This PhD thesis approaches the phenomenon of supply chain governance for social sustainability in the ready-made garment industry in Bangladesh. This research is based on a study of eight large multinational corporations (e.g. clothing brands and retailers) and their ready-made garment suppliers. The purpose of this research is to understand how supply chain governance mechanisms and governance structures improve social sustainability performance when stakeholders are engaged. The study identifies four main governance systems, namely, market-based, hierarchical controlbased, collaborative multi-stakeholder-based and relational cross-sectoral-based. These governance systems are employed in the supply chain by the multinational corporations in combination with different stakeholders, such as suppliers, multi-stakeholder-initiatives, and non-government organisations. The study focuses on the challenges faced by the multinational corporations to ensure social sustainability, whilst at the same time, incorporating suppliers' viewpoints on the consequences of different governance systems for social sustainability. This research shows the choice of governance structures from market-based, hierarchy-based, collaboration-based and relational-based depend on the cost of managing relationships with the stakeholders and potential risks of governance in a given situation. An effective governance structure for a multinational corporation in a particular context is determined by how well the structure supports governance mechanisms to reduce associated transaction risks that results from potential opportunistic behaviour of the suppliers. In this research, it is argued that governance structure provides the platform for practicing a set of governance mechanisms. The study claims that social sustainability governance incorporates three mechanisms with separate outcomes: one consists of buyer-driven control-based mechanisms which include codes of conduct, supplier assessment and monitoring, and supplier training for regular social compliance; the second consists of multi-stakeholder-based governance mechanisms for structural compliance when unexpected problems occur, for example, building collapse, electrical and fire safety risks emerge; and the third comprises cross-sectoral governance mechanisms when the multinational corporations involve with non-government organisations for social development of the garment workers and community by facilitating drinking water, health-hygiene, education, and so on. This thesis contributes to the Sustainable Supply Chain Management literature by expanding knowledge of supply chain governance through bringing an understanding of governance mechanisms, governance structures and stakeholder engagements for social sustainability. As the demand for supply chain governance for social sustainability are growing, this thesis can help responsible corporate sourcing managers to develop a deeper understanding of how supply chain governance can affect social sustainability. Denna doktorsavhandling tar sig an fenomenet leverantörsstyrning för social hållbarhet i klädindustrin i Bangladesh. Forskningen baseras på en studie av åtta stora multinationella företag, tillika återförsäljare av kläder och välkända klädmärken. Syftet med studien är att förstå hur leverantörsstyrningsmekanismer och styrstrukturer kan förbättra socialt hållbarhetsarbete när flera aktörer är engagerade och samverkar. Resultatet av studien indikerar att multinationella företag de facto engagerar sig med andra aktörer för att förbättra sin förmåga att bedriva socialt hållbarhetsarbete. Studien identifierar fyra olika typer av leverantörsstysystem: ett marknadsbaserat, ett hierarkiskt kontrollbaserat, ett kollaborativt multi-intressentbaserat samt ett relationellt sektorsövergripande system. Dessa styrningssystem tillämpas i leverantörskedjan av de multinationella företagen i samarbete med andra aktörer såsom leverantörer, ‘multi-intressentinitiativ’ och icke-statliga organisationer. Studien fokuserar dels på de utmaningar som föreligger för de multinationella företagen när det gäller att säkerställa social hållbarhet, dels på hur

leverantörer uppfattar konsekvenserna av de olika styrningssystemen för social hållbarhet. Denna forskning visar att valet av styrstruktur, från marknadsbaserad, hierarkibaserad, kollaborativ och relationell är beroende dels av kostnaden för att hantera och upprätthålla relationer med de olika aktörerna, dels av de potentiella riskerna som föreligger i en viss situation. Vad som utgör en effektiv styrstruktur för ett multinationellt företag i en viss given kontext avgörs av hur väl strukturen stödjer styrningsmekanismer för att reducera transaktionsrisker som bottnar i ett potentiellt opportunistiskt beteende hos leverantörerna. I denna forskning argumenteras det för att struktur ger en plattform för att tillämpa ett antal styrningsmekanismer. Studien visar att styrning av social hållbarhet omfattar tre typer av mekanismer med olika utgång. En består av köparstyrda styrningsmekanismer som omfattar uppförandekoder, leverantörskontroll och leverantörsutbildning. Den andra består av multi-initiativbaserade styrningsmekanismer av hur det strukturella arbetet för att hantera oväntade problem (t.ex. bygg-, el- och brandsäkerhetsrisker) efterföljs. Det tredje omfattar sektorsövergripande styrningsmekanismer där de multinationella företagen samverkar med lokala icke-statliga organisationer i projekt som syftar till social utveckling (tillgång till rent vatten, hälso- & utbildningsinsatser, etc.) för fabriksarbetarna och det omgivande samhället. Denna avhandling bidrar till Sustainable Supply Chain Management-litteraturen då den utvidgar kunskapen om leverantörsstyrning för social hållbarhet genom en den ger en ökad förståelse för styrningsmekanismer, styrstrukturer och olika aktörers engagemang för social hållbarhet. I takt med att behovet av leverantörsstyrning för social hållbarhet ökar kan denna avhandling hjälpa ansvariga ‘corporate sourcing managers’ att utveckla en fördjupad förståelse för hur leverantörsstyrning kan påverka social hållbarhet. **Modern Japanese Management** Wiley-VCH Verlag GmbH

