Nowhere is this more apparent than in Tokyo-born journalist Lisa Katayama's collection of urawaza (a Japanese word for secret lifestyle tricks and techniques). Want to turbocharge your sled? Spray the bottom with nonstick cooking spray. Can't find someone to water your plants while you're away? Place the plant on a water-soaked diaper, so it slowly absorbs water over time. The subject of popular TV shows and numerous books in Japan, these unusually clever solutions to everyday problems have never before been published in English—until now! Rose is a princess, a Cinder, and half-human. She is the last one born of her kind, and on her twenty-first birthday, she must enter the woods and travel to find her Prince, as her sisters did before her. ". . . And we will all dance at the Grand Ball," her sisters would

always say. But the Human servants are keeping a secret that could prevent the Cinders from reaching their Happily Ever After....Hidden in Rose's dreams and vision are the answers of the past between Cinders and Humans, and she is quickly running out of time trying to solve their hidden messages. She knows the answer lies in her first clue--identifying an animal she has never seen before--that persistent vision of a furry white animal, holding a gold metal object and exclaiming, "Oh dear! Oh dear! I shall be too late!"

Winner of the 2016 Lambda Literary Award for Bisexual Fiction "I read The Life and Death of Sophie Stark with my heart in my mouth. Not only a dissection of genius and the havoc it can wreak, but also a thunderously good story."—Emma Donoghue, New York Times

bestselling author of Room "This novel is perceptive, subtle, funny and lingers in unexpected ways. The analysis of a woman who puts her art above all else is equal parts inspiration and warning story. Anna North makes prose look easy."—Lena Dunham Gripping and provocative, The Life and Death of Sophie Stark is a haunting story of fame, love, and legacy told through the propulsive rise of an iconoclastic artist. Sophie Stark begins her filmmaking career by creating a documentary about her obsession, Daniel, a college basketball star. But when she becomes too invasive, she finds

herself the victim of a cruel retribution. The humiliation doesn't stop her. Visionary and unapologetic, Sophie begins to use stories from the lives of those around her to create movies, and as she gains critical recognition and acclaim, she risks betraying the one she loves most. Told in a chorus of voices belonging to those who knew Sophie best, *The Life and Death of Sophie Stark* is an intimate portrait of an elusive woman whose monumental talent and relentless pursuit of truth reveal the cost of producing great art. It is "not only a dissection of genius and the havoc it can wreak, but also a thunderously good story" (Emma Donoghue).

Sloss Furnaces and the Rise of the Birmingham District contradicts earlier interpretations of southern industrialization by showing that Birmingham, which became a leading symbol of the New South, was in fact deeply rooted in the antebellum plantation system and its "peculiar institution," slavery. As Lewis demonstrates, southern businessmen pursued their own indigenous model of economic growth and were selective in how they imported capital, machinery, and technical expertise from outside the region. The racial crises that erupted in Birmingham during the 1960s can be traced, in part, to labor-intensive developmental strategies that were present from the birth of a city that might have become a

bastion of industrial slavery if the South had won the Civil War

In order for the United States to maintain the global leadership and competitiveness in science and technology that are critical to achieving national goals, we must invest in research, encourage innovation, and grow a strong and talented science and technology workforce.

Expanding Underrepresented Minority Participation explores the role of diversity in the science, technology, engineering and mathematics (STEM) workforce and its value in keeping America innovative and competitive. According to the book, the U.S. labor market is projected to grow faster in science and engineering than in any other sector in the coming years, making

minority participation in STEM program development. education at all levels a national priority. Expanding Underrepresented Minority Participation analyzes the rate of change and the challenges the nation currently faces in developing a strong and diverse workforce. Although minorities are the fastest growing segment of the population, they are underrepresented in the fields of science and engineering. Historically, there has been a strong connection between increasing educational attainment in the United States and the growth in and global leadership of the economy. Expanding Underrepresented Minority Participation suggests that the federal government, industry, and post-secondary institutions work collaboratively with K-12 schools and school systems to increase minority access to and demand for post-secondary STEM education and technical training. The book also identifies best practices and offers a comprehensive road map for increasing involvement of underrepresented minorities and improving the quality of their education. It offers recommendations that focus on academic and social support, institutional roles, teacher preparation, affordability and

In 2009, BlackBerry controlled half of the smartphone market. Today that number is one percent. What went so wrong? Losing the Signal is a riveting story of a company that toppled global giants before succumbing to the ruthlessly competitive forces of Silicon Valley. This is not a conventional tale of modern business failure by fraud and greed. The rise and fall of BlackBerry reveals the dangerous speed at which innovators race along the information superhighway. With unprecedented access to key players, senior executives, directors and competitors, Losing the Signal unveils the remarkable rise of a company that started above a bagel store in Ontario. At the heart of the story is an unlikely partnership between a visionary engineer, Mike Lazaridis, and an abrasive Harvard Business school grad, Jim Balsillie. Together, they engineered a pioneering pocket email device that became the tool of choice for presidents and CEOs. The partnership enjoyed only a brief moment on top of the world, however. At the very moment BlackBerry was ranked the world's fastest growing company internal feuds and chaotic growth crippled the company as it faced its gravest test: Apple and Google's entry in to mobile phones. Expertly told by acclaimed journalists,

Jacquie McNish and Sean Silcoff, this is an entertaining, whirlwind narrative that goes behind the scenes to reveal one of the most compelling business stories of the new century.

Have you ever wondered why she says she feels different to her peers? Wondered why life seems challenging for her? Her peers seem to gracefully and naturally meet their milestones, yet she has reached some developmental milestones early and some late. She may have spoken and read early, asking an endless array of questions. Maybe at age four she was teaching herself to read as you drove down the road by reading street signs. She may have been an overly active child, had sensory issues, or had a speech delay. You knew she was bright from early on, with a sprinkle of some anxiety, social and eating issues, yet the professionals just cannot find an explanation that completely fits her. She may be very artistic, whether she sings, draws, paints, or writes, at times, too mature for her age. Yet, she struggles socially and emotionally, acting and appearing younger than her peers. She may be

ten years old now, yet none of your research completely fits her or maybe you have just now come across some information on females that completely makes sense to you. Maybe she is "Aspien," a young female with Asperger Syndrome or High-Functioning Autism. She has a unique constellation of super-abilities, strengths and challenges.
