BUSINESS BOOK

PRIZE 2019 | The family with humble nineteenth century roots was doing the same in India. In 1822, a boy was born in a priestly household in Gujarat's Navsari village. Young Nusserwanji knew early on that his destiny lay beyond his village and decided to head for

Bombay to start a business - the first in his family to do so. He had neither higher education nor knowledge of business matters, just a burning passion to carve a path of his own. What Nusserwanji started as a cotton trading venture, his son Jamsetji, born in the same year as Rockefeller, grew into a multifaceted business, turning around sick textile mills, setting up an iron and steel company, envisioning a cutting-edge institute of higher learning, building a world-class hotel, and earning himself the title of the 'Bhishma Pitamah of Indian Industry'. Stewarded ably over the decades by

Jamsetji's sons Dorabji and Ratanji, the charismatic and larger-than-life JRD, and thereafter the more business-like Ratan, the Tata group today is a 110-billion-dollar empire. The Tatas is their story. But it is more than just a history of the industrial house; it is an inspiring account of India in the making. It chronicles how each generation of the family invested not only in the expansion of its own business interests but also in nation building. Few know, for instance, that the first hydel power project in the world was conceived of and built by the Tatas. Nor that some radical labour

concepts such as eight-hour work shifts were born in India, at the Tata mill in Nagpur. The Tata Cancer Research Centre, the Indian Institute of Science, the Tata Institute of Fundamental Research, as also the national carrier Air India - the family has a long, rich and unrivalled legacy. The Tatas is a tribute to a line of visionaries who have a special place in the hearts and minds of ordinary Indians. Written by seasoned journalist Girish Kuber, this is also the only book that tells the complete Tata story spanning almost two hundred years.

[Audi A6 \(C5\) Service Manual 1998, 1999, 2000, 2001, 2002, 2003 2004](#) Haynes Publications
This open access book was prepared as a Final Publication of the COST Action IC1304
“Autonomous Control for a Reliable Internet of Services (ACROSS)”. The book contains 14 chapters and constitutes a show-case of the main outcome of the

Action in line with its scientific goals. It will serve as a valuable reference for undergraduate and post-graduate students, educators, faculty members, researchers, engineers, and research strategists working in this field. The explosive growth of the Internet has fundamentally changed the global society. The emergence of concepts like SOA, SaaS, PaaS, IaaS, NaaS, and Cloud Computing in general has catalyzed the migration from the information-oriented Internet into an Internet of Services (IoS). This has opened up virtually unbounded possibilities for the creation of new and innovative services that facilitate business processes and improve the quality of life. However, this also calls for new approaches to ensuring the quality and reliability of these services. The objective of this book is, by applying a systematic approach, to assess the state-of-the-art and consolidate the main research results achieved in this area.
