significance of the NCERT Textbooks in mind, Arihant has come up with a unique book containing Questions-Answers of NCERT Textbook based questions. This book containing solutions to NCERT Textbook questions has been designed for the students studying in Class XI following the NCERT Textbook for Accountancy. The present book has been divided into two parts containing 16 Chapters covering the syllabi of Accountancy for Class XI. Part A covers Theory Base of Accounting, Recording of Transactions-I, Recording of Transactions-II, Bill of Exchange, Bank Reconciliation Statement, etc whereas Part B covers Financial Statements-I, Accounts from Incomplete Records, Applications of Computers in Accounting, Computerized Accounting System, etc. This book has been worked out with an aim of overall development of the students in such a way that it will help students define the way how to write the answers of the textbook based questions. The book covers selected NCERT Exemplar Problems which will help the students understand the type of questions and answers to be expected in the Class XI Accountancy Examination. Also each chapter in the book begins with a summary of the chapter which will help in effective understanding of the theme of the chapter and to make sure that the students will be able to answer all popular questions concerned to a particular chapter whether it is Long Answer Type or Short Answer Type Question. The book has been designed systematically in the simplest manner for easy comprehension of the chapters and their themes. For the overall benefit of students the book has been designed in such a way that it not only gives solutions to all the exercises but also gives detailed explanations which will help

the students in learning the concepts and will enhance their thinking and learning abilities. As the book has been designed strictly according to the NCERT Textbook of Accountancy for Class XI and contains simplified text material in the form of class room notes and answers to all the questions in lucid language, it for sure will help the Class XI students in an effective way for Accountancy.

This title is directed primarily towards health care professionals outside of the United States. An understanding of medicines and their effects on patients remains a crucial area of nursing knowledge. This book provides a thorough foundation upon which nurses can build their clinical experience to achieve competence. It not only provides information on the actions of drugs on the body but also gives clear guidance on the practical aspects of medicines management in both hospital and community. Organisation of the text broadly follows the British National Formulary for ease of use. - Management of medicines linked to their therapeutic use - Medicine administration linked with relevant care of patients where possible - Basic principles of clinical pharmacology underpin the therapeutic chapters - A chapter on the role of patients and carers is included •All content revised in the light of changes in drug therapy, clinical practice and medicines management including nurse prescribing •Key objectives for each chapter •Self-assessment exercises with answers •More detail relating to palliative care; nurse prescribing •A new section on Intensive Therapy •Totally redesigned in two colours with improved design and

page layout, and better illustrations.

Recent years have been characterised by growing awareness among European member states about serious shortcomings to the way organised crime is measured and assessed. Currently, organised crime reports primarily generate descriptive analyses of a past situation based on law enforcement data and do not always provide the necessary information for proactive and preventive policy strategies. Therefore an EU Action Plan has been issued to develop a more future oriented and risk based methodology for the measurement of organised crime and to convert the traditional organised crime situation reports into strategic reports for planning purposes. This book is the outcome of two studies undertaken by a team composed of Belgian, Italian and Swedish researchers for the European Commission. It presents an overview of current practices in the measurement of organised crime in Europe and includes a discussion about the concept and the assessment of the impact of the phenomenon. Further the feasibility of the implementation of the existing EU Action Plan was studied and evaluated. As a result of applied research Measuring Organised Crime in Europe provides an in depth and comparative analysis of current practice in drafting organised crime reports across and by the EU and offers new ideas to improve their quality. The proceedings of the CIB W65 Symposium on the Organization and Management of Construction conference are presented here and in the companion volumes as state-of-the-art papers documenting research and innovative practice in the field of construction. The volumes cover four broad themes: business management, project management, risk management, IT development and applications. Each volume is organized to provide easy reference so that the practitioner can speedily extract up to date information and knowledge about the global construction industry. Managing the Construction Enterprise (Volume One): Covers the firm and its business environment, markets and marketing, human resource management strategic planning, and quality management. Managing the Construction Project (Volume Two): focuses upon productivity, procurement, international projects and human issues in relation to management performance of construction organisations. Managing Risk (Volume Two): incorporates discussion of risk away from regulation by government and those safety risks inherent in the construction process. Managing

Construction Information (Volume Three, published in conjunction with Construct IT Centre of Excellence): incorporates material on information systems and methods, application of IT to the design and construction processes and how IT theory and applications are best transmitted to students and practitioners. The work represents a collation of wide ranging ideas and theory about construction and how research has contributed to the development of the industry on a global application of research to the problems of the construction industry.

Charity Organisation Reporter Vikas Publishing House

This book has been thoroughly revised in view of the changes in the syllabi of various universities and Professional institutes in the country and abroad. Many new features have been added, including a separate chapter on Security . The present study deals with various facets of management and organization in the light of growing need for information in business organizations. Besides throwing light on the basic principles and functions of management, it further highlights the managerial functions of planning, communication and control in the light of their applicability in the area of office management. The salient feature of book is that, while discussing the subject-matter, author has tried to provide the latest information about different types of office machines and equipments which are usable in business organizations and are easily available in the country. A Section on personnel management has also been given for those professional managers who take management as human relations. This book will serve as a textbook for degree, post degree. Institute of Company Secretaries and I.C.W.A. The text will also be a

useful source of information for office managers.

