Olivia Brent has one summer to save the dairy farm she just inherited. But there's one problem, and it's not her lactose intolerance. Jake Milovic. The brooding farmhand has inherited exactly fifty percent of Brent Farm, and he's so convinced the city girl can't work the land, he bets she can't save it in a summer. Determined to prove him wrong, Olivia accepts what might be the dumbest wager of her life. His strategy to win seems simple: follow her around, shirtlessly distracting her between bouts of relentless taunting. And it's effective—if his dark eyes and rare smiles aren't enough to sidetrack her, the sweaty, rolling topography of the manbeast's body would do the trick. What they don't know: they'll have to weather more than each other. Mysterious circumstances throw the farm into disarray, and with the dairy farm in danger, Olivia and Jake have to work together. But when they do, there's more to fear than either of them imagined. Because now their hearts are on the line, and the farm won't be the only casualty if they fail.

From basic concepts to research grade material, *Mobile Web 2.0: Developing and Delivering Services to Mobile Devices* provides complete and up-to-date coverage of the range of technical topics related to Mobile Web 2.0. It brings together the work of 51 pioneering experts from around the world who identify the major challenges in Mobile Web 2.0 applications and provide authoritative insight into many of their own innovations and advances in the field. To help you address contemporary challenges, the text details a

conceptual framework that provides modeling facilities for context-aware, multi-channel Web applications. It compares various platforms for developing mobile services—from the developer and user perspectives—and explains how to use high-level modeling constructs to drive the application development process through automatic code generation. Proposes an expanded model of mobile application context Explores mobile social software as an Information and Communications Technology (ICT) Discusses the effect of context on mobile usability Through empirical study, the book tests a number of hypotheses on the use of software implementation technology and location context in mobile applications. It introduces Reusable End-User Customization (REUC)—a technique that allows users to adapt the layout of Web pages and automatically reapplies those preferences on subsequent visits. It also investigates the need for non-visual feedback with long system response times, particularly when downloading Web pages to mobile devices.

"Welcome to the world of university academics, where the Academic Hunger Games, fuelled by precarious employment conditions, is the new reality - a perpetual jostle for short-term contracts and the occasional plum job. But Inger Mewburn is here to tell you that life needn't be so grim. A veteran of the university 'gig economy', Mewburn - aka The Thesis Whisperer - is perfectly placed to reflect on her experience and offer a wealth of practical strategies to survive and thrive. Here, she deftly navigates the world of the working academic, from thesis and article writing and keeping motivation alive, to time management, research strategies, new technologies, applying for promotion, sexism in the workplace, writing grant applications, and deciding what to wear to give a keynote address. Constructive, inclusive, hands-on, and gloves-off, *How to be an Academic* is a survival manual for aspiring and practising academics that will confirm that no matter what your experience in academia, you are not alone."

A business history of the software industry from the days of custom programming to the age of mass-market software and video games. From its first glimmerings in the 1950s, the software industry has evolved to become the fourth largest industrial sector of the US economy. Starting with a handful of software contractors who produced specialized programs for the few existing machines, the industry grew to include producers of corporate software packages and then makers of mass-market products

and recreational software. This book tells the story of each of these types of firm, focusing on the products they developed, the business models they followed, and the markets they served. By describing the breadth of this industry, Martin Campbell-Kelly corrects the popular misconception that one firm is at the center of the software universe. He also tells the story of lucrative software products such as IBM's CICS and SAP's R/3, which, though little known to the general public, lie at the heart of today's information infrastructure. With its wealth of industry data and its thoughtful judgments, this book will become a starting point for all future investigations of this fundamental component of computer history.

In 2002, Grace J. Scott began to receive messages from those beyond the grave. Grace felt it her duty to record their voices, their thoughts, and even their warnings. Awakening of the Soul is the amazing result. This intriguing collection of channeled thoughts from souls in heaven, other planetary systems, and other universes will benefit those seeking spiritual growth as well as those wanting information about preparing for upcoming Earth changes. Much of the material is packed with information and requires time to read and digest while other material is simple and easily understood. Presented in chronological order as received in reflexology sessions, the conversations are completely original, unedited, and unorganized, straight from the spirit itself. Some spirits channeled big lessons for the general public or gave messages to individuals while some explained disasters, politics, wars, dreams, and events in our daily lives. But all of the souls have one thing in common: they bring news that Earth is cleansing itself at a rapid pace, and they are here to assist us through the cleansing and beyond. Epic in scope, Awakening of the Soul is a vital tool for those looking to the future and to the fate of Earth itself.

The death knell has struck. Wave Radio is dead. How have 70 years of Military Research succeeded in producing a completely new and superior communications technology? Radio History gives a stranger walk than paranoid writers ever tell! While citizens were watching television, military research was directed to create an amazing radiation technology far in advance of any system known. Currently and routinely utilised, it has remained a well guarded 'open secret' for decades. The proof patents and relevant research papers have just been retrieved. Facts quell hysteria, but Truth is stranger than fiction. Want the answers? The complete technical history of military projects will show the development of every relevant project preceding HAARP. Only the facts. No hysteria. Complete with communications and weapons patent citations, this book will forever change your view of world events and technology.

This book proposes a revisionist approach to democratic politics. Yaron Ezrahi focuses on the creative unconscious collective imagination that generates ever-changing visions of legitimate power and authority, which compete for enactment and institutionalization in the political arena. If, in the past, political authority was grounded in fictions such as the divine right of kings, the laws of nature, historical determinism and scientism, today the space of democratic politics is filled with multiple alternative social imaginaries of the desirable political order. Exposure to electronic mass media has made contemporary democratic publics more aware that credible popular fictions have greater impact on shaping our political realities than do rational social choices or moral arguments. The pressing political question in contemporary democracy is, therefore, how to select and enact political fictions that promote peace and how to found the political order on checks and balances between alternative political imaginaries of freedom and justice.
