Heritage under Pressure examines the relationship between the political perspective of the UK

government on 'soft power' and the globalising effect of projects carried out by archaeologists and heritage professionals working in the historic environment. It exemplifies the nature of professional engagement and the role of the profession in working towards a theory of practice based on the integrity of data, the recovery and communication of information, and the application of data in real world situations. Individual papers raise complex and challenging issues, such as commemoration, identity, and political intervention. A further aim of the volume is to illustrate the role of professionals adhering to standards forged in the UK, in the context of world heritage under pressure. Papers also contribute to the emerging agenda developing as a result of the re-orientation of the UK following the Brexit vote, at once emphasising the global aspiration of the UK's professional archaeological body - the Chartered Institute for Archaeologists - in relation to the global reach of UK academic practice. By implication

the volume also addresses the relationship between professional practice and academic endeavour. The volume as a whole contributes to the emerging debate on the authorised heritage discourse and provides an agenda for the future of the profession.

Turkish-Greek relations are marked by a long trajectory of enmity and tension. This book sets out to explore the 'other side' of that history, focusing on initiatives that have promoted contact between the two societies and encouraged rapprochement. Presenting a new critical re-description of Turkish-Greek rapprochement processes over a lengthy time span (1974-2013), Turkish-Greek Relations offers innovative explanations for the emergence of the reconciliation movement. Instead of lineal continuities, the book explores different routes that these efforts for rapprochement have followed, reflected in the divergent visions for a 'Turkish-Greek friendship' pursued by actors as distinct as radical leftists, civil society activists, local government representatives, artists and liberal intellectuals, as well as journalists, politicians and businessmen. Drawing on political discourse theory and social anthropology, this book employs extensive archival research into Turkish and Greek sources, significant numbers of interviews with pioneers of the rapprochement movement, and an original ethnographic study, to examine the competing claims for 'Greek-Turkish friendship'. In doing so, it is possible to assess their successes and failures, prospects and predicaments. A valuable addition to existing literature, this book will be of interest to scholars and researchers of International Relations, Peace and

Reconciliation Studies, and Politics.

Iraqi Kurdistan, the PKK and International Relations Rough Guides
Turkey's candidacy for membership of the European Union has had mixed effects on its public policies. The initial degree of cohesion between EU and Turkish national policies, practices and institutions has varied by the policy field in question, leading to a complex amalgam of fit and misfit between the two actors. Their interaction in different policy areas has had direct influence both on Turkey's accession to the EU and its own national reform process. With accession negotiations stalled and Turkey's relationship with the EU increasingly tenuous, it is vital to take stock of the extent to which Turkey and the EU are aligned in key policy areas. The Europeanization of Turkish Public Policies: A Scorecard is the first comprehensive work focusing on the impact of the EU accession process upon Turkey's public policies between 1999 and 2014. Complementing the authors' earlier volume Europeanization of Turkey: Polity and Politics, it brings together leading specialists to provide key analyses of the impact of Europeanization on specific areas of Turkey's public policy. Each chapter applies a core analytical framework to examine a separate policy field, resulting in a consistent and comprehensive volume on Turkey-EU relations. With its focused structure and extensive coverage, concluding with a scorecard enabling informed assessment of the impact of Europeanization on Turkey's public policy areas, this book provides a one-stop resource for scholars and students alike. A timely and informed assessment of the dynamics and outcome of the Europeanization of an EU candidate country's major public policy areas, this book represents an essential resource for those interested

in EU-Turkey relations, the effects of Europeanization on Turkey, and Turkish politics.

Social Cash Transfer in Turkey Routledge

A keen analysis of the social, political and economic determinants of Turkish politics with an exploration of the different dimensions of the republican model of Turkish citizenship, providing the reader with a comprehensive account of Turkish modernity and democracy. Consisting of a collection of innovative and influential essays by leading scholars, this book gives the reader an historical and sociological understanding of Turkey and adds a new dimension to the ongoing discussion surrounding global citizenship and global identity.

