**Blue Book of Gun Values** Gun Digest  
The Classic Reference - Bigger and Better  
than Ever One of the most respected  
reloading texts of all time, *Reloading for  
Shotgunners* is now bigger, more  
comprehensive and more profusely  
illustrated than ever! This all-new fifth  
edition includes exhaustive data for lead  
and non-toxic shot - and it goes well

beyond the ho-hum 2-3/4" 12-gauge data  
contained in other books. From .410 bored  
to 10-gauge magnum, from 2" hulls to the  
mammoth 3-1/2", if it can be fired in a  
shotgun, it's in this book! Rick Sapp, co-  
author of *The Gun Digest Book of Trap &  
Skeet*, has outdone himself in creating this  
masterful compilation of shotgun reloading  
data. Whether you're a novice shotgunner or  
a seasoned reloader, you can't afford to be  
without this ground-breaking fifth edition of  
*Reloading for Shotgunners*.

*LDS Preparedness Manual* Gun  
Digest Books  
*Stock Fitter's Bible* was  
written for one purpose, to  
help clay target shooters

improve their scores. As you  
read you will understand why  
the book has received so many  
rave reviews. Coaches and  
trainers teach specific gun  
mounts, stances and body  
postures (shooting forms). To  
shoot up to your full  
potential, you must use a  
correct form. To do that, your  
gun must have stock dimensions  
that allow someone of your  
individual size and shape to  
use the form. If your gun  
doesn't fit you, a correct form  
cannot be used - it's that  
simple. To help you shoot  
better, the book explains step

---

by step, how your gun can be made to fit you. When it fits, you can expect smoother, more accurate swings, higher, more consistent scores and reduced felt recoil. It also explains how to see targets better, how to effectively visualize targets before calling for them, ways to reduce stress and to postpone fatigue. Almost anyone can improve their shooting. Stock Fitter's Bible explains how to do it.

The purpose of this book is to give ChristaEUR"centered believers an objective look at how a community of believers has the ability to not just survive in the roughaEUR"andaEUR"tumble times that a postaEUR"financialaEUR"collapse world will inevitably lapse into, but actually thrive. ChristaEUR"centered leadership is the key. Honoring God the Father and His Son Yeshua in all aspects is something that the author strove to hear God's leading on, from start to finish. Over the last twenty years, many books, articles, and movies have been written and filmed about the postapocalyptic world, both fiction and non fiction howaEUR"to, centering on what to do and how to do it. Most, if not nearly all, have focused on a few major topics, with perhaps another one or two side issues. In this book, the author has endeavored to cover as many facets as possible that will come into play as given to him by God's Spirit. Financial collapse, firearms, selfaEUR"defense, breakdown of law and order,

cannibalism, barter, invasion by the UN, the setting up of a retreat, basic survival skills, and medical care by amateurs have all been covered in other works, and usually quite well. But, as they say on TV, wait, there's more...much, much more. Also woven into this work are torture, suicide, homosexuality and the subsequent deliverance from it, along with the very real probability of Islamic terrorism. Then we get to, for the most part, the forgotten wild cards: a command structure for the leadership, unparalleled cataclysmic geological upheaval, pandemic outbreak, the setting up of a city of refuge for God's people, and without question, the most neglected yet, far and away, most important deciding factor in all this: the last days' move of God. Mix all these factors together, and there we will find ourselves in uncharted waters.

This timely and hugely practical work provides a score of examples from contemporary and historical scientific presentations to show clearly what makes an oral presentation effective. It considers presentations made to persuade an audience to adopt some course of action (such as funding a proposal) as well as presentations made to communicate information, and it considers these from four perspectives: speech, structure, visual aids, and delivery. It also discusses computer-based projections and slide shows as well as overhead projections. In particular, it looks at ways of organizing graphics and text in projected images and of using layout and design to present the information efficiently and effectively.
