As seen on Dr. Oz, a revolutionary, naturopathic plan that enhances beauty, improves health, and reverses aging, Dr. Pina's powerful program is guaranteed to make you glow from the inside out. The philosophy of naturopathic medicine is to use the most natural methods to achieve optimal health and beauty. People who follow this philosophy have a "glow"—an almost indescribable radiance, beauty, and energetic vitality. Dr. Pina's holistic wisdom blends practices from naturopaths, scientists, and Chinese medicine and is informed by medical research. This practical guide presents the five simple keys to great beauty and health (sleep, food, exercise, relaxation, detoxification), explains how to maximize their benefits, offers advice on natural remedies like vitamins and herbs, and gives Dr. Pina's expert guidance based on over a decade of research and clinical experience. The book's tips include: The real secrets behind staying young. The best practices for radiant skin and hair. The vitamins and herbs that work like magic bullets. Simple daily habits that help overcome stress and shed extra pounds. Dr. Pina clears up the confusion about what actually works and what doesn't and dispels the popular myths that are doing more harm than good. By following Dr. Pina's advice, you will see yourself looking more radiantly beautiful each day.

Medication Fact Book for Psychiatric Practice, Fifth Edition Oxford University Press
As the mental health reporter for the Boston Globe, Alison Bass's front-page reporting on conflicts of interest in medical research stunned readers, and her series on sexual misconduct among psychiatrists earned a Pulitzer Prize nomination. Now she turns her investigative skills to a controversial case that exposed the increased suicide rates among adolescents taking antidepressants such as Paxil, Prozac, and Zoloft. Side Effects tells the tale of a gutsy assistant attorney general who, along with an unlikely whistleblower at an Ivy League university, uncovered evidence of deception behind one of the most successful drug campaigns in history. Paxil was the world's bestselling antidepressant in 2002. Pediatric prescriptions soared, even though there was no proof that the drug performed any better than sugar pills in treating children and adolescents, and the real risks the drugs posed were withheld from the public. The New York State Attorney General's office brought an unprecedented lawsuit against giant manufacturer GlaxoSmithKline, the maker of Paxil, for consumer fraud. The successful suit launched a tidal wave of protest that changed the way drugs are tested, sold, and marketed in this country. With meticulous research, Alison Bass shows us the underbelly of the pharmaceutical industry. She lays bare the unhealthy ties between the medical establishment, big pharma, and the FDA—relationships that place vulnerable children and adults at risk every day.

Dr. Hyman's revolutionary weight-loss program, based on the #1 New York Times bestseller The

Blood Sugar Solution, supercharged for immediate results! The key to losing weight and keeping it off is maintaining low insulin levels. Based on Dr. Hyman's groundbreaking Blood Sugar Solution program, THE BLOOD SUGAR SOLUTION 10-DAY DETOX DIET presents strategies for reducing insulin levels and producing fast and sustained weight loss. Dr. Hyman explains how to: activate your natural ability to burn fat—especially belly fat; reduce inflammation; reprogram your metabolism; shut off your fat-storing genes; de-bug your digestive system; create effortless appetite control; and soothe the stress to shed the pounds. With practical tools designed to achieve optimum wellness, including meal plans, recipes, and shopping lists, as well as step-by-step, easy-to-follow advice on green living, supplements, medication, exercise, and more, THE BLOOD SUGAR SOLUTION 10-DAY DETOX DIET is the fastest way to lose weight, prevent disease, and feel your best.

Daily Medicine Diary Penguin

In this book, David Karp explores the relationship between pills and personhood by listening to a group of experts who rarely get the chance to speak on the matter—those who are taking the medications. Through their honest and vivid stories, this book provides unflinching portraits of people attempting to make sense of a process far more complex and mysterious than doctors or pharmaceutical companies generally admit.

The Healthspan Solution Crabtree Publishing Company
Pharmaceutical medicine is very, very big business. The top ten players earned more than \$200 billion in 2003. One drug, Pfizer's cholesterol pill Lipitor, had sales of more than \$9 billion. This kind of money buys an awful lot of friends among doctors and politicians. Most of those involved in the formulation of public health policy seems happy with the present system. The trouble is that the public is starting to have doubts. There is a growing sense that the vast profits of drug companies and their control of the research agenda might not be that good for our health. Jacky Law takes the reader on a journey through the pharmaceutical business and shows how the public is quite right to be concerned about conventional medicine, as it has developed since the late 1970s. She tells a story of spectacular regulatory failure, phenomenally high prices, betrayal of the public interest and a growing awareness among ordinary people that things could be very different. Sophisticated marketing and public relations, not scientific excellence, have helped corporations to preside unchallenged over matters of life and death. It is time, Law argues, for us to take responsibility for our health, not as passive consumers of pharmaceutical medicine, but as informed citizens.

