The Beauty Chef Gut Guide is the practical companion to Carla Oates' acclaimed book, The Beauty Chef. It is a compelling resource for people who want to better understand the science underpinning the link between gut and skin health. The 8-week program includes information on the importance of gut functionality, weekly meal plans for repairing and reprogramming your gut, and more than 90 recipes. In addition to recipes and information about repairing your gut, it covers broader advice for wellbeing, from the importance of cleaning products to mindfulness and yoga. It is photographed and designed in the distinct style established by the The Beauty Chef cookbook. Recipes – across breakfast, lunch and dinner – include: Coconut Crêpes; Chicken, Flaked Almond & Sage Buckwheat Risotto; Lemongrass & Kaffir Lime Salmon Cakes; Panfried Cauliflower Gnocchi; Swedish Meatballs; Tamarind Fish Curry; and Vanilla & Cardamom Chia Puddings.

The Martindale-Hubbell Law Directory Marquis Who's Who

New materials enable advances in engineering design. This book describes a procedure for material selection in mechanical design, allowing the most suitable materials for a given application to be identified from the full range of materials and section shapes available. A novel approach is adopted not found elsewhere. Materials are introduced through their properties; materials selection charts (a new development) capture the important features of all materials, allowing rapid retrieval of information and application of selection techniques. Merit indices, combined with charts, allow optimisation of the materials selection process. Sources of material property data are reviewed and approaches to their use are given. Material processing and its influence on the design are discussed. The book closes with chapters on aesthetics and industrial design. Case studies are developed as a method of illustrating the procedure and as a way of developing the ideas further.

A Foodie Afloat is the story of a cook's journey through France on a barge. Di Murrell takes us on a gentle journey across France; her main preoccupation being to make sure that tasty food arrives on the table each day. As she voyages across the country she shows, through her recipes, how the cuisine changes with the landscape. Whether bought in the market, dug from a lock-keeper's garden or even foraged along the towpath, the food she finds and cooks is always seasonal and local to the region. This book is more than just a collection of recipes though. It is the result of a life spent on the waterways of Europe. She talks to lock-keepers, skippers of working barges and those, who, like her, find their sustenance on or near the canal. Di's enjoyment of good champagne, foie gras and truffles leads to an eclectic mix of simplicity and sophistication in her cooking. The boating life, though rarely sensational, is full of small events and chance encounters. This is an enticing story of slow boats and slow food. Di makes it come alive, and her combination of travel and recipe book tempts us to give up everything and join her on the waterways of Northern and Central France. A Foodie Afloat is the 2020 UK winner of the World Gourmand Cookbook Awards in the Food Tourism category.

The fascinating inside story behind the cult French fashion label A.P.C. A.P.C. (Atelier de Production et de Création) was created as a reaction to the excesses of the 1980s, and the minimalist designs of founder Jean Touitou now have a cult following. This compelling book, published on the occasion of A.P.C.'s 30th anniversary, carries the same minimal aesthetic - yet it's packed with never-before-seen illustrations and ephemera. Part retrospective of the brand and part personal scrapbook and visual diary, the book includes invitations, postcards, ad campaigns, images of their stores, and collaborations with other designers.

CWNA Certified Wireless Network Administrator Study Guide BoD – Books on Demand
Discover the joy of cooking for yourself with more than 160 perfectly portioned, easy-to-execute recipes, flexible ingredient lists to accommodate your pantry, and ideas for improvising to your taste. Taking care to prepare a meal for yourself is a different experience than cooking for others. It can be a fun, casual, and (of course) delicious affair, but there are challenges, from avoiding a fridge full of half-used ingredients to ending up with leftovers that become boring after the third reheat. Cooking for One helps you make cooking for yourself special without becoming a chore with unfussy yet utterly appealing meals that rely on ingredients you already have on hand, like Garam Masala Pork Chop with Couscous and Spinach and Weeknight Chicken Cacciatore. Don't have exactly the right ingredients? Never fear--with a "Kitchen Improv" box on every page, we offer ideas for altering the dish so it works for you. And for those weeks you didn't make it to the supermarket, we use a "Pantry Recipe" icon to clearly mark recipes that rely entirely on our checklist for a well-stocked pantry. We show you when it's worth making two servings (but never more) with our "Makes Leftovers" icon, and suggest how to transform those leftovers into a whole new meal. (We love our Spice-Rubbed Flank Steak with Celery Root and Lime Yogurt Sauce served over arugula as a hearty salad the next day.) Ingredients themselves often lead you to another exciting meal--when you're left with half an eggplant from Simple Ratatouille, we direct you to Broiled Eggplant with Honey-Lemon Vinaigrette as the perfect way to use it up. And if the thought of a sink full of dishes keeps you out of the kitchen, there are plenty of appealing one-pan dinners like Sheet Pan Sausages with Sweet Potatoes, Broccoli Rabe, and Mustard-Chive Butter or Couscous with Shrimp, Cilantro, and Garlic Chips that are here to save the day.

