Much has been written about the care of research animals. Yet little guidance has appeared on protecting the health and safety of the people who care for or use these animals. This book, an implementation handbook and companion to Guide For the Care and Use of Laboratory Animals, identifies principles for building a program and discusses the accountability of institutional leaders, managers, and employees for a program's success. It provides a detailed description of risks-- physical and chemical hazards, allergens and zoonoses, and hazards from experiments--which will serve as a continuing reference for the laboratory. The book offers specific recommendations for controlling risk through administrative procedures, facility design, engineering controls, and periodic evaluations. The volume focuses on the worker, with detailed discussions of work practices, the use of personal protective gear, and the development of an emergency response plan. This handbook will be invaluable to administrators, researchers, and employees in any animal research facility. It will also be of interest to personnel in zoos, animal shelters, and veterinary facilities.

C. P. Ellis grew up in the poor white section of Durham, North Carolina, and as a young man joined the Ku Klux Klan. Ann Atwater, a single mother from the poor black part of town, quit her job as a household domestic to join the civil rights fight. During the 1960s, as the country struggled with the explosive issue of race, Ellis and Atwater met on opposite sides of the public school integration issue. Their encounters were charged with hatred and suspicion. In an amazing set of transformations, however, each of them came to see how the other had been exploited by the South's rigid power structure, and they forged a friendship that flourished against a backdrop of unrelenting bigotry. Now a major motion picture, The Best of Enemies offers a vivid portrait of a relationship that defied all odds. View the movie trailer here: <https://youtu.be/eKM6fSTs-A0>
