With gas prices rising (always), alternative fuels look like an answer.

Hybrids sound good, but what about the batteries? And fuel cells still seem to be pie-in-the-sky. Which leaves us with good old diesel.

This book shows how to get the most out of the diesel engine, at a

time when its fuel efficiency is almost as important as its massive torque. Although most diesel truck owners probably aren't planning to break any land speed records, advances in diesel technology, such as ultra-low-sulfur fuel, high-pressure common-rail fuel injection, electronic fuel management and variable geometry turbocharging, are bringing diesel engines into the performance arena. And this book is the ideal guide for making your diesel engine perform--adapting intake and exhaust, torque converters, engine electronics, turbochargers, and much more.

Is foreign direct investment good for development? Moving beyond the findings of his previous book *Does Foreign Direct Investment Promote Development?* (CGD and IIE, 2005), Theodore H. Moran presents surprisingly good--and startlingly bad--news. The good news highlights how foreign direct investment can make a contribution to development significantly more powerful and more varied than conventional measurements indicate. The bad news reveals that foreign direct investment can also distort host economies and politics with consequences substantially more adverse than critics and cynics have imagined. This book rigorously examines the principal controversies and debates about FDI in manufacturing and assembly, extractive industries, and infrastructure, in light of new evidence and analysis. Written in engaging prose, it identifies how developed and developing countries, multilateral lending agencies, and civil society can work in concert to harness foreign direct investment to promote the growth and welfare of developing countries.

From the ashes, comes the fire. In the winter of 1990, as the Soviet empire crumbled, a small Russian special forces team entered the dense forests of West Germany and buried an insurance policy. In present day Iran, the United States' most valuable agent uncovers a devastating secret brewing deep beneath the country's mountainous terrain: in mere months, a faction of the regime's Revolutionary Guards will successfully assemble a nuclear bomb. As the full might of the American Intelligence Community is mobilized to stop it, the CIA's new director must confront a web of threats both at home and abroad, from a resentful White House chieftain, to a cunning Israeli spymaster, and the fearsome commander of the Iranian Quds Force. In Moscow--after an oil trader with ties to the Kremlin is found burned alive in his Geneva home--an aide to Russia's adored and despotic president is caught between opposing powers. At one

side is an eccentric billionaire with lofty dreams of reorienting Russia toward the West, and at the other is the autocratic strongman whose ardent quest for resurgence has brought Russia into a risky, open confrontation with NATO. In Lebanon, the Syrian civil war that raged for years across the border has reached its bloody climax. Yet in its wake, a new menace comes crawling from the shadows to feast on the remains. A brilliant CIA officer in Beirut, working desperately to penetrate an exhausted Hezbollah, is first to recognize the danger. As she begins calling on deaf ears, it is only a matter of time until the drums of war start beating again in the Middle East--and now with the greatest terrorist the world has ever known leading the charge. Warping the line between illusion and reality, amid a labyrinth of characters, plots and counter-plots that span the globe--from the halls of the Kremlin and the suburbs of northern Virginia, to the slums of Beirut and the back alleys of Tehran--comes a story of intrigue and betrayal, life and death; setting a collision course toward a firestorm that will consume thousands and blind a superpower.