Plumb's Veterinary Drug Handbook CRC Press

Covering the full range of nursing interventions, Nursing Interventions Classification (NIC), 6th Edition provides a research-based clinical tool to help in selecting appropriate interventions. It standardizes and defines the knowledge base for nursing practice while effectively communicating the nature of nursing. More than 550 nursing interventions are provided — including 23 NEW labels. NEW! 133 revised interventions are provided for 49 specialties, including five new specialty core interventions. NEW! Updated list of estimated time and educational level has been expanded to cover every intervention included in the text.

Our Daily Meds John Wiley & Sons

“ The stories are skillfully told and entirely entertaining . . . An expert, mostly feel-good book about modern medicine ” from the award-winning author (Kirkus Reviews, starred review). Behind every landmark drug is a story. It could be an oddball researcher ' s genius insight, a catalyzing moment in geopolitical history, a new breakthrough technology, or an unexpected but welcome side effect discovered during clinical trials. Piece together these stories, as Thomas Hager does in this remarkable, century-spanning history, and you can trace the evolution of our culture and the practice of medicine. Beginning with opium, the “ joy plant, ” which has been used for 10,000 years, Hager tells a captivating story of medicine. His subjects include the largely forgotten female pioneer who introduced smallpox inoculation to Britain, the infamous knockout drops, the first antibiotic, which saved countless lives, the first antipsychotic, which helped empty public mental

hospitals, Viagra, statins, and the new frontier of monoclonal antibodies. This is a deep, wide-ranging, and wildly entertaining book. “ [An] absorbing new book. ” —The New York Times Book Review “ [A] well-written and engaging chronicle. ” —The Wall Street Journal “ Lucidly informative and compulsively readable. ” —Publishers Weekly “ Entertaining [and] insightful. ” —Booklist “ Well-written, well-researched and fascinating to read Ten Drugs provides an insightful look at how drugs have shaped modern medical practices. Towards the end of the book Hager writes that he ‘ came away surprised by some of the things he had learned. ’ I had the very same reaction. ” —Penny Le Couteur, coauthor of Napoleon ' s Buttons: How 17 Molecules Changed History The Pill Book Guide to Medication for Your Dog and Cat Elsevier Health Sciences #1 NEW YORK TIMES BESTSELLER More than ONE MILLION copies sold A TODAY Show Read with Jenna Book Club Pick A New York Times Notable Book, and Chosen by Oprah Daily, Time, NPR, The Washington Post and Barack Obama as a Best Book of the Year “ Wise and wildly entertaining . . . permeated with light, wit, youth. ” —The New York Times Book Review “ A classic that we will read for years to come. ” —Jenna Bush Hager, Read with Jenna book club “ A real joyride . . . elegantly constructed and compulsively readable. ” — NPR The bestselling author of A Gentleman in Moscow and Rules of Civility and master of absorbing, sophisticated fiction returns with a stylish and propulsive novel set in 1950s America In June, 1954, eighteen-year-old Emmett Watson is driven home to Nebraska by the warden of the juvenile work farm where he has just served fifteen months for involuntary manslaughter. His mother long gone, his father recently deceased, and the family farm foreclosed upon by the bank, Emmett's intention is to pick up his eight-year-old brother, Billy, and head to California where they can start their lives anew. But when the warden drives away, Emmett discovers that two friends from the work farm have hidden themselves in the trunk of the warden's car. Together, they have hatched an altogether different plan for Emmett's future, one that will take them all on a fateful journey in the opposite direction—to the City of New York. Spanning just ten days and told from multiple points of view, Towles's third novel will satisfy fans of his multi-layered literary styling while providing them an array of new and richly imagined settings, characters, and themes.