Much has been written about leadership and team building, but there are still major gaps in thinking and research about how to engage senior stakeholders in support of an organisation's projects. The central role of stakeholders in the successful delivery of organisational strategy is becoming increasingly recognised, as is the importance of developing a sponsor culture to support more collaborative practices within the organisation. Building, and managing, relationships with senior (upwards) stakeholders is essential for success. Advising Upwards brings together the ideas of experts in fields related to engaging senior stakeholders, such as risk management, decision-making, understanding cultural considerations, effective communication and other disciplines that may enhance the sustainable engagement of senior stakeholders. The starting point is an examination of the difficulties that senior managers face as they move through the ranks of an organisation from middle management to executive levels. Senior managers usually move up through the organisation on the basis of command and control management. Once in the executive ranks they must develop a more collaborative approach and adopt the principles of emotional intelligence (EQ) to succeed. Awareness of difficulties that senior stakeholders may face drives effective approaches for communication between the team and sponsors. Case studies and stories from experts illustrate practical, structured approaches that enable the teams to develop robust relationships with senior stakeholders will result in teams 'being heard', and support their 'being extraordinary' through innovative approaches to advising upwards. **The Lazy Project Manager** Harper Collins

The Industrial Revolution, powered by oil and other fossil fuels, is spiraling into a dangerous endgame. The price of gas and food are climbing, unemployment remains high, the housing market has tanked, consumer and government debt is soaring, and the recovery is slowing. Facing the prospect of a second collapse of the global economy, humanity is desperate for a sustainable economic game plan to take us into the future. Here,

Jeremy Rifkin explores how Internet technology and renewable energy are merging to create a powerful "Third Industrial Revolution." He asks us to imagine hundreds of millions of people producing their own green energy in their homes, offices, and factories, and sharing it with each other in an "energy internet," just like we now create and share information online. Rifkin describes how the five-pillars of the Third Industrial Revolution will create thousands of businesses, millions of jobs, and usher in a fundamental reordering of human relationships, from hierarchical to lateral power, that will impact the way we conduct commerce, govern society, educate our children, and engage in civic life. Rifkin's vision is already gaining traction in the international community. The European Union Parliament has issued a formal declaration calling for its implementation, and other nations in Asia, Africa, and the Americas, are quickly preparing their own initiatives for transitioning into the new economic paradigm. The Third Industrial Revolution is an insider's account of the next great economic era, including a look into the personalities and players — heads of state, global CEOs, social entrepreneurs, and NGOs — who are pioneering its implementation around the world. **Strategy** John Wiley & Sons
Synthetic materials are a tremendous potential resource for treating human disease. For the rational design of many of these biomaterials it is necessary to have an understanding of polymer chemistry and polymer physics. Equally important to those two fields is a quantitative understanding of the principles that govern rates of drug transport, reaction, and disappearance in physiological and pathological situations. This book is a synthesis of these principles, providing a working foundation for those in the field of drug delivery. It covers advanced drug delivery and contemporary biomaterials. **Controlling Strategy** Edward Elgar Publishing

