Martyn Farr’s The Darkness Beckons charts the history and development of cave diving, from early underwater expeditions in France in the late nineteenth century, through to cutting-edge dives across the globe, where iron-willed individuals are pushing the limits of equipment and techniques in the pursuit of exploration. Cave diving is the natural evolution of caving, where cavers and open-water divers overcome the challenges of water-filled passages by using specialist breathing apparatus to explore further and deeper than ever before. The challenges are many – distance, depth, temperature, visibility, rockfall and simple restriction in passage size – together with the physical and mental demands placed on an individual in an environment where, despite meticulous preparation, equipment can malfunction and one cannot expect to be rescued if something goes wrong. Early cave dives were made using Standard Equipment diving suits, before ‘frogman’ equipment was adopted by British and Italian divers in the 1940s. Around the same time, Jacques-Yves Cousteau and Émile Gagnan designed the compressed-air aqualung, the first scuba equipment. The development of breathing apparatus has continued, alongside solutions to evermore challenging projects, especially those at extreme depth. British cave divers, including the author, have been at the forefront of many developments, such as the explorations at Wookey Hole in the Mendips, Keld Head in the Yorkshire Dales and Pozo Azul in Spain. Cave diving today is a truly international endeavour, and Farr gives detailed and engaging accounts of developments in Europe, the Americas, Australia and New Zealand, Southern Africa and more. Farr introduces cave diving’s pioneers and chronicles their achievements. Among a cast of many are the Britons Graham Balcombe and Mike Boon; the American Sheck Exley, who died while attempting to establish a new depth record in the Zacatón sinkhole in Mexico; and the outstanding German cave diver and equipment innovator Jochen Hasenmayer. The stories of their adventures are charged with courage, danger and excitement, and some have led to tragedy. First published in 1980, this 2017 edition of The Darkness Beckons has been fully revised and updated to reflect the latest developments. Featuring over 400 breathtaking photographs and illustrations, and with a foreword by renowned American cave diver and explorer Bill Stone, it is an inspirational read for anyone with an interest in exploration and adventure.

If you do not yet scuba dive but are thinking of learning, then Scuba Fundamental - Start Diving the Right Way is for you. It takes you from the germ of the idea that you might like to try scuba diving up to the point where you have done around 20 dives. This is not your standard how-to scuba diving manual. It is very different. The purpose of Scuba Fundamental is not to teach you how to dive. A dive instructor will do that. But this book will make the learning process much easier. It will help you make the right choices and avoid the pitfalls that await new and uninformed divers coming into the sport. It will also set you well on the road to becoming a capable and competent lifelong diver. Scuba Fundamental tells you how to make sure you are prepared for a scuba diving course and what a good beginners course should entail. It tells you how to choose a good instructor, how to decide which operators to dive with after you have finished your course and what sort of dives you should be doing when you first start diving. You will learn the many ways in which diving will change your life and also acquire some extremely valuable advice on the etiquette involved in the sport. Throughout the book and especially in the chapter "It Happened to Me" you will be entertained, educated and encouraged by anecdotes from people who are now experienced divers but were once beginners too. There is also an entire section devoted to diving safety, much of which covers vitally important aspects of scuba diving that standard training manuals don't emphasise enough or even leave out completely. The book's message is: start scuba diving the right way and you will be relaxed and ready for the adventure. You will have more fun, make fewer mistakes and be confident in the fact that you are well informed, have made the best choices and have spent your money wisely. Scuba Fundamental is a unique, reliable and essential guide: one that you can trust completely and follow during this formative phase of your scuba diving life. "I wish I had had this book to read when I learned to dive. I remember being totally confused." Robin Yao, Executive Editor, EZZDIVE magazine "This is the book

divers should give to friends when they say they want to learn to scuba dive." Ian Thomas, Scuba Instructor Trainer