EU, Turkey and Counter-Terrorism BRILL

Amid the tensions and uncertainties that plagued the globe before the Second World War, the Republic of Turkey appeared to many as

a unique and constructive model for how a state was to be reformed and governed in the modern era. For many interwar observers, Turkey was a country that seemed to have radically transformed itself into a nation that was united, strong, and progressive, one that was unburdened by its past. A general consensus held that Turkey's founding president, Mustafa Kemal Atatürk, was the chief architect and engineer of this feat, a belief that placed him among the greatest reforming statesmen in world history. This general perception of Atatürk and his revolutionary rule has largely endured to this day. As a study grounded in largely untapped archival and scholarly sources, *Eternal Dawn* presents a definitive look inside the development and evolution of Atatürk's Turkey. Rather than presenting the country's founding and transformation as an extension of Mustafa Kemal's life and achievements, scholar Ryan Gingeras presents Turkey's early years as the culmination of a variety of social and political forces dating back to the late Ottoman Empire. *Eternal Dawn* presses beyond the reigning mythology that still envelops this period and challenges many of the standing assumptions about the limits, successes, and consequences of the reforms that comprised Mustafa Kemal's revolution. Through a detailed survey of social and political conditions that defined life in the capital as well as Turkey's diverse provinces, Gingeras lays bare many of the harsh realities and bitter legacies incurred as a result of the republic's establishment and transformation. Atatürk's revolution, upon final analysis, destroyed as much as it built, and established precedents that both strengthen and torment the country to this day.

The Holocaust is frequently depicted in isolation by its historians. Some of

them believe that to place it in any kind of comparative context risks diminishing its uniqueness and even detracts from the enormity of the Nazi crime. In reality, such a restricted understanding of "uniqueness" has pulled the Holocaust apart from history and set up barriers to a better understanding of the racial onslaught unleashed within the Third Reich and its conquered territories. Working against the grain of much earlier writing, this innovative new history combines a detailed re-appraisal of the development of the genocide of the Jews, a full consideration of Nazi policies against other population groups, and a comparative analysis of other modern genocides. The Holocaust is portrayed as the culmination of a much wider history of European genocide and ethnic cleansing, from the late nineteenth century onwards. Ultimately, Bloxham shows that an explanation for the Holocaust rooted exclusively in Nazism and anti-Semitism is inadequate when set against one that is both prepared to give due weight to the immediate circumstances of the Second World War in eastern Europe and to situate the Jewish genocide within the broader patterns of human behavior in the late-modern world.

This book addresses the constitutional journey of religious minorities in modern Turkey, specifically the Lausanne minorities, who have been both coded and blacklisted in the official records for decades. It focuses on the non-Muslim citizens who have maintained their lives with confidential codes without knowing that these codes have been instrumentally used for strategic purposes. In spite of such discriminatory practices, they are on the way to a new democratic and civil constitution. It is significant to note that this will be their first constitutional experience in post-republic history. The first book to document the role of religious minorities in constitution making in modern Turkey, it lists recent discussions and findings on this controversial process. One of the important findings of this study is that government-led initiatives endeavouring to be inclusive have had the opposite effect.

Turkish-Greek Relations Reshaping of Cyprus: A Two-State Solution

This book provides an interpretive and critical analysis of Kurdish identity, nationalism and national movement in Turkey since the 1960s. By raising issues and questions relating to Kurdish political identity and highlighting the ideological specificity, diversity and the transformation of Kurdish nationalism, it develops a new empirical dimension to the study of the Kurds in Turkey. Cengiz Gunes applies an innovative theoretical approach to the analysis of an impressively large volume of primary sources and data drawn from books and magazines published by Kurdish activists, political parties and groups. The analysis focuses on the specific demands articulated

by the Kurdish national movement and looks at Kurdish nationalism at a specific level by disaggregating the nationalist discourse, showing variations over time and across different Kurdish nationalist organisations. Situating contemporary Kurdish political identity and its political manifestations within a historical framework, the author examines the historical and structural conditions that gave rise to it and influenced its evolution since the 1960s. The analysis also encompasses an account of the organisational growth and evolution of the Kurdish national movement, including the political parties and groups that were active in the period. Bringing the study of the organisational development and growth of the Kurdish National Movement in Turkey up to date, this book will be an important reference for students and scholars of Middle Eastern politics, social movements, nationalism and conflict.

