WINNER OF THE ROYAL SOCIETY SCIENCE BOOK PRIZE An instruction manual for life, love, and relationships by a brilliant young scientist whose Asperger's syndrome allows her--and us--to see ourselves in a different way...and to be better at being human Diagnosed with Autism Spectrum Disorder at the age of eight, Camilla Pang struggled to understand the world around her. Desperate for a solution, she asked her mother if there was an instruction manual for humans that she could consult. With no blueprint to life, Pang began to create her own, using the language she understands best: science. That lifelong project eventually resulted in *An Outsider's Guide to Humans*, an original and incisive exploration of human nature and the strangeness of social norms, written from the outside looking in--which is helpful to even the most neurotypical thinker. Camilla Pang uses a set of scientific principles to examine life's everyday interactions: - How machine learning can help us sift through data and make more rational decisions - How proteins form strong bonds, and what they teach us about embracing individual differences to form diverse groups - Why understanding thermodynamics is the key to seeking balance over seeking perfection - How prisms refracting light can keep us from

getting overwhelmed by our fears and anxieties, breaking them into manageable and separate "wavelengths" Pang's unique perspective of the world tells us so much about ourselves--who we are and why we do the things we do--and is a fascinating guide to living a happier and more connected life.

A tiny American town's plans for radical self-government overlooked one hairy detail: no one told the bears. Once upon a time, a group of libertarians got together and hatched the Free Town Project, a plan to take over an American town and completely eliminate its government. In 2004, they set their sights on Grafton, NH, a barely populated settlement with one paved road. When they descended on Grafton, public funding for pretty much everything shrank: the fire department, the library, the schoolhouse. State and federal laws became meek suggestions, scarcely heard in the town's thick wilderness. The anything-goes atmosphere soon caught the attention of Grafton's neighbors: the bears. Freedom-loving citizens ignored hunting laws and regulations on food disposal. They built a tent city in an effort to get off the grid. The bears smelled food and opportunity. *A Libertarian Walks Into a Bear* is the sometimes funny, sometimes terrifying tale of what happens when a

government disappears into the woods. Complete with gunplay, adventure, and backstabbing politicians, this is the ultimate story of a quintessential American experiment -- to live free or die, perhaps from a bear.
