This book provides an original and comprehensive assessment of the hypotheses concerning the origin of resurrection Christology. It fills a gap in the literature by addressing these issues using a transdisciplinary approach involving historical-critical study of the New Testament, theology, analytic philosophy, psychology and comparative religion. Using a novel analytic framework,

this book demonstrates that a logically exhaustive list of hypotheses concerning the claims of Jesus' post-mortem appearances and the outcome of Jesus' body can be formulated. It addresses these hypotheses in detail, including sophisticated combinations of hallucination hypothesis with cognitive dissonance; memory distortion; and confirmation bias. Addressing writings from both within and outside of Christianity, it also demonstrates how a comparative religion approach might further illuminate the origins of Christianity. This is a thorough study of arguably the key event in the formation of the Christian faith. As such, it will be of keen interest to theologians, New Testament scholars, philosophers, and scholars of religious studies.

The environmental life cycle of a product consists of all the stages from raw material extraction through production and use to waste management. Life cycle assessment (LCA), then, is the assessment of the environmental impact of a product throughout its life cycle. The holistic perspective that LCA provides on the environmental performance of products has made it a central concept for both environmental management in industry and environmental policy-making in public government. This is a textbook on LCA for those who want to learn the practice of LCA, e.g. environmental engineers, environmental managers and eco-designers. The title paraphrases Douglas Adams' famous story 'The Hitch Hiker's Guide to the Galaxy', in which the machine Deep Thought after seven and a half million years of computing come up with '42' as the answer to the 'great Question of Life, the Universe and Everything'. Expectations on LCA are often similar - simple answer to difficult environmental dilemmas, and

---

the result often as incomprehensible as 42, unless one knows how to interpret LCA methodology and results. The book is organised in three parts covering LCA methodology, LCA applications and exercises on LCA. Two introductory chapters give a general overview of the LCA concept and its historical development. After that, LCA methodology is described in detail in six chapters. Different fields of LCA application are covered in five subsequent chapters. Since the aim of the book is to teach the execution of LCA, there are also a number of exercises. Smaller exercises train different aspects of LCA methodology and prepare for the larger ones, ten complete LCA exercise projects.

After Lora Brody and Millie Apter discovered the joys of baking bread in electric bread machines, they decided to create and swap new recipes. Lora would rave about a newly developed recipe and send it to Millie, who would have disastrous results with it. What was going on? This mother-daughter team soon learned that the same recipe did not work in all machines, so it was back to the kitchen. After months of testing, they found that the

amounts of ingredients and the order in which they are put into the machine affect the taste, crust, and the crumb of the bread. Thanks to them, now you too can discover the best ways to make bakery fresh bread at the touch of a button! Bread Machine Baking: Perfect Every Time has two features not found in other bread machine books: Each recipe is geared to a specific electric bread machine. All of the 75 recipes have been individually developed for and tested in every machine on the market. The innovative sweet and savory bread recipes, ranging from Lemon Mint Bread to Olive Onion Bread, and Granola Cranberry Bread to Chocolate Pecan Biscotti, were developed especially for this book.

" I ' ve got seven days to come clean to my new dad. Seven days to tell the truth... " For sixteen-

year-old Tiffany Sly, life hasn't been safe or normal for a while. Losing her mom to cancer has left her a little bit traumatized and now she has to leave her hometown of Chicago to live with the biological dad she's never known. Anthony Stone is a rich man with four other daughters—and rules for every second of the day. Tiffany tries to make the best of things, but she doesn't fit into her new luxurious, but super-strict, home—or get along with her standoffish sister London. The only thing that makes her new life even remotely bearable is the strange boy across the street. Marcus McKinney has had his own experiences with death, and the unexpected friendship that blossoms between them is the only thing that makes her feel grounded. But Tiffany has a secret. Another man claims he's Tiffany's real dad—and she has only seven days before he shows up to demand a paternity test and the truth comes out. With her life about to fall apart all over again, Tiffany finds herself discovering unexpected truths about her father, her mother and herself, and realizing that maybe family is in the bonds you make—and that life means sometimes taking risks.

Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the

expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. Phosphoinositides play a major role in cellular signaling and membrane organization. During the last three decades we have learned that enzymes turning over phosphoinositides control vital physiological processes and are involved in the initiation and progression of cancer, inflammation, neurodegenerative, cardiovascular, metabolic disease and more. In two volumes, this book elucidates the crucial mechanisms that control the dynamics of phosphoinositide conversion. Starting out from phosphatidylinositol, a chain of lipid kinases collaborates to generate the oncogenic lipid phosphatidylinositol(3,4,5)-trisphosphate.

For every phosphate group added, there are specific lipid kinases – and phosphatases to remove it. Additionally, phospholipases can cleave off the inositol head group and generate poly-phosphoinositols, which act as soluble signals in the cytosol. Volume I untangles the web of these enzymes and their products, and relates them to function in health and disease. Phosphoinositide 3-kinases and 3-phosphatases have received a special focus in volume I, and recent therapeutic developments in human disease are presented along with a historical perspective illustrating the impressive progress in the field.

BE RICH AND HAPPY. New York : Harper & Row [c1964]

When most people meet Jesus for the first time, they are wild and free, passionate and ready to embrace their Savior, which also means coming face-to-face with their brokenness. They are not ashamed to admit that they need Jesus to fix them. However, over time in their Christian walk, they start to forget the simple fact that all people are shattered glass and in constant need for Jesus to be the glue to hold them together. They start to play God and fashion themselves to be a perfect picture of what they think a Christian should look like in

order to fit into the kingdom of God and do His work. The danger in this downward spiral is that not only does it cause Christ followers to fall because they are trying to fix themselves, but it also keeps new people from coming into the kingdom of God. Nonbelievers may feel as if they are not good enough. Playing the perfect Christian or church is a dangerous playground. The bride of Christ must embrace its constant need for the Savior so that more people will fall in love with Him, the one who seeks the broken to heal them and set them free. Do you find yourself running the hamster wheel of trying to be the perfect Christian? Are you exhausted and feel like if you let your foot slip just once, you will disappoint Jesus and turn the church away from your side? Trust me when I say that you can be free from the vicious cycle of perfectionism. Are you ready to embrace your brokenness and your constant need for a Savior? Only by learning this truth will you truly be set free. Freedom is near. Can you feel it?"
