JCPenney [catalog]. Elsevier Conceived in the 1960s, Walt Disney's original plans for his Experimental Prototype Community of Tomorrow (EPCOT) outlined a utopian laboratory for domestic technology, where families would live, work, and play in an integrated environment. Like many of his contemporaries, Disney imagined homes that would attend to their inhabitants' every need, and he regarded the home as a site of unending technological progress. This fixation on "space-

age" technology, with its promise of domestic bliss, marked an important mid-twentieth-century shift in understandings of the American home. In A Small World, Davin Heckman considers how domestic technologies that free people to enjoy leisure time in the home have come to be understood as necessary parts of everyday life. Heckman's narrative stretches from the early-twentieth-century introduction into the home of electric appliances and industrial time-management techniques, through the postwar advent of television and the space-age "house of tomorrow," to the contemporary automated, networked "smart home." He considers all these developments in relation to lifestyle and

consumer narratives. Building on the tension between agency and control within the walls of homes designed to anticipate and fulfill desires, Heckman engages debates about lifestyle, posthumanism, and rights under the destabilizing influences of consumer technologies, and he considers the utopian and dystopian potential of new media forms. Heckman arques that the achievement of an environment completely attuned to its inhabitants' specific wants and also find the book valuable. needs-what he calls the "Perfect Day"-institutionalizes everyday life as the ultimate consumer practice.

For too long, marketers of sustainable goods
and services have targeted "deep green"
consumers to promote their products – and
they have little to show for their efforts. In
this innovative book, Jacquelyn Ottman

shows how the green market has moved beyond such niche marketing, and how marketers will find greater success promoting the inherent superior value of their offerings. Greener products are now available within every industry and are a part of our everyday lives. But they didn't get to be so ubiquitous just because they are better for the planet. Whether they were promoted as such or not, sales of green products have grown so fast because of the added value they provide: health, superior performance, good taste, cost-effectiveness, or simply convenience. This central emphasis on primary benefits – the new rules – is critical to winning over the mainstream consumer and to driving overall organizational growth. The New Rules of

Green Marketing helps readers understand why value-based sustainability marketing has become a critical organizational capacity, and how readers can adopt this approach in their own organizations. Illustrated by examples from both international mainstream and the more niche leading researchers and reflecting on "deep green" leaders who are showing everyone else the way, the book provides practical strategies, tools and inspiration for building every aspect of a credible valuebased green marketing strategy, including: How to use a proactive approach to sustainability to spur innovationHow to frame environment-related benefits with relevance to mainstream brands How to communicate with credibility and impact – and avoid "greenwashing"How to team up

with stakeholders to maximize outreach to consumersHow to use a life cycle orientation to ensure the integrity of one's offeringsHow to best take advantage of recent technological advances in social mediaDrawing on the latest data from learnings from Ottman's corporate clients and other pioneers including GE, Nike, HSBC, Method, Starbucks, Timberland, HP, NatureWorks, Philips, Procter & Gamble, Stonyfield Farm and Wal-Mart, this book shows how market leaders are edging out the competition using effective value-first marketing strategies. This book captures the best of the author's previous groundbreaking books on green marketing and takes the content into the 21st century. Whereas

earlier works focused on readers who were less familiar with green initiatives, this work squarely focuses on a new generation of marketers who likely themselves grew up with an appreciation of sustainability and who want and need to know how to connect effectively with mainstream consumers.
