THE HARD DRIVE BIBLE, EIGHTH EDITION is the definitive reference book for anyone who deals with personal computer data storage devices of any kind. This comprehensive work covers installations, drive parameters, & set up information for thousands of Hard Disk, Optical, DAT Tape, & CD-ROM Drives. A concise history of data storage devices is followed by the most expansive compilation of technical data offered to the public today. Specifications, drawings, charts & photos cover jumper settings, cabling, partitioning & formatting of disk drives. SCSI commands & protocols are addressed, in addition to chapters revealing the intricacies of different interface standards & common troubleshooting procedures. THE HARD DRIVE BIBLE contains the answers to anyone's questions concerning the purchase, installation & use of modern digital data storage devices. The difficulties caused by compatibility mismatches are addressed & solutions are offered. Also featured are controller card information & performance ratings, as well as valuable tips on increasing drive performance & reliability through software.

THE HARD DRIVE BIBLE is published by Corporate Systems Center, one of the leaders in the digital storage device field. A CD-ROM included with the book carries CSC's drive performance test software & formatting tools, as well as thousands of drive parameters, specifications, & technical drawings. To order contact: Corporate Systems Center, 1294 Hammerwood Avenue, Sunnyvale, CA 94089; 408-743-8787.

There's a world of data out there, and this series of modules helps you integrate it into your high-school mathematics courses. Using the major data analysis concepts to provide realistic situations for the development of mathematical knowledge and opportunities for practice, the material reinforces concepts taught in current texts. Extensive use of real data provides opportunities for students to engage in meaningful mathematics, and motivates them to apply what they learn. Future modules include: -- Mathematics in a World of Data -- Introduction to Probability -- Exploring Systems of Inequalities -- Projects: Planning and Conducting Surveys and Experiments -- Probability Models -- Exploring Least Squares Regression -- Mathematical Modeling Using Data and Logarithms -- Exploring Centers -- Advanced Modeling Using Matrices -- Exploring Symbols