Photovoltaic Water Pumping Systems: Concept, Design and Methods of Optimization looks at the potential of effectively designed PVPS and how they can be commercially efficient and economically competitive to grid connected or diesel generator (DG) based pumping systems. The low energy conversion efficiency of PV modules, nonlinearity of PV module/array I-V characteristics and the unique maximum power operation point are major challenges of this technology, this book provides readers with design and optimization methods, codes and critical analysis of the recent developments in PV pumping systems. Focusing on system feasibility and suitable applications with design procedures, this reference presents a critical analysis of PVPS field performance, modeling and control strategies using artificial intelligence techniques. A suitable text for researchers, engineers and graduate students who are working in the field of photovoltaics and pumping and systems. Uses open source Matlab codes for PV pumping system optimization Provides global cases studies and design examples for comparison Includes a data source sheet for proposed systems for successful implementation methods

The Hair Colouring Book is a practical guide to the theory of colouring hair. It is specifically written for young hairdressers in training. There are 17 chapters and the topics covered include; The Consultation, Levels and Tones, The Colour Wheel, The Numbering System, Racial Differences in Hair, Controlling Warmth, Adding Tone, Grey Coverage and lots more. There's a Quick reference guide with page references

to get you quickly to the information and a Glossary to explain some of the Terms used in the book. The book can easily fit into the pocket of a tinting apron so, it will always be to hand when you need it. Apprentices and students of hair colouring will find this book invaluable as it will help to increase job prospects due to improved knowledge. Stylists will be able to better explain theory and techniques to customers leading to improved confidence and client retention. Salon owners will see younger staff learn faster reducing time that they are unprofitable and hairdressing teachers will see that it helps students meet learning targets more easily.

Rose is a princess, a Cinder, and half-human. She is the last one born of her kind, and on her twenty-first birthday, she must enter the woods and travel to find her Prince, as her sisters did before her. ". . . And we will all dance at the Grand Ball," her sisters would always say. But the Human servants are keeping a secret that could prevent the Cinders from reaching their Happily Ever After....Hidden in Rose's dreams and vision are the answers of the past between Cinders and Humans, and she is quickly running out of time trying to solve their hidden messages. She knows the answer lies in her first clue--identifying an animal she has never seen before--that persistent vision of a furry white animal, holding a gold metal object and exclaiming, "Oh dear! Oh dear! I shall be too late!"

Don't limit your challenges. Challenge your limits At the age of 55, record-breaking ultrarunner Mimi Anderson embarked on her most ambitious adventure yet. She wanted to become the fastest woman in history to run across America from Los Angeles to New York. Her journey would cover 2,850 miles, 12 states and four time zones, dealing with extreme changes in terrain, weather and altitude along the way. For 40 days, the determined mother of three pushed herself on and on for more than 2,000 miles across the vast continent, despite the onset of severe pain, until she was forced to make a crushing decision: carry on and risk never being able to run again or give up on her all-time goal. What happened next set Mimi on a new, unexpected journey. She learned to face her fears and bounce back from defeat by taking up the new challenge of becoming a triathlete. A follow-up to her first memoir Beyond Impossible, this next instalment in Mimi's inspiring story proves that when one door closes, another opens – you just need the courage to swim, cycle and run through it.

(Book). Journey through the career of musical giant, milestone guitarist, and recording innovator Les Paul, and marvel at the world of cutting-edge guitar design! This book, along with its companion book The Modern Era of the Les Paul Legacy 1968-2007 (Fall 2008) emerged out of author Robb Lawrence's years of research, interviews, extensive vintage archives (including original Les Paul/Mary Ford articles, press photos, music and recordings), and gorgeous original photography. It's all here: the factory pictures, the designers, the electronics; the first experiment "Log" and "Clunker" guitars, stories of the various Goldtops, the humbucking pickup evolution, and over 80 pages dedicated to the heralded '50s "Sunburst" Standard. Exclusive interviews with Les Paul, as well as Michael Bloomfield and Jeff Beck. A beautiful and insightful book on a legendary inventor, musician and his partnership with Gibson to make the world's most-cherished electric guitar.

Natural Hazards John Wiley & Sons

This special volume contains a selection of papers that were presented as part of the Seventh International Symposium on Natural and Man-Made Hazards (HAZARDS-98), held in Chania, Crete Island, Greece, during May 1998. The Symposium attracted broad international interest because many cases of natural disaster events, such as earthquakes, tsunamis, storm surges, forest fires, etc., that occurred in several parts of

the world during the 1990s were presented not only for their physics but also from the point of view of their impact on society and their environmental consequences. Among these cases are the 1997 Red River Valley flood in Canada and the large earthquake of 18 November 1997, in Zakynthos, Greece. In addition, the volume contains contributions that apply advanced statistical methods and artificial intelligence techniques, such as GIS, and systems analysis to approach the description of physical processes, the discrimination of experimental data and the assessment and management of risk. Audience: This volume forms an excellent reference for scientists, students, engineers, the insurance industry, authorities specializing in public safety and natural hazards preparedness and mitigation plans.

This book provides state of the art scientific and engineering research findings and developments in the field of humanoid robotics and its applications. It is expected that humanoids will change the way we interact with machines, and will have the ability to blend perfectly into an environment already designed for humans. The book contains chapters that aim to discover the future abilities of humanoid robots by presenting a variety of integrated research in various scientific and engineering fields, such as locomotion, perception, adaptive behavior, human-robot interaction, neuroscience and machine learning. The book is designed to be accessible and practical, with an emphasis on useful information to those working in the fields of robotics, cognitive science, artificial intelligence, computational methods and other fields of science directly or indirectly related to the development and usage of future humanoid robots. The editor of the book has extensive R
