Since late 2001 more than fifty percent of the babies born in California have been Latino. When these babies reach adulthood, they will, by sheer force of numbers, influence the course of the Golden State. This essential study, based on decades of data, paints a vivid and energetic portrait of Latino society in California by providing a wealth of details about work ethic, family strengths, business establishments, and the surprisingly robust health profile that yields an average life expectancy for Latinos five years longer than that of the general population. Spanning one hundred

years, this complex, fascinating analysis suggests that the future of Latinos in California will be neither complete assimilation nor unyielding separatism. Instead, the development of a distinctive regional identity will be based on Latino definitions of what it means to be American.

Most people know that there are 70 million Baby Boomers in America today....but what is less known is that there are approximately 100 million people in America between the ages of 16 and 30. This generation has just entered, or will soon be entering the work force. And they have no idea how to invest, save, or handle their money. Young people today come out of school having had little or no formal education on the basics of money management. Many have large debts from student loans looming over their heads. And many feel confused and powerless when their pricey educations don't translate into high paying jobs. They feel that their \$30,000-\$40,000 salary is too meager to bother with investing, and they

constantly fear that there will be "too much month left at the end of their money." Douglas R. Andrew has shown the parents of this generation a different pathway to financial freedom. Now Doug and his sons, Emron and Aaron - both of whom are in their mid-20s - show the under-30 crowd how they can break from traditional 401k investment plans and instead can find a better way by investing in real estate, budgeting effectively, avoiding unnecessary taxes and using life insurance to create tax-free income. With the principles outlined in *Millionaire by Thirty*, recent graduates will be earning enough interest on their savings to meet their basic living expenses by the time they're 30. And by the time they're 35, their investments will be earning more money than they are, guaranteeing them a happy, wealthy future.

The concept of applied social

psychology aims at using social psychology theories and principles to improve the functioning of institutions and individuals. The five chapters of this book contain carefully selected essays that approach both academic issues and empiric research results covering a wide range of interests. The ways in which vulnerable groups rely on psychological mechanisms in their adjustment to concrete situations, and new research in the sphere of mental health are two such subjects covered here. This book will serve as a useful tool for professionals in psychology, medicine, education, social work, and counsellors in permanent interaction with the human factor. However, Applied Social

Psychology is in no way restrictive: it will also be useful and accessible for a wider audience interested in reading about psychology, education, and communication from interdisciplinary perspectives.

NEW YORK TIMES BESTSELLER • “A fascinating look at how consumers perceive logos, ads, commercials, brands, and products.”—Time How much do we know about why we buy? What truly influences our decisions in today’s message-cluttered world? In *Buyology*, Martin Lindstrom presents the astonishing findings from his groundbreaking three-year, seven-

million-dollar neuromarketing study—a cutting-edge experiment that peered inside the brains of 2,000 volunteers from all around the world as they encountered various ads, logos, commercials, brands, and products. His startling results shatter much of what we have long believed about what captures our interest—and drives us to buy. Among the questions he explores: • Does sex actually sell? • Does subliminal advertising still surround us? • Can “cool” brands trigger our mating instincts? • Can our other senses—smell, touch, and sound—be aroused when we see a product? Buyology is a fascinating and shocking journey into the mind of today's consumer that will captivate

anyone who's been seduced—or turned off—by marketers' relentless attempts to win our loyalty, our money, and our minds.

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

This publication represents the ninth volume in an operational and

chronological series covering the Marine Corps' participation in the Vietnam War. This particular volume details the final chapter in the Corps' involvement in South-East Asia, including chapters on Cambodia, the refugees, and the recovery of the container ship SS Mayaguez. Although largely written from the perspective of the III Marine Amphibious Force, this volume also describes the roles of the two joint commands operating in the region: the Defense Attaché Office, Saigon, and the United States Support Activities Group, Thailand. Thus, while the volume emphasizes the Marine Corps' role in the events of the period, significant attention also is given to the overall contribution of these commands in executing U.S. policy in South-east Asia from 1973 to 1975. Additionally, a chapter is devoted to the Marine Corps' role in assisting thousands of refugees who fled South Vietnam in the final weeks of that nation's existence.

Agro-Ecosystem Diversity: Impact on Food Security and Environmental Quality presents cutting-edge exploration of developing novel farming systems and introduces landscape ecology to agronomy. It encompasses the broad range of links between agricultural development and ecological impact and how to limit the potential negative results. Presented in seven sections, each focusing on a specific challenge to sustaining diversity, the book provides insights toward the argument that by re-introducing diversity, it should be

possible to maintain a high level of productivity of agro-ecosystems while also maintaining and/or restoring a satisfactory level of environment quality and biodiversity.

Demonstrates that diversified agro-ecosystems can be intensified with environmental quality preserved, restored and enhanced Includes analysis of economic constraints leading to specialization of farms and regions and the social locking forces resisting to diversification of agro-ecosystems Presents a global vision of world agriculture and the tradeoff between a necessary increase in food production and restoring environment quality

This accessible, hands-on text not only

introduces students to the important topics in historical linguistics but also shows them how to apply the methods described and how to think about the issues; abundant examples and exercises allow students to focus on how to do historical linguistics. Distinctive to this text is its integration of the standard topics with others now considered important to the field, including syntactic change, grammaticalization, sociolinguistic contributions to linguistic change, distant genetic relationships, areal linguistics, and linguistic prehistory. Examples are taken from a broad range of languages; those from the more familiar English, French, German, and

Spanish make the topics more accessible, while those from non-Indo-European languages show the depth and range of the concepts they illustrate. This second edition features expanded explanations and examples as well as updates in light of recent work in linguistics, including a defense of the family tree model, a response to recent claims on lexical diffusion/frequency, and a section on why languages diversify and spread.

"This is the story of the historic Chicano Movement in Los Angeles during the late 1960s and 1970s. The Chicano Movement was the largest civil rights and empowerment

movement in the history of Mexican Americans in the United States. The movement was led by a new generation of political activists calling themselves Chicanos, a countercultural barrio term. This book is the story of three key activists, Raul Ruiz, Gloria Arellanes, and Rosalio Munoz, who through oral history related their experiences as movement activists to historian Mario T. Garcia. As first-person autobiographical narratives, these stories put a human face to this profound social movement and provide a life-story perspective as to why these individuals became activists"--Provided by publisher.
