When we reflect upon the history of Italian coachbuilding and design, it is impossible to ignore the De Tomaso / Giugiaro Mangusta. It was stunning from every angle; in both art and engineering, it challenged and defined every aspect of motor car design in the mid-1960s while solving the problems associated with midengined design with beauty, grace, and authority. By the dictates of its creator, the Mangusta would be a race car for the street, its chassis based on a contemporary competition car. By the hand of one of the greatest automotive designers in Italy, it would be wide, low, sleek, and of perfect line. Ex-GM Designer Dick Ruzzin knows this well, as did others whose lives were devoted to automotive architecture. The Detroit doyens of design, William L. Mitchell at GM and Gene Bordinat at Ford, realized immediately that the Mangusta was one of the most advanced and beautiful cars in the world. Both ordered a specially tailored Mangusta for their personal use, and Mitchell had his equipped with a Chevy V8. Ruzzin has owned the ex-Mitchell Mangusta for the last forty-seven years. He spent years in Turin and interviewed many of those who still remembered how the Mangusta came to be created. Writing with passion, experience, and knowledge, Ruzzin has expertly authored the only book specifically about the design of the Mangusta. Pete Vack, Editor and Publisher, VeloceToday.com, LLC ----- Reading about Dick Ruzzin's Mangusta reminds me of two of the most unforgettable characters I ever met. They are, of course, Alejandro de Tomaso and William L. Mitchell. Once known as Europe's most profligate creator of exotic sports and racing prototypes, Argentinean emigre de Tomaso had a phase of fondness for backbone-framed cars that gave birth to the Mangusta, magnificently styled by the young Giorgetto Giugiaro. The mercurial Alejandro finally made good as a car manufacturer with a little help from the Italian government. A car enthusiast from his bald dome to his Bond Street shoes, Bill Mitchell arranged for GM Styling to buy the latest sports cars to help him persuade GM's often hidebound management that more exciting cars might be good for business. His Chevy-engined Mangusta was a perfect example. Ironically its successor in de Tomaso oeuvre was the Pantera, launched by Ford like an arrow at the heart of GM. Now Dick Ruzzin brings his own enthusiasm for great automobiles to this presentation of an esoteric example from the golden age of Italian sports cars, deeply informed on all aspects of the Mangusta as only a passionate owner can be. F1 Mavericks is the story of the grandest, most influential, and most fondly remembered era in Formula 1 racing as seen through the lens of master motorsports photographer, Pete Biro. The period from 1960 to 1982 saw the greatest technological changes in the history of Formula 1 racing: the transition from front engines to rear engines, narrow-treaded tires, massive racing slicks, zero downforce, and neck-wrenching ground effects—and, of course, a staggering increase in performance and reduction in lap times. In short, the period saw the creation of the modern Formula 1 car. This is also the time when legendary names who defined F1 were out in full force: Jim Clark, Jack Brabham, Dan Gurney, Sir Jackie Stewart, Graham Hill, Niki Lauda, James Hunt, Bruce McLaren, Jody Scheckter. We'll see and meet all of them. But F1 Mavericks also focuses on the designers and engineers behind the cars—men like Colin Chapman, Sir Patrick Head, Maurice Philippe, Franco Rochhi, Gordon Murray, and many others. We'll hear directly from many of them, including a foreword from 1978 F1 World Champion, Mario Andretti. Every chapter is a photographic account of key races throughout the period, supplemented with sidebars featuring key designers and technologies, like wings, ground effects, slick tires, turbochargers, and the Brabham "fan" suction car. F1 Mavericks is an international story, and includes loads of information on designs from Japan (Honda), Britain (McLaren, Tyrrell, Cooper, BRM) Italy (Ferrari, Maserati, Alfa Romeo), France (Matra, Ligier, Renault), Germany (Porsche, BMW) and the United States (Eagle, Shadow, Penske, Parnelli). Strap yourself in for the story of the greatest era in Formula 1 racing—it's all here in F1 Mavericks.

Each subsequent model continued to strengthen that position. But how do you upgrade America's favorite sports car? Make it a special edition! Special edition Corvettes are the tip of the spear when it comes to the American auto manufacturers special models. Luminous cars such as the 1967 L88 convertible, 1969 aluminum block ZL1, and 2015 Z06 #001 have all commanded a million dollars or more. Modern dealer-tuned cars from Lingenfelter, Calloway, and Hennessey have carried the tradition of making a great Corvette even better.

Extremely low mileage on 1978 Pace Cars indicate that people have thought of these cars as investments for nearly 40 years. Keith Cornett of Corvetteblogger.com compiles a murderer's row of special-edition Corvettes in this first-ever compilation on the subject. This book is an encyclopedia of information, as you will learn about some of the rarest Corvettes on the planet. It will serve as a guide if you're looking to add one of these special machines to your collection. Everything you've ever wanted to learn about collectible Corvettes is in Corvette Special Editions.
