and technical terms that have a limited currency some are carried by accident into the main stream of the language and become known temporarily or permanently, vaguely or precisely, to all ordinarily well-informed members of the modern newspaper-reading public. For the purposes

of a dictionary that is not to be bulky and yet is to give a fuller treatment than is usual in dictionaries of its size to the undoubtedly current words forming the staple of the language, selection among these intruders is a difficult but very necessary task. The most that can be hoped for is that every one conversant with any special vocabulary may consider us, though sadly deficient on his subject, fairly copious on others the meaning of many learned words that have been omitted as having no pretence to general currency may easily be gathered by reference first to the stem, which is often the subject of an article, or to another word of which the stem is clearly the same, and secondly to the suffix. In another class of words and senses the test of currency has led us to diverge in the opposite direction from the practice usual in dictionaries of this size if we give

fewer scientific and technical terms, we admit colloquial, facetious, slang, and vulgar expressions with freedom, merely attaching a cautionary label when a well established usage of this kind is omitted, it is not because we consider it beneath the dignity of lexicography to record it, hundreds of but because, thousands of not being rare and recorded in classic books.