"Dr. Amit Goswami is one of the most brilliant minds in the world of science. His insights into the relationship between physics and consciousness have deeply influenced by understanding, and I am deeply grateful to him. Physics of the Soul is both challenging and brilliant." —Deepak Chopra Quantum Physics and Spirituality Made Simple At last, science and the soul shake hands. Writing in a style that is both lucid and charming, mischievous and profound, Dr. Amit Goswami uses the language and concepts of quantum physics to explore and scientifically prove metaphysical theories of reincarnation and immortality. In Physics of the Soul, Goswami helps readers understand the perplexities of the quantum physics model of reality and the perennial beliefs of spiritual and religious traditions. He shows how they are not only compatible but also provide essential support for each other. The result is a deeply broadened, exciting, and enriched worldview that integrates mind and spirit into science. **Leather and Footwear Sustainability** Oxford University Press
Rhetorics, Poetics, and Cultures is James Berlin's most comprehensive effort to refigure the field of English Studies. Here, in his last book, Berlin both historically situates and recovers for today the tools and insights of rhetoric-displaced and marginalized, he argues, by the allegedly disinterested study of aesthetic texts in the college English department. Berlin sees rhetoric as offering a unique perspective on the current disciplinary crisis, complementing the challenging perspectives offered by postmodern literary theory and cultural studies. Taking into account the political and intellectual issues at stake and the relation of these issues to economic and social transformations, Berlin argues for a pedagogy that makes the English studies classroom the center of disciplinary activities, the point at which theory, practice, and democratic politics intersect. This new educational approach, organized around text interpretation and production-not one or the other exclusively, as before-prepares students for work, democratic politics, and consumer culture today by providing a revised conception of both reading and writing as acts of textual interpretation; it also gives students tools to critique the socially constructed, politically charged reality of classroom, college, and culture. This new edition of Rhetorics, Poetics, and Cultures includes JAC response essays by Linda Brodkey, Patricia Harkin, Susan Miller, John Trimbur, and Victor J. Vitanza, as well as an afterword by Janice M. Lauer. These essays situate Berlin's work in personal, pedagogical, and political contexts that highlight the continuing importance of his work for understanding contemporary disciplinary practice. **Managing Electronic Media** Emerald Group Pub Limited
This college-level media management textbook reflects the changes in the media industries that have occurred in the past decade. Today's managers must address new issues that their predecessors never faced,

from the threats of professional piracy and casual copying of digital media products, to global networks, on-demand consumption, and changing business models. The book explains the new new vocabulary of media moguls, such as bandwidth, digital rights management, customer relations management, distributed work groups, centralized broadcast operations, automated playlists, server-based playout, repurposing, mobisodes, TV-to-DVD, and content management. The chapters logically unfold the ways that managers are evolving their practices to make content, market it, and deliver it to consumers in a competitive, global digital marketplace. In addition to media companies, this book covers management processes that extend to all content-producing organizations, because today's students are as likely to produce high-quality video and Web video for ABC Computer Sales as they are for the ABC Entertainment Television Network.

The rapid developments in peptide research over the past few decades make it almost impossible for newcomers to gain an overview. This means an easily comprehensible yet concise introduction is vital. This unique work covers all the important aspects of this wide-ranging field in one handy volume. On the basis of the fundamental chemical and structural properties of peptides, this reference runs the gamut from analysis, the occurrence and biological importance of peptides, via chemical, biochemical and genetic methods of peptide synthesis, right up to peptide libraries, peptide design and their role in drug research. Yet this book offers much more than a mere overview of the latest level of research. An encyclopedic appendix with valuable data on more than 500 biological relevant peptides and proteins, a comprehensive register and details of further literature references make this the ideal reference for all questions regarding peptide research. For newcomers and specialists alike. 2005 CHOICE Outstanding Academic Title Basho's Haiku offers the most comprehensive translation yet of the poetry of Japanese writer Matsuo Bash? (1644–1694), who is credited with perfecting and popularizing the haiku form of poetry. One of the most widely read Japanese writers, both within his own country and worldwide, Bash? is especially beloved by those who appreciate nature and those who practice Zen Buddhism. Born into the samurai class, Bash? rejected that world after the death of his master and became a wandering poet and teacher. During his travels across Japan, he became a lay Zen monk and studied history and classical poetry. His poems contained a mystical quality and expressed universal themes through simple images from the natural world. David Landis Barnhill's brilliant book strives for literal translations of Bash?'s work, arranged chronologically in order to show Bash?'s development as a writer. Avoiding wordy and explanatory translations, Barnhill captures the brevity and vitality of the original Japanese, letting the images suggest the depth of meaning involved. Barnhill also presents an overview of haiku poetry and analyzes the significance of nature in this literary form, while suggesting the importance of Bash? to contemporary American literature and environmental thought.
