Now a SHOWTIME® original series starring Emmy winners Joseph Gordon-Levitt and Kyle Chandler and Academy Award nominee Uma Thurman. Now streaming – Only on SHOWTIME. Named one of the best books of the year by NPR, Fortune, Bloomberg, Sunday Times A New York Times Book Review Editor 's Choice " If you want to understand modern-day Silicon Valley, you need to read this book. " —John Carreyrou, New York Times best-selling author of *Bad Blood* Hailed as the definitive book on Uber and Silicon Valley, *Super Pumped* is an epic story of ambition and deception, obscene wealth, and bad behavior that explores how blistering technological and financial innovation culminated in one of the most catastrophic twelve-month periods in American corporate history. Backed by billions in venture capital dollars and led by a brash and ambitious founder, Uber promised to revolutionize the way we move people and goods through the world. What followed would become a corporate cautionary tale about the perils of startup culture and a vivid example of how blind worship of startup founders can go wildly wrong.

"Technological Addictions is the first guide designed to provide insight and strategies to clinicians, patients, and families grappling with the collateral damage of technology's pervasiveness and pull. Mental health professionals are beginning to understand that video games, online pornography, internet gaming, internet gambling, and other technological pastimes can be every bit as addictive as substances such as alcohol, tobacco, and illicit drugs. Editor Petros Levounis is among the foremost experts on addiction and, together with coeditor James Sherer and a roster of prominent contributors, has created a groundbreaking book that emphasizes the lived reality of the people who struggle with these addictions every day. In 10 rigorous yet down-to-earth chapters, the book explores the psychological and cultural context of each technology and related behavior, from social media to cybersex, and examines thoroughly the difference between healthy engagement with technology and addiction. This discussion premised on the understanding that technology should not be rolled back or restricted but is an increasingly beneficial and even necessary part of modern life. Two chapters specifically focus on the way technology addictions impact particular populations, such as children and adolescents and older adults. Addiction to technology does not discriminate; no preexisting psychological or physical conditions are required, and everyone is susceptible. *Technological Addictions* provides guidance found nowhere else, guidance that both clinicians and laypeople will find useful and compelling"--

In *The Polar Bear in the Zoo*, Martin Rowe studies a photograph by the Canadian photojournalist Jo-Anne McArthur in the context of her series *We Animals* and the portraits of several other photographers of captive animals. Rowe looks at how we come to the window to stare at the creatures, and the ways we frame our ideas about them within the exposure and capture provided by the photograph and the zoo. As part of his analysis, Rowe relates his own frames as an animal activist, his blind spots and effacements, and how the various tropes that are evoked in McArthur's photograph reflect our human tendency to honor the act of seeing--including our beliefs in the epiphanic--above our other senses, and our willingness to confront what we see or turn away. "The Polar Bear in the Zoo...is a deeply thoughtful and thought-provoking exploration of the relationship between human and non-human animals. . . . Rowe's keen eye and even keener mind help us see in these photographs much that is in plain sight, yet manages to elude our glance." --Daniel Redwood, musician, *Songs for Animals, People, and the Earth* "Rowe boldly and elegantly presents difficult questions that human society prefers to avoid, and therefore questions that should be pressed--and persistently--in the animal rights movement's works." --Jim Mason, author, *An Unnatural Order* "Rowe reflects on the deeply troubled relationship between humans and animals. He encourages a dialogue with the reader, evoking questions that are disturbing, profound, and unable to be ignored." --Robin Lamont, author, *If Thy Right Hand* "A long, lingering lectio about right relationship between human and animals.... This cry of the heart reads like a wisdom scripture." --Mary Margaret Funk, author, *Thoughts Matter* " Rowe's] 'walk-a-mile-in-my-shoes' concept as a trapped zoo animal gives a memorable perspective when pondering questions about how and why we do what we humans do to other animals." --Ellen Jaffe Jones, author, *Eat Vegan on \$4 a Day* *Winning Pachinko* Princeton University Press