Turkey's Kurds Routledge

This book makes the case for looking afresh at Turkey-EU relations in order to appreciate the richness and complexity of a relationship which is now more than 50 years old and is still not close to reaching fulfilment. The contributors challenge conventional attempts to understand Turkey-EU relations, revealing that EU integration studies has been rather poor at understanding the global context within which Turkey-EU developments take place. More surprising perhaps, EU integration studies has also struggled to give sufficient weight to the potential of Turkey's domestic politics to shape EU enlargement. The volume attempts to correct these imbalances by offering both a global context and new perspectives on the drivers of domestic politics. It represents a shift from a narrow EU integration/enlargement agenda. Turkey's position vis-a-vis the EU cannot be adequately captured by simplistic notions of conditionality, harmonization, and an uncritical interpretation of Europeanization. A

more rounded view of Turkey-EU relations is advanced based upon a broader context of European and global transformations. The contributions, collected here, offer an interpretation of Turkey-EU relations from a novel perspective, utilize a new framework of theory, and draw upon insights and perspectives from disciplines underrepresented in mainstream study of Turkey-EU relations. This book was published as a special issue of the *Journal of Contemporary European Studies*.

Due to its primacy in explaining issues of war and peace in the international arena, the discipline of International Relations (IR) looms large in analyses of and responses to ethnic conflict in academia, politics and popular media – in particular with respect to contemporary conflicts in the Middle East. Grounded in constitutive theory, this book challenges how ethnic/ethno-nationalist conflict is represented in explanatory IR by deconstructing its most prominent state-centric models, frameworks and analytical concepts. As much a critique of contemporary scholarship on Kurdish ethno-nationalism as a detailed analysis of the most prominent Kurdish ethno-nationalist actors, the book provides the first in-depth investigation into the relations between the PKK and the main Iraqi Kurdish political parties from the 1980s to the present. It situates this inquiry within the wider context of the ambiguous political status of the Kurdistan Region of Iraq, its relations with Turkey, and the role Kurdish parties and insurgencies play in the war against ISIS in Iraq and Syria. Appreciating these complex dynamics and how they are portrayed in Western scholarship is essential for understanding current developments in the Iraqi and Syrian theatres of war, and for making sense of discussions about a potential independent Kurdish state to emerge in Iraq. Iraqi Kurdistan provides a comprehensive and critical discussion of the state-centric and essentialising epistemologies, ontologies, and methodologies of the three main paradigms of explanatory IR, as well as their analytical models and frameworks on ethnic identity and conflict in the Middle East and beyond. It will therefore be a valuable resource for anyone studying ethnicity and nationalism, International Relations or Middle

East Politics.

This book presents new and updated developments in the molecular theory of mixtures and solutions. It is based on the theory of Kirkwood and Buff which was published more than fifty years ago. This theory has been dormant for almost two decades. It has recently become a very powerful and general tool to analyze, study and understand any type of mixtures from the molecular, or the microscopic point of view. The traditional approach to mixture has been, for many years, based on the study of excess thermodynamic quantities. This provides a kind of global information on the system. The new approach provides information on the local properties of the same system. Thus, the new approach supplements and enriches our information on mixtures and solutions.

Turkey and the Kurdish Peace Process Lexington Books

The accession of Turkey to the EU presents a fascinating case study for all those with an interest in europeanisation. Officially recognised as a candidate for full membership in 1999 Turkey's negotiations with the EU have been protracted and highly controversial. Turkey and the European Union: Processes of Europeanisation offers a coherent and focussed account of Turkey's recent relations and accession negotiations with the EU. Europeanisation as an explanatory tool is used to review how the EU has successfully induced change in Turkish policies and institutions whilst careful analysis is also conducted into where europeanisation has failed and explores how it may even have inadvertently contributed to forming a backlash against accession. Authoritative local and International contributors provide in-depth analysis as to why the process has had such a varied impact across a range of policies and institutions and ask, given the high costs of joining the EU and decreasing incentives, if europeanisation can still exert an influence in the future. Despite Turkey's unique geographical and political position between East

and West the relationship with the EU is not a case sui generis. This book offers valuable insights on the effectiveness of europeanisation for all those within and without the framework of the European Union.