The Project Risk Maturity Model DIWAKAR EDUCATION HUB
This book is the outcome of a six-month research contract undertaken by Ghent University's Research Group Drug Policy, Criminal Policy and International Crime for the Belgian Minister of Justice. Since 1996 the Belgian Government has produced Annual Reports on Organised Crime, and while currently this takes the form of a typically descriptive situation report there has always been the intention to further develop the methodology underwriting the report. It has been envisaged that such methodological development will rely upon the use of supplementary non-police data -both qualitative and quantitative - supporting the utilisation of more sophisticated analytical tools. Proceeding from earlier work undertaken by this research group for the Belgian Federal Police's Organised Crime Unit, this book is an elaboration of the ideas found in Measuring Organised Crime in Belgium: A Risk-Based Methodology (in which a method for determining the impact of organised crime in Belgium is proposed) for application in the context of the Annual Reports. Thus, the substance of this book is a discursive analysis of the issues surrounding a risk-based Annual Report on Organised Crime. As the result of applied research, Reporting on Organised Crime offers concrete recommendations and solutions for the analysis of organised

crime and its reporting at the strategic level.

ACCA P5 Advanced Performance Management
Routledge

Much has been written about Building Information Modelling (BIM) driving collaboration and innovation, but how will future quality managers and engineers develop digital capabilities in augmented and video realities, with business intelligence platforms, robots, new materials, artificial intelligence, blockchains, drones, laser scanning, data trusts, 3D printing and many other types of technological advances in construction? These emerging technologies are potential game changers that require new skills and processes. Digital Quality Management in Construction is the first 'how to' book on harnessing novel disruptive technology in construction quality management. The book takes a tour of the new technologies and relates them to the management of quality, but also sets out a road map to build on proven lean construction techniques and embed technologically based processes to raise quality professionals' digital capabilities. With the mountain of data being generated, quality managers need to unlock its value to drive the quality of construction in the twenty-first century, and this book will help them do that and allow those working in construction Quality Management to survive and thrive, creating higher quality levels and less waste. This book is

essential reading for quality managers, project managers and all professionals in the Architecture, Engineering and Construction industry (AEC). Students interested in new and disruptive technologies will also learn a great deal from reading this book, written by a professional quality manager with nearly thirty years' experience in both the public and private sectors.

From the viewpoint of a health economist, the intensive care unit (ICU) is a particularly fascinating phenomenon. It is the epitome of "high-tech" medicine and frequently portrayed as the place where life-saving miracles are routinely wrought. But the popular imagination is also caught up in the darker side, when agonizing decisions have to be made to avoid futile and inhuman continuation of expensive treatments. My analytical interests led me to approach these issues by asking what the evidence tells us about which ICU activities are very beneficial in relationship to their costs and which are not. This quickly translates into a slightly different question, namely, which patients are most appropriately treated in an ICU and which not. Unfortunately, it is very hard to answer these questions because it has proved very difficult to investigate these issues in the

manner which is now regarded as the "gold standard:" namely by conducting randomized clinical trials or alternative courses of action. I think this is a pity, and I am not at all convinced that it would be unethical to do so in many cases, because there is wide variation in practice and genuine doubt as to which practices are best -the two conditions that need to be fulfilled before such a trial is justifiable.

The Organization and Management of Construction Taylor & Francis

Top businesses recognise risk management as a core feature of their project management process and approach to the governance of projects. However, a mature risk management process is required in order to realise its benefits; one that takes into account the design and implementation of the process and the skills, experience and culture of the people who use it. To be mature in the way you manage risk you need an accepted framework to assess your risk management maturity, allowing you to benchmark against a recognised standard. A structured pathway for improvement is also needed, not just telling you where you are now, but describing the steps required to reach the next level. The Project Risk Maturity Model detailed here provides such an assessment framework and development pathway. It can be used to benchmark your project risk processes and support the introduction of effective in-house project risk management. Using this model, implementation and improvement of project risk management can be managed effectively to ensure that the expected benefits are achieved in a way that is appropriate to the needs of each organisation. Martin Hopkinson has developed The Project Risk Maturity Model into a robust framework, and this book allows you to access and apply his insights and experience. A key feature is a downloadable resource containing a working copy of the QinetiQ Project Risk Maturity Model (RMM). This will enable you to undertake maturity assessments

for as many projects as you choose. The RMM has been proven over a period of 10 years, with at least 250 maturity assessments on projects and programmes with a total value exceeding £60 billion. A case study in the book demonstrates how it has been used to deliver significant and measurable benefits to the performance of major projects.

Data Culture and the Organisation of Teachers ' WorkArihant Publications India limited

Today, opportunities and challenges of available technology can be utilized as strategic and tactical resources for your organization. Conversely, failure to be current on the latest trends and issues of IT can lead to ineffective and inefficient management of IT resources. Managing Information Technology in a Global Economy is a valuable collection of papers that presents IT management perspectives from professionals around the world. The papers introduce new ideas, refine old ones and possess interesting scenarios to help the reader develop company-sensitive management strategies. Managing Information Technology in a Global Economy SBPD Publications

Data Culture and the Organisation of Teachers ' Work provides an in-depth look at how the political and media scrutiny of teachers, pupils and schools now organises teaching and learning. Spina also examines how educational data is used in schools, and where it fails to take account of the everyday experiences of school leaders, teachers and students. Drawing on primary research, and discussing practice in relation to the National Assessment Programme: Literacy and Numeracy (NAPLAN), this book discusses the strengths and weaknesses of a data-driven approach, the restrictions this can impose and how to navigate them as a teacher. Ideal for scholars and

postgraduate students of education, this book provides a comprehensive institutional, ethnographic look into the daily lived experiences of teachers, and the effects of standardised testing.