This book presents a new, evidence-based cognitive behavioral intervention for the prevention and treatment of Internet addiction in adolescents. It provides a comprehensive overview of the current state of research regarding phenomenology, diagnostics, epidemiology, etiology, and treatment and prevention of Internet addiction as a new behavioral addiction. The book is divided into two sections. The first part of the book explores various bio-psycho-social factors that contribute to the development and maintenance of symptoms in young individuals. Chapters in the second part of the book discuss the PROTECT intervention to reduce Internet addiction in adolescents. PROTECT aims to modify risk factors and maintenance factors, specifically, boredom and motivational problems, procrastination and performance anxiety, social anxiety and maladaptive emotion regulation. The PROTECT intervention is a low-intensity approach which uses comprehensive case examples in order to increase cognitive dissonance and treatment motivation. In addition, PROTECT contains cognitive behavioral intervention techniques such as psychoeducation, behavior activation, cognitive restructuring, problem solving and emotion regulation. Topics featured in this book include: Adolescence and development-specific features of Internet addiction. An overview of modifiable risk factors and maintenance factors of Internet addiction. Environmental factors that affect the development of Internet addiction. Online and offline video gaming addiction. Social network addiction. Strategies that work in prevention and treatment. Internet Addiction in Adolescents is a must-have resource for researchers, professors, clinicians and related professionals as well as graduate students in clinical child, school, and developmental psychology, educational policy and politics, and social work as well as related disciplines.

An anthropologist looks at the new "crack cocaine" of high-tech gambling Recent decades have seen a dramatic shift away from social forms of gambling played around roulette wheels and card tables to solitary gambling at electronic terminals. Slot machines, revamped by ever more compelling digital and video technology, have unseated traditional casino games as the gambling industry's revenue mainstay. *Addiction by Design* takes readers into the intriguing world of machine gambling, an increasingly popular and absorbing form of play that blurs the line between human and machine, compulsion and control, risk and reward. Drawing on fifteen years of field research in Las Vegas, anthropologist Natasha Dow Schüll shows how the mechanical rhythm of electronic gambling pulls players into a trancelike state they call the "machine zone," in which daily worries, social demands, and even bodily awareness fade away. Once in the zone, gambling

addicts play not to win but simply to keep playing, for as long as possible—even at the cost of physical and economic exhaustion. In continuous machine play, gamblers seek to lose themselves while the gambling industry seeks profit. Schüll describes the strategic calculations behind game algorithms and machine ergonomics, casino architecture and "ambience management," player tracking and cash access systems—all designed to meet the market's desire for maximum "time on device." Her account moves from casino floors into gamblers' everyday lives, from gambling industry conventions and Gamblers Anonymous meetings to regulatory debates over whether addiction to gambling machines stems from the consumer, the product, or the interplay between the two. *Addiction by Design* is a compelling inquiry into the intensifying traffic between people and machines of chance, offering clues to some of the broader anxieties and predicaments of contemporary life. At stake in Schüll's account of the intensifying traffic between people and machines of chance is a blurring of the line between design and experience, profit and loss, control and compulsion.

A national map of legalized gambling from 1963 would show one state, Nevada, with casino gambling and no states with lotteries. Today's map shows eleven commercial casino states, most of them along the Mississippi River, forty-two states with state-owned lotteries, and racetrack betting, slot-machine parlors, charitable bingo, and Native American gambling halls flourishing throughout the nation. For the past twenty years, the South has wrestled with gambling issues. In *How the South Joined the Gambling Nation*, Michael Nelson and John Lyman Mason examine how modern southern state governments have decided whether to adopt or prohibit casinos and lotteries. Nelson and Mason point out that although the South participated fully in past gambling eras, it is the last region to join the modern movement embracing legalized gambling. Despite the prevalence of wistful, romantic images of gambling on southern riverboats, the politically and religiously conservative ideology of the modern South makes it difficult for states to toss their chips into the pot. The authors tell the story of the arrival or rejection of legalized gambling in seven southern states -- Mississippi, Louisiana, Tennessee, South Carolina, Georgia, Arkansas, and Alabama. The authors suggest that some states chose to legalize gambling based on the examples of other nearby states, as when Mississippi casinos spurred casino legalization in Louisiana and the Georgia lottery inspired lottery campaigns in neighboring South Carolina, Alabama, and Tennessee. Also important was the influence of Democratic policy entrepreneurs, such as Zell Miller in Georgia, Don Siegelman in Alabama, and Edwin Edwards in Louisiana, who wanted to sell the idea of gambling in order to sell themselves to voters. At the same time, each state had its own idiosyncrasies, such as certain provisions of their state constitutions weighing heavily as a factor. Nelson and Mason show that the story of gambling's spread in the South exemplifies the process of state policy innovation. In exploring how southern states have weighed the moral and economic risk of legalizing gambling, especially the political controversies that surround these discussions, Nelson and Mason employ a suspenseful, fast-paced narrative that echoes the oftentimes hurried decisions made by state legislators. Although each of these seven states fought a unique battle over gambling, taken together, these case studies help tell the larger story of how the South -- sometimes reluctantly, sometimes enthusiastically -- decided to join the gambling nation.
