lambrettaupgrades - Engine strip/rebuild  
Engine tuning is the adjustment or modification of the internal combustion engine or Engine Control Unit to yield optimal performance and increase the engine's power output, economy, or durability. These goals may be mutually exclusive; an engine may be de-tuned with respect to output power in exchange for better economy or longer engine life due to lessened stress on engine components. Tuning can include a wide variety of adjustments and modifications, such as the routine adjustment of the carb

Never Rebuild Your Car ' s Engine, Unless - YouTube

A rebuilt car engine is an engine that has been overhauled using both new and used parts that have been approved by the manufacturer.

Technically, a rebuilt engine means you will get an engine with new pistons, rings, bearings, gaskets, seals, oil pump and timing belt.

Overhaul Engine

Overhaul - definition of overhaul by The Free Dictionary

Engine rebuild kit components may greatly vary depending on the type of kit, and the brand of the kit you choose to buy. Most of the time, your engine might need a rebuild if the engine bearings are worn out if the piston and/or piston rings are poorly seated. Some may also opt for high-end engine rebuild kits to upgrade their engine. Classic Engine Workshop – Engine rebuild and restoration ...

An Engine overhaul is removing, stripping, checkup, cleaning and repairing your engine. This is step for a mechanic to identify the problem with the engine in the easiest way. Parts that are defective are replaced.

---

Once this is done, it is put back together and placed back inside your vehicle.
