What Every Supervisor Must Know About OSHA - Construction This book was designed for use by the OSHA Training Institute Education Centers as part of the curriculum for the OSHA 500 Train the Trainer program. It can be used to deliver OSHA 10 or 30 hour training as well. What Every Supervisor Must Know About OSHA provides managers, supervisors and safety personnel with tools and knowledge needed to ensure a safe and worksite. This single source book provides guidance for construction workers to ensure compliance with mandated Federal Regulations. OSHA can and does inspect companies on a regular and routine basis and levies fines for non-compliance. Accidents and OSHA penalties impact the bottom line of businesses. This book addresses how accidents affect the hidden costs of lost productivity, workers

compensation expense and legal liabilities for managers. While OSHA rules and regulations are explained in this book, the emphasis is on accident prevention using established guidelines. Steps for organizations to comply with OSHA's regulations and Safety Committees are outlined in an easy to use format. Topics are outlined that ensure compliance with Federal rules in a "how to" manner. This manual has been field tested with agencies that sought a simple, no-nonsense approach to OSHA compliance. Included in the book: An overview of OSHA, how it works, how to read the regulations, penalties Detailed guidance on compliance issues such as -FOCUS Inspections and Multi-employer worksites -Health hazards in construction -Asbestos, Lead and Bloodborne Pathogens -Hazard Communication -Personal Protective Equipment and Respirators -Permit Required Space Entry -Welding -Electrical Safety -Stairs and Ladders -Fall Protection -Scaffolding -Steel Erection -Cranes and material handling -Concrete and masonry -Fire Protection -Excavations -Hand and Power Tools -Demolition, Underground Construction and Blasting -Construction Training Requirements

What is the relationship between common-sense, or 'folk', psychology and contemporary scientific psychology? Are they in conflict with one another? Or do they perform quite different, though perhaps complementary, roles? George Botterill and Peter Carruthers discuss these questions, defending a robust form of realism about the commitments of folk psychology and about the prospects for integrating those commitments into natural science. Their focus throughout the book is on the ways in which cognitive science presents a challenge to our common-sense self-image - arguing that our native conception of the mind will be enriched, but not overturned, by science. The Philosophy of Psychology is designed as a textbook for upper-level undergraduate and beginning graduate students in philosophy and cognitive science, but as a text that not only surveys but advances the debates on the topics discussed, it will also be of interest to researchers working in these areas.

OSHA 3358-01N, Deck Barge Safety, presents guide on preventing injuries and illnesses from workplace hazards on deck barges. Approximately 4,000 deck barges operate in the United States, using different types of winches and other equipment in a variety of operations. Employees on these vessels can face serious hazards. Between 1997 and 2006, 305 employees were killed on barge/tow combinations, and 379 explosions or fires occurred on barges or towboats, killing 14 employees. Many such injuries and deaths could be prevented with proper controls, procedures, training, and awareness of

hazards and possible solutions.

The field of occupational health and safety constantly changes, especially as it pertains to biomedical research. New infectious hazards are of particular importance at nonhuman-primate facilities. For example, the discovery that B virus can be transmitted via a splash on a mucous membrane raises new concerns that must be addressed, as does the discovery of the Reston strain of Ebola virus in import quarantine facilities in the U.S. The risk of such infectious hazards is best managed through a flexible and comprehensive Occupational Health and Safety Program (OHSP) that can identify and mitigate potential hazards. Occupational Health and Safety in the Care and Use of Nonhuman Primates is intended as a reference for vivarium managers, veterinarians, researchers, safety professionals, and others who are involved in developing or implementing an OHSP that deals with nonhuman primates. The book lists the important features of an OHSP and provides the tools necessary for informed decision-making in developing an optimal program that meets all particular institutional needs.

This much anticipated new edition provides employers and employees with a day-to-day guide to reducing accidents and injuries, ensuring compliance, avoiding fines and penalties, and controlling workers' compensation costs. You'll not only find comprehensive discussions on all of the construction safety regulations found in the Code of Federal Regulations (CFR) Title 29 Chapter 1926, but you'll also find the actual legal text of the regulations and overviews for each sub Chapter for easier reference. This Construction Safety Handbook covers both the obvious and the hidden dangers of construction and addresses the latest changes in OSHA standards, including new recordkeeping requirements, new ergonomic guidelines, new requirements in the Steel Erection standard, and new additions to signs, signals, and barricades requirements. Written in plain English, this comprehensive handbook provides you with the legal background, practical advice, and ready-to-use written compliance programs you need to ensure your sites meet workplace safety requirements, protect workers, and comply with the standards. Each Chapter provides a description of the requirements of the standard, and a sample written compliance program, checklists, and the appropriate citations from the 29 CFRs. The latest changes in enforcement and inspection policy are also detailed, and a list of OSHA's most frequently cited construction standards is given.

Despite many advances, 20 American workers die each day as a result of occupational injuries. And occupational safety and health (OSH) is becoming even more complex as workers move away from the long-term, fixed-site, employer relationship. This book looks at worker safety in the changing workplace and the challenge of ensuring a supply of top-notch OSH professionals. Recommendations are addressed to federal and state agencies, OSH organizations, educational institutions, employers, unions, and other stakeholders. The committee reviews trends in workforce demographics, the nature of work in the information age, globalization of work, and the revolution in health care deliveryâ€"exploring the implications for OSH education and training in the decade ahead. The core professions of OSH (occupational safety, industrial hygiene, and occupational medicine and nursing) and key related roles (employee assistance professional, ergonomist, and occupational health psychologist) are profiled-how many people are in the field, where they work, and what they do. The book reviews in detail the education, training, and education grants available to OSH professionals from public and private sources.

This report follows up on an interim report released in February 2004 that focused on immediate needs in the areas of animal care and management, recordkeeping, and pest control. The report finds that the zoo has made good-faith efforts to correct deficiencies noted in the interim report and has made some noticeable improvements in the past year in zoo operations and animal care. However, problems in areas such as staff training, workplace culture, and strategic planning still need to be addressed. Specifically, the report recommends that the zoo immediately develop and implement animal-care training programs to ensure that people who are directly responsible for the well-being of its animal collection are adequately prepared and competent. The report commends a zoo-initiated strategic planning process as a positive step, but recommends it contain a more detailed, comprehensive strategy of how it will meet short-term goals and that it should link plans to upgrade facilities with those to acquire animals. The zoo should also focus on improving communication among keepers, veterinarians, nutritionists, senior managers, and curators.
