Minimalist Baker's Everyday Cooking HarperCollins

Less a distinct style than the concrete expression of being in a particular era, Pop art began as a revolt against mainstream approaches to art and culture and evolved into a wholesale interrogation of modern society, consumer culture, and the role of the artist and artwork. The movement's primary provocation was to defy ideas of the artistic canon or "originality" by integrating mass market imagery into their works. Whether advertising slogans, famed Hollywood faces, comic-strip-style characters, or the packaging of consumer products, the likes of Robert Rauschenberg, Claes Oldenburg, Andy Warhol, and Roy Lichtenstein knowingly reproduced mundane, everyday images from popular culture. At the same time, Pop art reduced the role of the individual and challenged the notion of originality by deploying mass production techniques such as screen printing. Like a hall of mirrors, the resulting works came to interrogate both the ideas and desires of contemporary culture, and its state of simulacra, whereby images, substitutes, and representations come to define the experience of "reality." In this book, Tilman Osterwold explores the styles, sources, and stars of the Pop Art phenomenon. From Lichtenstein's comic-book aesthetics to Warhol's images of Marilyn, it explores how a movement that interrogated the icons of its time came to produce icons of its own.

Behavioral finance presented in this book is the second-generation of behavioral finance. The first generation, starting in the early 1980s, largely accepted standard finance's notion of people's wants as "rational" wants—restricted to the utilitarian benefits of high returns and low risk. That first generation commonly described people as "irrational"—succumbing to cognitive and emotional errors and misled on their way to their rational wants. The second generation describes people as normal. It begins by acknowledging the full range of people's normal wants and their benefits—utilitarian, expressive, and emotional—distinguishes normal wants from errors, and offers guidance on using shortcuts and avoiding errors on the way to satisfying normal wants. People's normal wants include financial security, nurturing children and families, gaining high social status, and staying true to values. People's normal wants, even more than their cognitive and emotional shortcuts and errors, underlie answers to important questions of finance, including saving and spending, portfolio construction, asset pricing, and market efficiency.
