black and white. Mitsubishi's 4G63t engine is among the most powerful engines ever in the sport-compact world. It's not uncommon to find one of these four-cylinder, iron-block, aluminum-headed, 2-liter turbocharged monsters making more than 1,000 horsepower with the right modifications and tuning - well above the 200-300 hp produced in the factory-made engines. Bolted into such cars as the Mitsubishi Lancer Evolution, Eclipse, and Galant, and the Eagle Talon and Plymouth

Laser, the 4G63t has more than a cult following among sport-compact enthusiasts, who know and respect this engine's immense performance potential at the track or on the street. Up until now, in-depth performance information on the 4G63t has been hard to find. For this book, author Robert Bowen went straight to the source, Robert Garcia of Road/Race Engineering in Santa Fe Springs, California. RRE is the most well-known and respected Mitsubishi turbo performance shop in

the United States, and Garcia is its in-house engine builder. Mitsubishi enthusiasts will benefit from Garcia's expertise and be able to build better, stronger engines than ever before. "How to Build Max-Performance Mitsubishi 4G63t Engines" covers every system and component of the engine, including the turbocharger system and engine management. More than just a collection of tips and tricks, this book includes a complete history of the engine and its evolution, an identification guide, and

advice for choosing engine components and other parts. Profiles of successful built-up engines show the reader examples of what works, and the book includes helpful guidance for choosing your own engine building path.

Dialogue Analysis IX: Dialogue in Literature and the Media, Part 2: Media Veloce Publishing Ltd Runways and Racers concentrates on the short transitional period, 1952-1954, for sports car racing in America following the ban on public road racing in many of the States. The ban left the rapidly expanding Sports Car Club of America with a problem: where to hold races. At precisely the same time, Curtis LeMay, head of Strategic Air Command, was having problems obtaining funds from Congress to improve conditions on the many air bases located around the country. The

solution was a marriage of convenience, whereby the SCCA was allowed access to active SAC air bases to hold its race programmes. In return, the SAC base would receive the net profits from the event, which would be put into the Airmen's Living Improvement Fund. As a result of some initial financial success for the SAC bases, the scheme was also adopted by non-SAC bases together with regional clubs, with the same agreement in place. Complaints from airmen alerted Congressman Errett Scrivner to potential irregularities, and he ordered an audit to be conducted to

ascertain precisely what it was costing the air bases to host the races. His findings led to the cessation of the races, ordered by Congress. The product of a long period of extensive research by the author, this book gives a fascinating insight into this two-year period, complemented by over 150 period pictures, many previously unpublished.
