Mechanisms of Heart Failure is based on papers selected from poster presentations made at the International Conference on Heart Failure, Winnipeg, May 20-23, 1994. Although the entire book is one continuous discussion of subcellular mechanisms of heart failure and its treatment, the presentation has been divided into three sections: the opening section on the subcellular basis of heart failure includes discussions of cytokines, signal transduction, metabolism, extracellular matrix, organ level changes and newer approaches to understanding the pathogenesis of heart failure. The second section focuses on the pathophysiological aspects of cardiomyopathies and their treatment. In the final section, medical, surgical and pharmacological approaches to the treatment of heart failure are discussed in clinical and animal laboratory settings.

Breaking all preconceived perceptions, Solorio implements production-proven rigging scenarios that allow these cameras to be used in both conventional and non-conventional ways while obtaining extremely high quality these cameras are known for. Various Cinema Camera and Production Camera 4K rigging setups are shown in great detail (including parts and cost breakdown) that include: Compact Rig, Studio Rig, B-Roll Rig, Interview Rig, Cine Rig, ENG Rig, Compact Shoulder Rig, Aviator Rig, Skimmer Rig, and many more. Not just limited to the Cinema Camera and Production Camera 4K, Solorio also shows production-driven examples for the Pocket Cinema Camera and URSA. But going beyond rigging and parts, Solorio goes even deeper into the practical theory and balance of rigging itself, lenses (covering 43 pages alone), audio applications with various wired and wireless microphone