Join Riley Hathaway on the most amazing adventures with her Dad, underwater cameraman Steve, to find the largest, most scary and amazing creatures in New Zealand's vast oceans. Young Ocean Explorers - Love Our Ocean, the book inspired by the popular TV series, features spectacular imagery by award-winning photographer, Richard Robinson. It opens up a whole new world, bringing us face to face with the beauty and strangeness of the underwater realm in a quality never seen before. Riley's adventures bring the natural world closer through amazing facts, stories and interviews with some of New Zealand's top marine experts. Illustrations by popular singer-songwriter, Jamie McDell, add a quirky sense of fun. Inspiring a generation of kids to put their faces under the ocean's magical surface, experiencing it and wanting to look after it for future generations - this is a book to read again and again.  
A Report on 2017 Diving Fatalities, Injuries, and Incidents Aqua Quest Publications, Inc.  
From the azure waters of Hawaii to the pristine streams in Alaska to the craggy New England coast, a devoted angler reveals the agony and ecstasy of fishing. Fishing the Wild Waters invites us to traverse America and visit three distant and distinct dream destinations for any serious angler—and anyone who aspires to someday become one. Sullivan's marvelous debut illuminates the often profound nature of fishing as a vehicle that connects those who practice it with reverence to a world beyond the one humans created. As we travel along with Sullivan, he reveals what goes into the pursuit of select fish in the region with humor and personal stories as well as deep knowledge. Hawaii, Alaska and New England are some of the last frontiers of fishing in America. They are full of danger, big fish, and extraordinary adventure. To fish these places is to reach back and stand alongside the First Nations of fishermen—our ancestors who lived there for thousands of years before us—as well as those early Americans who built this country using species like cod as their currency. These cultural and fishing outposts will tell us something if we can just be quiet and listen. To hear that message requires an intrinsic respect for these ancient fishing grounds and our connection to them. This mindset is in lock-step with a growing movement of anglers who fish these wildest of waters as a way to turn down the noise of modern living and tune into their fundamental, hands-on relationship with the sea, finding not only the solace, but the sustenance the fish provides to those who take the time to learn its lessons. Plus, filling a freezer with the world’s healthiest protein just feels right. By turns funny, thrilling, and lyric, Fishing the Wild Waters celebrates these special places where each fisherman can pull back the curtain, connect to the sea, and gaze into their own soul — the soul of a fisherman.  
**Start Diving the Right Way** Crown Archetype  
The book is a complete guide, a manual for the 1st Level of freediving technique. The writer uses his thirty years of experience as an instructor and designer of freediving courses, but most of all, the 15 years during which he has certified more than 1.000 free divers in the 3 levels of diver training, and describes a step by step method for reaching the first 10 meters in freediving. The chapters of the book literally follow the new freediver through the series of steps he must take, from dressing up and entering the water, to his surface swimming and the adaptation of his senses inside the water, as well as all the buoyancy adjustments he will have to make at the surface and before each dive. The book presents the freedive as a nicely structured, logical chain of skills that are explained and presented through a large number of impressive underwater photos of actual diver training. Even the possible mistakes in performing the dive skills are analyzed and explained. The descent to the seabed covers the greater part of the book, and everything is presented in a step by step movement or skill, while the reader quickly finds himself participating in the dive and trying to make the right moves! Every step is explained in detail; for example, the methods of equalizing the ears and the different techniques in order to learn how to equalize and avoid a blocked ear. The ascent phase of the freedive is described in

similar detail and presented through many actual training photos.  
The book covers the use of the buddy system in freediving, presenting the methods used for providing safety and communicating underwater. The methods of planning a freedive are analyzed in detail, both for the diver and for the buddy monitoring the dive. The organization of a day's series of freedives is also presented, as a diver will have to learn how to create a daily plan of his different dives. The dangerous incidents in freediving are considered problems that block or delay the ascent, while rescue techniques and safety measures are also described. Dangerous situations, that every freediver should know how to avoid and how to handle as a rescuer, are covered in detail in the final chapter. As the writer says: "A book cannot of course replace training or an entire dive learning program. Today, however, our era might offer great training programs and excellent instructors, but no remarkable books - comprehensive technique guides. So the mission of this book is to accompany the new freediver into the sea and to help him, step by step, in building an excellent technique and achieving new goals in freediving, like his best trainer and dive buddy!

The True Story of \$100 Million in Lost Russian Gold -and One Man's Lifelong Quest to Recover It Keith Jessop and Neil Hanson "Outstanding, inspiring, and beautifully told. No true tale of the sea makes better reading."-Clive Cussler Here is the true tale of a small-time salvage diver, the crushing depths of the sea, and the richest prize ever found-\$100 million in pure gold. Follow salvage diver Keith Jessop as he battles nature, governments, traitors, salvage monopolies, and, of course, lawyers to claim the grand prize of wrecks-the HMS Edinburgh. Filled with ten tons of Russian gold, the ship had been sought by many, but never found. Through unyielding determination, extraordinary physical prowess, and keen intelligence, Keith Jessop risks all to reach his final destination, and keeps readers on the edge of their seats.  
**The Boys in the Cave Chronicle** Books  
Chris and Chrissy Rouse, an experienced father-and-son scuba diving team, hoped to achieve widespread recognition for their outstanding but controversial diving skills. Obsessed and ambitious, they sought to solve the secrets of a mysterious, undocumented World War II German U-boat that lay under 230 feet of water, only a half-day's mission from New York Harbor. In doing so, they paid the ultimate price in their quest for fame. Bernie Chowdhury, himself an expert diver and a close friend of the Rouses', explores the thrill-seeking world of deep-sea diving, including its legendary figures, most celebrated triumphs, and gruesome tragedies. By examining the diver's psychology through the complex father-and-son dynamic, Chowdhury illuminates the extreme sport diver's push toward—and sometimes beyond—the limits of human endurance.

