The New Press Top-drawer scenario builders map a unique array of 'big picture' global outcomes shaped by energy prices, economic growth, and global harmony. Better still, they give the reader tools to build her own scenarios. An essential reference for experts concerned with geopolitical and geoeconomic futures. -- Gary Clyde Hufbauer, Reginald Jones Senior Fellow, Peterson Institute for International Economics
The way the authors have integrated the International Futures model into scenario analysis is very instructive and amounts to a useful methodological contribution to the literature on scenario analysis. As an energy economist, I also appreciate that the book adds to the usual energy market forecasting exercises that take economic growth as

exogenous to the energy markets and ignore political factors. -- Peter Hartley, Mitchell Professor of Economics and Rice Scholar in Energy Studies at the Baker Institute, Rice University Evan Hillebrand and Stacy Closson have written an interesting and original book in which they analyze several different scenarios for economic growth, energy prices, and international conflict over the next forty years in an engaging and accessible style. I recommend this book to anyone who wishes to understand the range of possible futures. -- James Morrow, Professor of Political Science, University of Michigan