The Truth About the Drug Companies Macmillan

The fundamental guide to the most effective treatments for Parkinson's Disease, from a Mayo Clinic doctor with thirty years of clinical and research experience. In this second edition follow-up to the extremely successful first edition, Dr. Ahlskog draws on thirty years of clinical experience to present the definitive guide to dealing with all aspects of Parkinson's Disease, from treatment options and side effects to the impact of the disease on caregivers and family. Dr. Ahlskog's goal is to educate patients so that they can better team up with their doctors to do battle with the disease, streamlining the decision-making process and enhancing their treatment. To do this, Dr. Ahlskog offers a gold mine of information, distilled from his years of experience treating people with Parkinson's at the Mayo Clinic. In addition to providing a comprehensive account of Parkinson's medications, this book also examines additional aspects of treatment, such as the role of nutrition, exercise, and physical therapy. Although many commendable texts have been written on the subject of Parkinson's Disease, their discussions of treatment have not been in depth. Dr. Ahlskog sifts through aspects of the disease in order to give the reader a comprehensive sense of Parkinson's and the best available treatment options. With a broader understanding of the disease and the available options, patients are able to make more informed choices, and doctors are able to provide more tailored care. This book delivers hopeful, helpful, and extensive information to all parties concerned: patients, caregivers, and doctors. The ultimate guide to symptoms and treatment, this thoroughly updated second edition is the first place patients should turn for reliable, easy-to-grasp information on Parkinson's Disease.

The Medicine Book Algonquin Books

The global popularity of herbal supplements and the promise they hold in treating various disease states has caused an unprecedented interest in understanding the molecular basis of the biological activity of traditional remedies. Herbal Medicine: Biomolecular and Clinical Aspects focuses on presenting current scientific evidence of biomolecular of Blood Pressure Down Houghton Mifflin Harcourt
Too many Americans are taking too many drugs -- and it's costing us our health, happiness, and lives. Prescription drug use in America has increased tenfold in the past 50 years, and over-the-counter drug use has risen just as dramatically. In addition to the dozens of medications we take to treat serious illnesses, we take drugs to help us sleep, to keep us awake, to keep our noses from running, our backs from aching, and our minds from racing. Name a

symptom, there's a pill to suppress it. Modern drugs can be miraculously life-saving, and many illnesses demand their use. But what happens when our reliance on powerful pharmaceuticals blinds us to their risks? Painful side effects and dependency are common, and adverse drug reactions are America's fourth leading cause of death. In *Mind over Meds*, bestselling author Dr. Andrew Weil alerts readers to the problem of overmedication, and outlines when medicine is necessary, and when it is not. Dr. Weil examines how we came to be so drastically overmedicated, presents science that proves drugs aren't always the best option, and provides reliable integrative medicine approaches to treating common ailments like high blood pressure, allergies, depression, and even the common cold. With case histories, healthy alternative treatments, and input from other leading physicians, *Mind over Meds* is the go-to resource for anyone who is sick and tired of being sick and tired.

Side Effects Penguin

For the nearly 78 million Americans with hypertension, a safe, effective lifestyle plan—incorporating the DASH diet principles and much more—for lowering blood pressure naturally If you have high blood pressure, you're not alone: nearly a third of adult Americans have been diagnosed with hypertension, and another quarter are well on their way. Yet a whopping 56 percent of diagnosed patients do not have it under control. The good news? Hypertension is easily treatable (and preventable), and you can take action today to bring your blood pressure down in just four weeks—without the potential dangers and side effects of prescription medications. In *Blood Pressure Down*, Janet Bond Brill distills what she's learned over decades of helping her patients lower their blood pressure into a ten-step lifestyle plan that's manageable for anyone. You'll:

- harness the power of blood pressure power foods like bananas, spinach, and yogurt
- start a simple regimen of exercise and stress reduction
- stay on track with checklists, meal plans, and more than fifty simple recipes

Easy, effective, safe—and delicious—*Blood Pressure Down* is the encouraging resource that empowers you, or your loved ones, to lower your blood pressure and live a longer, heart-healthy life. The Giver Harvard University Press

A NEW YORK TIMES BESTSELLER New York Times 100 Notable Books of 2019 New York Public Library Best Books of 2019 Kirkus Reviews Best Health and Science Books of 2019 Science Friday Best Books of 2019 New postscript by the author From an award-winning journalist, an explosive narrative investigation of the generic drug boom that reveals fraud and life-threatening dangers on a global scale—*The Jungle for pharmaceuticals* Many have hailed the widespread use of generic drugs as one of the most important public-health developments of the twenty-first century. Today, almost 90 percent of our pharmaceutical market is comprised of generics, the majority of which are manufactured overseas. We have been reassured by our doctors, our pharmacists and our regulators that generic drugs are identical to their brand-name counterparts, just less expensive. But is this really true? Katherine Eban's *Bottle of Lies* exposes the deceit behind generic-drug manufacturing—and the attendant risks for global health. Drawing on exclusive accounts from whistleblowers and regulators, as well as thousands of pages of confidential FDA documents, Eban reveals an industry where fraud is rampant, companies routinely falsify data, and executives circumvent almost every principle of safe manufacturing to minimize cost and maximize profit, confident in their ability to fool inspectors. Meanwhile, patients unwittingly consume medicine with unpredictable and dangerous effects. The story of generic drugs is truly global. It connects middle America to China, India, sub-Saharan Africa and Brazil, and represents the ultimate litmus test of globalization: what are the risks of moving drug manufacturing offshore, and are they worth the savings? A decade-long investigation with international sweep, high-stakes brinkmanship and big money at its core, *Bottle of Lies* reveals how the world's greatest public-health innovation has become one of its most astonishing swindles.

