Since its recent introduction, the ZigBee protocol has created an enormous amount of buzz in venues from magazine covers to trade show floors to water coolers. Its promise of providing a simpler, cheaper, more power-efficient WPAN (Wireless Personal Area Network) alternative to WiFi and Bluetooth has opened up new data

collection possibilities in application areas from industrial controls to medical devices to intruder alarms. Yet, despite this widespread interest, there is still little information available that goes beyond detailing the spec itself. Missing from the current ZigBee lexicon is practical, application-oriented guidance from an expert, specifically geared to aid engineers in implementing this new technology. Enter respected designer and popular columnist Fred Eady! With his new book, Hands-On ZigBee, he provides the only comprehensive how-to ZigBee guide available. The ONLY one-stop Zigbee resource available- from basics to sniffers to specs 7 easy-to-assemble ZigBee projects allow the reader to follow along...hands-on! Working hardware and software examples included in every chapter

This book constitutes the refereed proceedings of the 9th IFIP-TC6 Networking Conference, Networking 2010. Papers were solicited in three broad topic areas: applications and services, network technologies, and internet design. All papers were considered on their merits by a uni?ed Technical ProgramCommittee (TPC); there was no attempt to enforce a quota among topic areas. We believe the resulting program is an excellentrepresentationofthebreadthofrecentadvanc esinnetworkingresearch. This year, the conference received 101 full paper submissions from 23 co- trieson?vecontinents,re?ectingastrongdiversityinthenetworkingcommunity. Similarly, the 92 members of the TPC are from 21

countries and include a mix of academic, industry, and governmental a?liations. The TPC members, aided by some 50 external reviewers, provided a total of 470 reviews and follow-up discussions totaling more than 200 messages. The ?nal selections were made at a TPC meeting hosted by Columbia University in New York City, with both in-person and remote participation. In total, authors of accepted papers have academic and industry a?liations in 15 countries. We ?nally selected 24papers for presentationduring the conference technical sessions. A small number of papers were assigned a shepherd from the TPC to assist in paper revision. These statistics represent an acceptance rate of just under 24%, comparable to that of previous years. The TPC also identi?ed several papers that re?ect particularly promising early results; these papers were selected for presentation as work-in-progress papers and are identi?ed as such in the proceedings.

Do you want to make more money on eBay

(or any other Internet auction site)? Or, are you looking for an easy second income?

Thousands of new users are joining eBay every day. You can take advantage of this trend and make a lot of money. But before you get started, there are some things you need to know. eBay Secrets will walk you through the steps to getting your Internet auction business rolling. It is packed full of tips and secrets that will help you get more money for your auction listings. eBay Secrets is based on the techniques that Steve White has been teaching students in his exclusive seminars on making money on eBay. Never before have all of Mr. White's powerful money-making secrets been available in book format. Here are just a few of the topics that are covered in the book: The two most important secrets to making money on eBay. 14 places to find cheap things to sell. 15 techniques to increase the number of bids you get. Three things you should NEVER do in an eBay listing. Ten tricks that will make your listings much more effective. The best starting bid for your items. Why your title is critical. A three-step process to find the perfect title. Four words to include in your titles to get even more money for your items. The best time to list your items. Why you should never use a reserve. The one thing that you should never mention in the description. Which listing options are worth the extra cost. How to avoid paying to have pictures in your listings. The only eight things that you need to get started making money on eBay. Seven ways you can get started with no money. Why user feedback is misleading. How to write a description that gets more bids. Everything you need to know about writing HTML in your listings. What to charge for shipping. A printable checklist so you never forget any steps when creating listings. Four email templates for common situations. What to do if someone doesn't pay. Examples of the best and worst auctions. And much, much more ...

Provides lists of selling prices of items found on eBay in such categories as antiques, boats, books, cameras, coins, collectibles, dolls, DVDs, real estate, stamps, tickets, and video games.

Hands-On ZigBee

The book is focused on the area of remote processing of ECG in the context of telecardiology, an emerging area in the field of Biomedical Engineering Application. Considering the poor infrastructure and inadequate numbers of physicians in rural healthcare clinics in India and other developing nations, telemedicine services assume special importance. Telecardiology, a specialized area of telemedicine, is taken up in this book considering the importance of cardiac diseases, which is prevalent in the population under discussion. The main focus of this book is to discuss different aspects of ECG acquisition, its remote transmission and computerized ECG signal analysis for feature extraction. It also discusses ECG compression and application of standalone embedded systems, to develop a cost effective solution of a telecardiology system.
