In early childhood we collect the vast part of our relevant sound memory by imitating the sounds with our vocal cords. However, our brain doesn't stop there. At a later age we can still learn a new foreign language. Three new method's to acquire

Absolute Pitch and Relative Pitch, supported by software feedback, are presented in this book. The first method, the Singing Funnel method, lets you acquire Absolute Pitch like a foreign language. The second method, the Octave Anchor Pithes method helps you to orientate yourself in the pitch realm. The last method, the Interval Overtone method, improves your interval hearing.
