The Reading Group follows the trials and tribulations of a group of women who meet regularly to read and discuss books. Over the course of a year, each of these women become intertwined, both in the books they read and within each other's lives. Inspired by a shared desire for conversation, a good book and a glass of wine--Clare, Harriet, Nicole, Polly, and Susan undergo startling revelations and transformations despite their differences in background, age and respective dilemmas. What starts as a reading group gradually evolves into a forum where the women may express their views through the books they read and grow to become increasingly more open as the bonds of friendship cement. In The Reading Group, Noble reveals the many complicated paths in life we all face as well as the power and importance of friendship.

Quick Calculus 2nd Edition A Self-Teaching Guide Calculus is essential for understanding subjects ranging from physics and chemistry to economics and ecology. Nevertheless, countless students and others who need quantitative skills limit their futures by avoiding this subject like the plague. Maybe that's why the first edition of this self-teaching guide sold over 250,000 copies. Quick Calculus, Second Edition continues to teach the elementary techniques of differential and integral calculus quickly and painlessly. Your "calculus anxiety" will rapidly disappear as you work at your own pace on a series of carefully selected work problems. Each correct answer to a work problem leads to new material, while an incorrect response is followed by additional explanations and reviews. This updated edition incorporates the use of

calculators and features more applications and examples. In cardiovascular surgery, important questions remain to be addressed, however. "Strategy for Cardio-aortic and Aortic Surgery" was the theme of the 7th Keio University International Symposium for Life Sciences and Medicine. Meeting in Tokyo, researchers and specialists in cardiac surgery from around the world discussed crucial issues in their field. Papers from the symposium, collected in this volume, cover a broad range of topics, including recent advances in diagnostic imaging, brain protection during aortic surgery, spinal protection during thoracoabdominal aneurysm repair, treatment of type A acute aortic dissection, and stent-grafts and less-invasive aortic surgery. This unique book provides valuable information especially for aortic, cardiovascular, and thoracic surgeons.

Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel

and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. It's no secret that in today's complex world, students face unparalleled demands as they prepare for college, careers, and active citizenship. However, those demands won't be met without a fundamental shift from traditional, teacher-centered instruction toward innovative, student-centered teaching and learning. For schools ready to make such a shift, project-based learning (PBL) offers a proven framework to help students be better equipped to tackle future challenges. Project Based Teachers encourage active questioning, curiosity, and peer learning; create learning environments in which every student has a voice; and have a mastery of content but are also comfortable responding to students' questions by saying, "I don't know. Let's find out together." In this book, Suzie Boss and John Larmer build on the framework for Gold Standard PBL originally presented in Setting the Standard for Project Based Learning and explore the seven practices integral to Project Based Teaching: Build the Culture Design and Plan Align to Standards Manage Activities Assess Student Learning Scaffold Student Learning Engage and Coach For each practice, the authors present a wide range of practical strategies and include teachers' reflections about and suggestions from their classroom experiences. This book and a related series of free

videos provide a detailed look at what's happening in PBL classrooms from the perspective of the Project Based Teacher. Let's find out together. A copublication of ASCD and Buck Institute for Education (BIE).