The Power of When Little, Brown

One of America's top doctors reveals how AI will empower physicians and revolutionize patient care Medicine has become inhuman, to disastrous effect. The doctor-patient relationship—the heart of medicine—is broken: doctors are too distracted and overwhelmed to truly connect with their patients, and medical errors and misdiagnoses abound. In *Deep Medicine*, leading physician Eric Topol reveals how artificial intelligence can help. AI has the potential to transform everything doctors do, from notetaking and medical scans to diagnosis and treatment, greatly cutting down the cost of medicine and reducing human mortality. By freeing physicians from the tasks that interfere with human connection, AI will create space for the real healing that takes place between a doctor who can listen and a patient who needs to be heard. Innovative, provocative, and hopeful, *Deep Medicine* shows us how the awesome power of AI can make medicine better, for all the humans involved.

THE ESSENTIAL WORK IN TRAVEL MEDICINE -- NOW COMPLETELY UPDATED FOR 2018

As unprecedented numbers of travelers cross international borders each day, the need for up-to-date, practical information about the health challenges posed by travel has never been greater. For both international travelers and the health professionals who care for them, the CDC Yellow Book 2018: Health Information for International Travel is the definitive guide to staying safe and healthy anywhere in the world. The fully revised and updated 2018 edition codifies the U.S. government's most current health guidelines and information for international travelers, including pretravel vaccine recommendations, destination-specific health advice, and easy-to-reference maps, tables, and charts. The 2018 Yellow Book also addresses the needs

of specific types of travelers, with dedicated sections on:

- Precautions for pregnant travelers, immunocompromised travelers, and travelers with disabilities
- Special considerations for newly arrived adoptees, immigrants, and refugees
- Practical tips for last-minute or resource-limited travelers
- Advice for air crews, humanitarian workers, missionaries, and others who provide care and support overseas

Authored by a team of the world's most esteemed travel medicine experts, the Yellow Book is an essential resource for travelers -- and the clinicians overseeing their care -- at home and abroad.

Taking Medicine Our Daily Meds

Reveals how pharmaceutical companies have used slick marketing techniques to promote dangerous medications to American physicians and consumers, examining how the industry has transformed the practice of medicine and damaged American life.

Versions of this book can be purchased with a 12-credit CME online quiz. Get the information you need at a glance: Off-label uses Dosages and generic availability Mechanisms of action Cost information Bottom-line impressions This revised edition features: 148 fact sheets, 17 of which are brand new 30 updated reference tables, 8 of which are brand new New sections on medications for treating restless legs and using somatic therapies like bright light therapy, electroconvulsive therapy (ECT), transcranial magnetic stimulation (TMS), and vagus nerve stimulation (VNS) Plus, 9 new treatment algorithms—these flowcharts offer easy-to-follow guidelines for treating adult ADHD, depression, psychosis, anxiety, dementia, insomnia, bipolar mania, alcohol use disorder, and opioid use disorder

Deadly Medicines and Organised Crime Abrams

Drug overdose, driven largely by overdose related to the use of opioids, is now the leading cause of unintentional injury death in the United States. The ongoing opioid crisis lies at the intersection of two public health challenges: reducing the burden of suffering from pain and containing the rising toll of the harms that can arise from the use of opioid medications. Chronic pain and opioid use disorder both represent complex human conditions affecting millions of Americans and causing untold disability and loss of function. In the context of the growing opioid problem, the U.S. Food and Drug Administration (FDA) launched an Opioids Action Plan in early 2016. As part of this plan, the FDA asked the National Academies of Sciences, Engineering, and Medicine to convene a committee to update the state of the science on pain research, care, and education and to identify actions the FDA and others can take to respond to the opioid epidemic, with a particular focus on informing FDA's development of a formal method for incorporating individual and societal considerations into its risk-benefit framework for opioid approval and monitoring.
