Exploring autobiographical texts written by European urban craftsmen from the fifteenth to the eighteenth centuries, this wide-ranging book studies memoirs, diaries, family chronicles, travel narratives, and other forms of personal writings from Spain, France, Italy, Germany, and England. In the process, it considers the motivations of the authors, the changing forms and emphases of artisan narratives, and, more generally, the significance of written self-expression in early modern popular culture. By analyzing reading and writing as practices laden with social meaning, this work aims to illuminate the changing role of the lower classes and other groups considered marginal in the history of literature and literacy. It

uncovers an "Icarian" logic by which writing about the self and one's immediate and private world developed as a complex response to widely shared expectations regarding the cultural and political subordination of craftsmen and others relegated to the margins of public life and discourse. The Icarus Complex

Jane Griffiths's second collection re-imagines lives. Her poems are populated by people ranging from the invented to the mythological to the wholly real. Somewhere in between, the title-sequence recreates the life of Icarus as it might have been had he been born in modern suburban England. Through the voices of his father, his mother, his mildly inept biographer, and the girl-next-door, it explores the gap between desire and reality, and the consequences of trying

to get across it. Icarus stands for the people in many of the poems, passionately concerned to test the limits of what is possible in many different kinds of flight, both literal and metaphorical. It is a book of elegies for lives not lived as well as actual lives.

Christopher Bursk's latest

collection is not just profoundly honest; it is profoundly brave. These astonishing poems explore the space between sensuality, sexuality, and love--a landscape in which flawed human beings give birth to the flawed human beings who will one day take care of them, each generation screwing up even as it adds to the universal fund of beauty and compassion. Above all, Ovid at Fifteen reminds us what it means to feel the wonder of life too keenly--to "want to throw yourself / off the cliff, plunge / into the very heart of color." If Bursk's ordinary yet mythic heroes hold back, they do so not out of cowardice but because they remember what happened to Icarus. And so they watch, and dream, and feel, and thus "make a living / out of aching . . ." The greatness of this book lies in its immortalizing that ache, that delicious pain.

Americans have always loved risktakers. Like the Icarus of ancient Greek lore, however, even the most talented entrepreneurs can overstep their bounds. All too often, the very qualities that make Icaran executives

special-- self-confidence, visionary insight, and extreme competitiveness--spur them to take misguided and even illegal chances. The Icaran failure of an ordinary entrepreneur isn't headline news. But put Icarus in the corporate boardroom and, as David Skeel vividly demonstrates, the ripple effects can be profound. Ever since the first large-scale corporations emerged in the nineteenth century, their ability to tap huge amounts of capital and the sheer number of lives they affect has meant that their executives play for far greater stakes. Excessive and sometimes fraudulent risks, competition, and the increasing size and complexity of organizations: these three factors have been at the heart of every

corporate breakdown from 1873, when financial genius Jay Cooke collapsed, to the corporate scandals of the early 21st century. Compounding the scandals is an ongoing cat-and-mouse game between regulators' efforts to police the three factors that lead to Icarus Effect failures and efforts by corporate America to evade this regulation in the name of efficiency and flexibility. These efforts to side-step oversight can rapidly spiral out of control, setting the stage for the devastating corporate failures that punctuate American business history. But there is also a silver lining to the stunning failures: the outrage they provoke galvanizes public opinion in favor of corporate reform. The most important American business

regulation has always been enacted in response to a major breakdown in corporate America. Today's business environment poses unprecedented perils for the average American as for the first time ever, more than half of Americans now own stock. Identifying the problems of the past, Skeel offers a strikingly new diagnosis of the fundamental flaws in corporate America today, and of what can be done to fix them.

Contains the Proceedings of the Second International Symposium (see title) held at Fort Collins, Colorado in June of 1989. Discussing the impact of science on centuries of political theory, Ezrahi (political science, Hebrew U., Jerusalem) eschews the interpretation that the

Enlightenment did rationalize politics through science, only to be overpowered by the forces of unreason. He posits instead the notion of the specifically political and ideological role of science in upholding modern conceptions of action, authority, and accountability. This is the first study of the extraordinary partnership of Maximova and Vasiliev. Both are very private people, rarely giving interviews, and scorning self-promotion; yet their fame as

a legendary dance partnership is so great that they are known throughout the world. Roberta Lazzarini first saw them dance during the Bolshoi's 1963 season at Covent Garden, and has followed their careers ever since. Maximova and Vasiliev co-operated fully with her on the creation of this book, placing many rare documents and photographs at her disposal. This book was not conceived as a biography - although biographical details are given - but as an impression of the dancers and their art, an integrated structure of words and pictures. It covers their entire working life, from the time they first met at the Bolshoi Ballet School in 1949 to the present, concentrating on their most famous roles both in rehearsal and in

performance. The author has had many conversations with the dancers and their close colleagues, and she has selected 160 photographs from her collection of over 5000. These have been chosen not only for their superb quality and impact, but also for their ability to convey some of the dedication, stamina and discipline as well as the sheer brilliance of Maximova and Vasiliev.

How to think politics with and through the body? The invention of new modes of sensibility is vital to enriching and sustaining political engagements, labours and lives in the situated contexts of urban collectivity. The nanopolitics handbook investigates the neoliberal city and workplace, the politics of crisis and austerity, precarious lives and modes of collaboration - through bodies and their

encounters. Starting from the exploration of what bodies can do - with curiosity, courage and care - nanopolitics is a proposal for producing new collective subjectivations. Based on the experiments and experiences of the nanopolitics group, this book proposes exercises, concepts and ideas as little maps and machines for action. Drawing on social movements, grassroots organizing, dance, theatre and bodywork, the reflections and practices here present strategies for navigating and reconfiguring the playing field of 'nanopolitics', activating its entanglement with the major politics of our time. "Everyone knows that Marcus Tullius Cicero was one of the great statesmen, lawyers, and effective orators in the history

of Rome. But did you also know he was regarded as one of the funniest people in Roman society as well? Five hundred years after his death, in the twilight of antiquity, the writer Macrobius ranks him alongside the comic playwright Plautus as the one of the two greatest wits ever. In this book, classicist Michael Fontaine, proposes to translate selections from Cicero's great rhetorical treatise, *On the Ideal Orator* (*De Oratore*). That larger work covered the whole of rhetoric and effective public speaking and debate. However, contained within it, is a long section focused on the effective use of humor in public speaking. In it, Cicero is concerned not just with various kinds of individual jokes, but with jokes that are advantageous in social situations. He advises readers on how to make the most effective use of wit to win friends, audiences, and achieve

their overall ambitions. Cicero wants to teach his readers how to tell a joke without looking like a buffoon, and how to prevent or avoid jokes from backfiring. Hence, he does give scores of examples of jokes—some of which are timeless and translate easily, others that involve puns in Latin that challenged the translator's creativity. But overall, this work brings to the fore a little known, but important part of Cicero's classic work."--
