When popular radio personality West McCray receives a desperate phone call from a stranger imploring him to find nineteen-year-old runaway Sadie Hunter, he's not convinced there's a story there; girls go missing all the time. But when it's revealed that Sadie fled home after the brutal murder of her little sister, Mattie, West travels to the small town of Cold Creek, Colorado, to uncover what happened. Sadie has no idea that her journey to avenge her sister will soon become the subject of a blockbuster podcast. Armed with a switchblade, Sadie follows meager clues hoping they'll lead to the man who took Mattie's life, because she's determined to make him pay with his own. But as West traces her path to the darkest, most dangerous corners of big cities and small towns, a deeply unsettling mystery begins to unfold—one that's bigger than them both. Can he find Sadie before it's too late? Alternating between Sadie's unflinching voice as she hunts the killer and the podcast transcripts tracking the clues she's left behind, *Sadie* is a breathless thriller about the lengths we go to protect the ones we love and the high price we pay when we can't. It will haunt you long after you reach the final page.

Recently vilified as the prime dynamic driving home the breach between poor and rich nations, here the branding process is rehabilitated as a potential saviour of the economically

underprivileged. Brand New Justice, now in a revised paperback edition, systematically analyses the success stories of the Top Thirteen nations, demonstrating that their wealth is based on the 'last mile' of the commercial process: buying raw materials and manufacturing cheaply in third world countries, these countries realise their lucrative profits by adding value through finishing, packaging and marketing and then selling the branded product on to the end-user at a hugely inflated price. The use of sophisticated global media techniques alongside a range of creative marketing activities are the lynchpins of this process. Applying his observations on economic history and the development and impact of global marketing, Anholt presents a cogent plan for developing nations to benefit from globalization. So long the helpless victim of capitalist trading systems, he shows that they can cross the divide and graduate from supplier nation to producer nation. Branding native produce on a global scale, making a commercial virtue out of perceived authenticity and otherness and fully capitalising on the 'last mile' benefits are key to this graduation and fundamental to forging a new global economic balance. Anholt argues with a forceful logic, but also backs his hypothesis with enticing glimpses of this process actually beginning to take place. Examining activities in India, Thailand, Russia and Africa among others, he shows the risks, challenges and pressures inherent in 'turning the tide', but above all he demonstrates the very real possibility of enlightened capitalism working as a force for good in global terms.

RFID systems, explaining attacks on RFID systems and other security matters, such as transponder emulation and cloning, defence using cryptographic methods, and electronic article surveillance; frequency ranges and radio licensing regulations. The text explores schematic circuits of simple transponders and readers, and includes new material on active and passive transponders, ISO/IEC 18000 family, ISO/IEC 15691 and 15692. An unusually strong first book, this collection of short stories depends on exquisitely crafted surfaces that conceal shocking emotional force. Three of the stories are obliquely connected and feature young women on the edge. In the first of these, a new mother contemplates her new baby; in the second, a girl finds herself in rehab; and in the final story, the main character goes to jail. Other characters include a New Zealand serviceman returned from active duty in Dili, the employees of a \$2 shop, and a vegan couple at a Samoan resort.

Fed up with the high tolls charged by your ordinary telephone service? If you're itching to cut the copper cord with your costly, traditional phone service, you need Talk is Cheap, the new, easy-to-understand guide to understanding and using Voice over Internet Protocol (VoIP) and other Internet telephone options. Technologies such as VoIP are gaining a great deal of attention these days as more people switch from standard telephone service to phone service via the Internet. But while the cost savings are outstanding, there are some issues with Internet telephony that you should know about. Are the connections reliable? Is the quality comparable? Will it include 911 services? James Gaskin's Talk is Cheap addresses these issues and many more by explaining how to make the switch and what the tradeoffs will be if you opt for Internet telephony over traditional phone services. Talk is Cheap focuses on the increasingly popular services from Vonage, which uses VoIP, and Skype--a free service that operates as a peer-to-peer (P2P) network with the ability to turn any PC, Mac, or Pocket PC into a telephone. The book explains your options; explores the background behind, the workings of, and differences between VoIP and P2P networks; and discusses the advantages and

drawbacks of both technologies (including service offerings, quality, capabilities, completion rates, and more). Talk is Cheap then goes into detail on what you can expect in Internet service from traditional phone companies such as Verizon and AT&T. In addition, you will learn more advanced techniques, including how to turn your Palm or Pocket PC into an Internet phone and how to work with Wi-Fi phones and videophones. A straightforward, quick introduction to the ins and outs of using Internet telephone services, this book provides everything you need to make informed telephone decisions--whether you're thinking about the switch from traditional phone service or have already made it and want to get the most out of your new Internet telephone.

The Panasonic LUMIX LX100 is a compact zoom camera designed with the enthusiast and advanced photographer in mind. For those shooters looking for a very capable camera with a small profile--especially when compared to a DSLR--the LX100 hits the mark, and it does so without compromise in quality. With its Four Thirds sensor, its 24 - 75mm focal range, and its Leica f/1.7 - 2.8 lens, the LX100 has received much high praise. In fact, DP Review awarded the camera its highest ever score in its camera class and called it "one of the best photographers' cameras on the market and probably the best zoom compact ever made." In addition, the inclusion of 4k video and 4k photo mode put the LX100 in a class by itself. The Pocket Guide to the Panasonic LUMIX LX100 is a quick and to-the-point companion guide to help you make the most of this highly capable advanced camera. The basic operation of the LX100 is fairly straightforward for those photographers with an understanding of exposure and composition--adjusting the aperture and shutter speed are simple enough. But there are many next-generation features, functions, and customizable setups that even a seasoned photographer might overlook or not take full advantage of--features that, when implemented, could make all the difference in getting the shot. In this concise guide, Panasonic LUMIX Luminary Rob Knight shares his real-world experience with the LX100. Rob doesn't spend time rehashing the basics of the exposure triangle; instead, he dives into a curated collection of the LX100's best features and capabilities that he uses regularly. Some of the topics covered include:

- The best focus modes and settings based on the shooting situation
- Customizable Function (Fn) button and Control Dial options
- In-Camera RAW processing
- Shooting in Silent mode
- Multiple exposures and panoramas
- 4k photo mode
- WiFi settings and features
- And much more!

Rob also discusses the coolest and best features of the LX100 that truly make a difference in how you use the camera, such as back-button focus, the pros and cons of electronic vs. mechanical shutter, how to customize the camera so it feels like you have a kit bag of prime lenses rather than a continuous zoom, and using external flash. Finally, Rob includes his favorite camera settings, setups, and suggestions for specific shooting situations, such as street photography, travel photography, macro photography, and timelapse

photography.
