This book covers anaphora resolution for the English language from a linguistic and computational point of view. First, a definition of anaphors that applies to linguistics as well as information technology is given. On this foundation, all types of anaphors and their characteristics for English are outlined. To examine how frequent each type of anaphor is, a corpus of different hypertexts has been established and analysed with regard to

anaphors. The most frequent type are non-finite clause anaphors - a type which has never been investigated so far. Therefore, the potential of non-finite clause anaphors are further explored with respect to anaphora resolution. After presenting the fundamentals of computational anaphora resolution and its application in text retrieval, rules for resolving non-finite clause anaphors are established. Therefore, this book shows that a truly interdisciplinary approach can achieve results which would not have been possible otherwise.

Nathaniel Pike, a headstrong billionaire, is purchasing a piece of federal land in New Hampshire's White Mountains and turning it into a huge, inaccessible parking lot. Orbiting Pike and his aspirations is a cast of perfectly flawed eccentrics: Marlene, who is shy and vulnerable but also a budding exhibitionist; Stuart, Pike's assistant, who is Marlene's husband and a failed writer; and Heath, who films Marlene's

public nudity and turns her into an Internet star. In this grand tale of the folly of the modern world, Mike Heppner skewers the extravagance of wealth, and the class that grows up around that wealth, even as he casts a humane look at the people involved.
