### **Joining Together** McGraw-Hill/Irwin

There is a strong movement today in management to encourage management practices based on research evidence. In the first volume of this handbook, I asked experts in 39 areas of management to identify a central principle that summarized and integrated the core findings from their specialty area and then to explain this principle and give real business examples of the principle in action. I asked them to write in non-technical terms, e.g., without a lot of statistics, and almost all did so. The previous handbook proved to be quite popular, so I was asked to edit a second edition. This new edition has been expanded to 33 topics, and there are some new authors for the previously included topics. The new edition also includes: updated case examples, updated

references and practical exercises at the end of each chapter. It also includes a preface on evidence-based management. The principles for the first edition were intended to be relatively timeless, so it is no surprise that most of the principles are the same (though some chapter titles include more than one principle). This book could serve as a textbook in advanced undergraduate and in MBA courses. It could also be of use to practicing managers and not just those in Human Resource departments. Every practicing manager may not want to read the whole book, but I am willing to guarantee that every one will find at least one or more chapters that will be practically useful. In this time of economic crisis, the need for effective management practices is more acute than ever.

This book represents a most robust look at the study of leadership while representing multiple disciplines in a quest to find agreement about leadership and theory.

Russ Volckmann, *International Leadership Review* In this compelling book, top scholars from diverse fields describe the progress they have made in developing a general theory of leadership. Led by James MacGregor Burns, Pulitzer Prize winning author of the classic *Leadership* (1978), they tell the story of this intellectual venture and the conclusions and questions that arose from it. The early chapters describe how, in order to discuss an integrative theory, the group first wrestled with the nature of theory as well as basic aspects of the human condition that make leadership necessary and possible. They then tackle topics such as: the many faces

of power woven into the leadership fabric; crucial elements of group dynamics and the leader follower relationship; ethical issues lying at the heart of leadership; constructivist perspectives on leadership, causality, and social change; and the historical and cultural contexts that influence and are influenced by leadership. The book concludes with a commentary by Joanne Ciulla and an Afterword by James MacGregor Burns. The contributors thorough coverage of leadership, as well as their approach to this unique undertaking, will be of great interest to leaders, students and scholars of leadership.
