In *The Paleo Manifesto: Ancient Wisdom for Lifelong Health*, John Durant argues for an evolutionary – and revolutionary – approach to health. All animals, human or otherwise, thrive

when they mimic key elements of life in their natural habitat. From diet to movement to sleep, this evolutionary perspective sheds light on some of our most pressing health concerns. What is causing the rise of chronic conditions, such as obesity, diabetes, and depression? Is eating red meat going to kill you? Is avoiding the sun actually the best way to avoid skin cancer? Durant takes readers on a thrilling ride to the Paleolithic and beyond, unlocking the health secrets of our ancient ancestors. What do obese gorillas teach us about weight loss? How can Paleolithic skulls contain beautiful sets of teeth? Why is the Bible so obsessed with hygiene? What do NASA astronauts teach us about getting a good night's sleep? And how are Silicon Valley techies hacking the human body? Blending science and culture, anthropology and philosophy, John Durant distills the lessons from his adventures and shows how to apply them to day-to-day life, teaching people how to construct their own personal "habitat" that will enable them to thrive. The book doesn't just

address what we eat, but why we eat it; not just how to exercise, but the purpose of functional movement; not just being healthy, but leading a purposeful life. Combining the best of ancient wisdom with cutting edge science, Durant crafts a vision of health that is both fresh and futuristic.

We live in an era of health hype and nutrition propaganda, and we're suffering for it.

Decades of avoiding egg yolks, choosing margarine over butter, and replacing the real foods of our ancestors with low-fat, processed, packaged substitutes have left us with an obesity epidemic, ever-rising rates of chronic disease, and, above all, total confusion about what to eat and why. This is a tragedy of misinformation, food industry shenanigans, and cheap calories disguised as health food. It turns out that everything we've been told about how to eat is wrong. Fat and cholesterol are harmful to your health?

Nope—they are crucial to your health. "Whole

grains" are health food? Not even close.

Counting calories is the way to lose weight? Not gonna work—nutrients are what matter. Nutrition can come from a box, bag, or capsule? Don't count on it! In *Eat the Yolks*, Liz Wolfe debunks all these myths and more, revealing what's behind the lies and bringing the truth about fat, cholesterol, protein, and carbs to light. You'll be amazed at the tall tales we've been told in the name of "healthy eating." With wit and grace, Wolfe makes a compelling argument for a diet based on Paleo foods. She takes us back to the foods of our ancestors, combining the lessons of history with those of modern science to uncover why real, whole food—the kind humans ate for thousands of years before modern nutrition dogma led us astray—holds the key to amazing health and happy taste buds. In *Eat the Yolks*, Liz Wolfe doesn't just make a case for eating the whole egg. She uncovers the shocking lies we've been told about fat, cholesterol, protein, carbs, and calories and brings us the truth about which foods are healthy—and which foods are really harming us. You'll learn truths like: - fat and cholesterol are crucial, not harmful . . . and why - "whole grains" are processed foods . . . and what to eat instead - counting calories is a waste of energy . . . and what we actually should be tracking - all animal products are not created equal . . . and which ones we truly need - nutrition doesn't come in a box, bag, or capsule . . . and why

there's no substitute for real food!

Foreword by John Robbins, author of the international bestseller *Diet for a New America* In this book, Susan Peirce Thompson, Ph.D. shares the groundbreaking weight-loss solution based on her highly acclaimed *Bright Line Eating Boot Camps*. Rooted in cutting-edge neuroscience, psychology, and biology, *Bright Line Eating* explains why people who are desperate to lose weight fail again and again: it's because the brain blocks weight loss. *Bright Line Eating* (BLE) is a simple approach designed to reverse that process. Susan's own moving story, and those of her Bright Lifers, you'll discover firsthand why traditional diet and exercise plans have failed in the past. You'll also learn about the role addictive susceptibility plays in your personal weight-loss journey, where cravings come from, how to rewire your brain so they disappear, and more. We're told that if we care about our health—or our planet—eliminating red meat from our diets is crucial. That beef is bad for us and cattle farming is horrible for the environment. But science says otherwise. Beef is framed as the most environmentally destructive and least

healthy of meats. We're often told that the only solution is to reduce or quit red meat entirely. But despite what anti-meat groups, vegan celebrities, and some health experts say, plant-based agriculture is far from a perfect solution. In *Sacred Cow*, registered dietitian Diana Rodgers and former research biochemist and New York Times bestselling author Robb Wolf explore the quandaries we face in raising and eating animals—focusing on the largest (and most maligned) of farmed animals, the cow. Taking a critical look at the assumptions and misinformation about meat, *Sacred Cow* points out the flaws in our current food system and in the proposed "solutions." Inside, Rodgers and Wolf reveal contrarian but science-based findings, such as:

- Meat and animal fat are essential for our bodies.
- A sustainable food system cannot exist without animals.
- A vegan diet may destroy more life than sustainable cattle farming.
- Regenerative cattle ranching is one of our best tools at mitigating climate change.

You'll also find practical guidance on how to support sustainable farms and a 30-day challenge to help you transition to a healthful and conscientious diet. With scientific rigor, deep compassion, and wit, Rodgers and Wolf argue unequivocally that meat (done right) should have a place on the table. It's not the cow, it's the how!
