ASP® is a world-renowned safety qualification, and this book serves as the ultimate exam preparation guide. Become an Associate Safety Professional on Your First Attempt This book provides comprehensive information that will help you pass the Associate Safety Professional examination on your first attempt. A concept or principle is not simply mentioned or described in passing, but is explained in detail. The book is a study guide for the ASP exam that is logically organized so that one section naturally flows into the next. You will not have to worry about becoming lost in dense academic language since it has been written with an eye toward both technical accuracy and accessibility. Test prep guides are only as good as their practice questions and explanations of answers, which is another area in which our guide stands out. You will find plenty of ASP practice test questions provided by this Become an Associate Safety Professional on Your First Attempt test prep team. To ensure that the reasoning and principles behind each answer are clearly understood, each answer is explained in depth.

We have helped hundreds of thousands of individuals pass standardized tests and achieve their education and career goals through Become an Associate Safety Professional on Your First Attempt. ASP Safety Fundamentals Exam Secrets Study Guide does not fall short of the high standards we have set for Test Preparation guides. The investment is one of the best you can make for your future. Make sure you are prepared for your ASP exam by getting the ASP review you need. Several books are available for safety professionals to use to study Associate Safety Professional® (ASP®), but a gap existed for a book covering the ASP10 Examination Blueprint | V.2019.04.24 of the Board of Certified Safety Professionals. For those who are interested in getting ASP blueprints answers with ease and comfort, this book will be a milestone.

Many standards promulgated by the Occupational Safety and Health Administration (OSHA) explicitly require the employer to train employees in the safety and health aspects of their jobs. Other OSHA standards make it the employer's responsibility to limit certain job assignments to employees who are "certified," "competent," or "qualified"—meaning that they have had special previous training, in or out of the workplace. The term "designated" personnel means selected or assigned by the employer or the employer's representative as being qualified to perform specific duties. These requirements reflect OSHA's belief that training is an essential part of every employer's safety and health program for protecting workers from injuries and illnesses. Many researchers conclude that those who are new on the job have a higher rate of accidents and injuries than more experienced workers. If ignorance of specific job hazards and of proper work practices is even partly to blame for this higher injury rate, then training will help to provide a solution. As an example of the trend in OSHA safety and health training requirements, the Process Safety Management of Highly Hazardous Chemicals standard (Title 29 Code of Federal Regulations Part 1910.119) contains several training requirements. This standard was promulgated under the requirements of the Clean Air Act Amendments of 1990. The Process Safety Management Standard requires the employer

to evaluate or verify that employees comprehend the training given to them. This means that the training to be given must have established goals and objectives regarding what is to be accomplished. Subsequent to the training, an evaluation would be conducted to verify that the employees understood the subjects presented or acquired the desired skills or knowledge. If the established goals and objectives of the training program were not achieved as expected, the employer than would revise the training program to make it more effective, or conduct more frequent refresher training or some combination of these. The requirements of the Process Safety Management Standard follow the concepts embodied in the OSHA training guidelines contained in this booklet. The length and complexity of OSHA standards may make it difficult to find all the references to training. So, to help employers, safety and health professionals, training directors, and others with a need to know, OSHA's training-related requirements have been excerpted and collected in this booklet. Requirements for posting information, warning signs, labels, and the like are excluded, as are most references to the qualifications of people assigned to test workplace conditions or equipment. It is usually a good idea for the employer to keep a record of all safety and health training. Records can provide evidence of the employer's good faith and compliance with OSHA standards. Documentation can also supply an answer to one of the first questions an accident investigator will ask: "Was the injured employee trained to do the job?" Training in the proper performance of a job is time and money well spent, and the employer might regard it as an investment rather than an expense. An effective program of safety and health training for workers can result in fewer injuries and illnesses, better morale, and lower insurance premiums, among other benefits.

**YOU WILL PASS THE OSHA 511 WITH THIS STUDY**

**GUIDE.....**This study guide is from the notes of participants in the OSHA 511 General Industry course. What we have done is clean up our notes and put them in order so that you can be prepared for the final exam. For the most part if you understand the concept of the items listed you will have a chance to make a 90% or better on the exam. Obviously studying and class participation is key. But if you are like me you want to know what you are walking into ahead of time. So what you will find is a list of statements, terms, and explanations to follow. Some of the notes **YOU WILL SEE ON THE EXAM**; easily 80%. Research these terms and learn the context of what they are asking for with the OSHA standards book, or if you are computer savvy, Google. These notes are all I used for the exam and passed quickly with an impressive score.