How Our Fate and the Ocean's are One Vertebrate Publishing From Astronaut Abby, the dynamic founder of The Mars Generation, comes a book about dreaming big, reaching for the stars, and making a plan for success! From the age of four, Abigail Harrison knew she wanted to go to space. At age eleven, she sat down and wrote out a plan--not just for how to become an astronaut, but how to be the first astronaut to set foot on Mars. With a degree in biology, internships at NASA, and a national organization founded to help kids reach for the stars themselves, Astronaut Abby is well on her way to achieving her dreams--and she wants to help others do the same! In this book, readers will find helpful advice and practical tips that can help set them on the path toward finding, reaching for, and achieving their goals. With examples from Abby's own life, interactive activities to get readers going, and plenty of fun illustrations along the way, this is the perfect guide for anyone--of any age--with big dreams and plenty of determination. It's time to reach for the stars! Praise for Dream Big!: "With friendly encouragement . . . the content and approach are general enough to appeal both to STEM-oriented fans of the author as well as those whose interests lie in other areas . . . Fun and helpful." --Kirkus Reviews "Any young person who wants to achieve their dreams will find this comprehensive book helpful." --Booklist "The conversational style is easy to understand. . . . There are eye-catching fonts, icons, think bubbles, and callouts. . . . A recommended purchase for middle school and high school libraries. Counselors assisting high schoolers with college preparation and educators teaching leadership classes will find many of the journaling activities very useful." --School Library Journal

One Breath is a gripping and powerful exploration of the strange and fascinating sport of freediving, and of the tragic, untimely death of America ’ s greatest freediver Competitive freediving—a sport built on diving as deep as possible on a single breath—tests the limits of human ability in the most hostile environment on earth. The unique and eclectic breed of individuals who freedive at the highest level regularly dive hundreds of feet below the ocean ’ s surface, reaching such depths that their organs compress, light disappears, and one mistake could kill them. Even among freedivers, few have ever gone as deep as Nicholas Mevoli. A handsome young American with an unmatched talent for the sport, Nick was among freediving ’ s brightest stars. He was also an extraordinary individual, one who rebelled against the vapid and commoditized society around him by relentlessly questing for something more meaningful and authentic, whatever the risks. So when Nick Mevoli arrived at Vertical Blue in 2013, the world ’ s premier freediving competition, he was widely expected to challenge records and continue his meteoric rise to stardom. Instead, before the end of that fateful competition Nick Mevoli had died, a victim of the sport that had made him a star, and the very future of free diving was called into question. With unparalleled access and masterfully crafted prose, One Breath tells his unforgettable story, and of the sport which shaped and ultimately destroyed him.

Diving Medicine for Scuba Divers

A one-of-a-kind blend of art, nature, and conservation, The Underwater Museum re-creates an awe-inspiring dive into the dazzling under-ocean sculpture parks of artist Jason deCaires Taylor. Taylor casts his life-size statues from a special kind of cement that facilitates reef growth, and sinks them to the ocean floor. There, over time, the artworks attract corals, algae, and fish, and evolve into beautiful and surreal installations that are also living reefs. This volume brings readers face to face with these wonders and explains the science behind their creation. Ocean enthusiasts, divers, art lovers, and anyone entranced by the natural world will be instantly engrossed by this pearl of a book.

Life on an Ocean Planet

An active cognizance of our influence on the big-picture flow of creation, in which we all participate, is the responsibility of every human being. It is only through this effort that we can understand those spiritual competencies that are most relevant to the critical cause-and-effect interactions that have the most sway over our existence. So too is it incumbent on humans to embrace the concept of unconditional love, and to understand why we alone get to take the journey toward it. It is only in a space where spirituality is allowed to uncover our inner structure and dimensions of consciousness that we engage this important energy force. The Irreducible Primary is an unapologetic examination of spirituality, nature, and the current state of human interaction. Here, spiritual seekers and religious types who ’ ve grown dissatisfied with religious dogma, along with individuals frustrated with governmental and political impotency, find
