Life of Pi is a masterful and utterly original novel that is at once the story of a young castaway who faces immeasurable hardships on the high seas, and a meditation on religion, faith, art and life that is as witty as it is profound. Using the threads of all of our best stories, Yann Martel has woven a glorious spiritual adventure that makes us question what it means to be alive, and to believe.

Ever since its introduction in 1955, Chevrolet's small-block V-8 has defined performance. It was the first lightweight, overhead-valve V-8 engine ever available to the masses at an affordable price and, better yet, had tremendous untapped performance potential, making it the performance engine of choice to this day. What sets the Chevy small-block further apart is the fact that a builder does not have to spend big money to get big horsepower numbers. Using multiple examples of engine builds and case studies, The Chevrolet Small-Block Bible provides the reader with the information needed to build anything for a mild street engine for use in a custom or daily driver to a cost-is-no-object dream build. Includes parts selection, blue printing, basic machine work, and more.

Found in the small town of Visoko, located about thirty kilometres northwest from Sarajevo, the hill is the tallest point in a landscape of tremendous historical importance for the country. The region has been occupied from prehistoric times. Rich in natural resources, the area was extensively quarried for metal ore and stone over many periods. In the medieval period (twelfth to fifteenth centuries CE), this area became the centre of the Kingdom of Bosnia. It was here that the first king of Bosnia, Tvrtko I, was crowned in 1377 CE. During this time the large hill became known as Visocica, and a fortress was constructed upon its summit. From 1463, the Ottomans controlled them, and under their rule, many towns were founded, including Visoko which experienced a surge of economic development and cultural activity and became one of the richest towns in Bosnia. The town was of key importance in Bosnia's modern history, serving as a stronghold for Bosniak forces during conflict in the 1990s. However, it is not for these reasons that the hill of Visocica is so well-known today. Instead, the focus of attention has been on the controversial claim that it is the largest and oldest man-made pyramid to be found, not only in Europe, but the world. Since 2005, the Bosnian-born American businessman and self-proclaimed archaeologist Semir Osmanagich has promoted a controversial narrative of how-and why-the hill exists. He maintains that Visocica is not a natural feature, but was made by an ancient Bosniak civilization during the last Ice Age, between ten and twelve thousand years ago. Its substructure is allegedly filled with an intricate network of passageways that connect it to other structures in the surrounding landscape built during the same time. If true, the scale of these "pyramids" would have required the largest construction works to have ever been performed in prehistory. But this theory has been fiercely criticized by archaeologists, geologists, pyramid experts, journalists, and countless other academics and non-academics. Many scientific specialists and laypersons have gone to Visoko to see the site with their own eyes, and reported that there is little evidence to suggest the validity of Semir's claims. Furthermore, some of the claims made of the pyramid are borderline science fiction, featuring everything from aliens to the mythical civilization of Atlantis. Through the use of popular and journalistic media, rather than academic channels, Mr. Osmanagich has garnered the attention of many hundreds of volunteers that come to Visoko each year. Conflicting accounts testify to what takes place. Is legitimate archaeology being carried out, or the creation of a money-making theme park for tourists? Can the Bosnian pyramid be considered genuine, or is this but one example of widespread and pseudoscientific "pyramid-mania" that occurs across the globe? Why do people believe in the fantastic stories woven around the Pyramid of the Sun, and why is the academic community so critical of this phenomenon? And who, exactly, is Semir Osmanagich, without whom this story would not exist? The Ancient Bosnian Pyramids: The History and Mystery Over the Controversial Pyramids in Bosnia and Herzegovina chronicles the theories and debates over the landmarks. Along with pictures of important people, places, and events, you will learn about the Bosnian pyramids like never before.
