Clown is the thinking

man's idiot. Fred has an eye for the ladies, as well as several other organs, but the only part of themselves they're willing to share with him is a carefully placed kneecap. Fred the Clown's misadventures are a curious balance of bleakness and joyful absurdism; the universe may dump on Fred from a great height, but he never gives up. More often than not, they involve the pursuit of a lady—any lady will do, it seems, but bearded ladies are at the

top of the list. Disappointment seems inevitable, and it usually is; yet, almost despite himself, Langridge will occasionally give Fred a happy ending out of nowhere... p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 13.9px Arial; color: #424242}

The Panasonic Lumix DMC-GH2: The Unofficial

Quintessential Guide provides a wealth of information and professional insights for owners of this powerful HD camera. With its electronic viewfinder and interchangeable lenses, the GH2 is capable of not only recording professional-quality still images, but has the added ability to record HD video as well. The mirrorless design enhances the camera's versatility

beyond that of most digital single lens reflex (DSLR) cameras. With the appropriate adapters, it can use virtually any manufacturer's manual focus, legacy lens. It is smaller than a typical DSLR in both size and weight, and retains automatic focusing while recording videos capability that is missing in many DSLR cameras. With the GH2, Panasonic has significantly expanded the video capabilities beyond those of previous models. Among the improvements is the ability to adjust the frame rate and shutter speed when filming video, giving users greater control over the movie-making process. In this guide, authors Brian Matsumoto and Carol F. Roullard explore and explain the features and capabilities of the GH2 camera in detail, as they cover everything from the basic features of the camera to numerous advanced photographic applications. The informative text is illustrated with example images throughout. Readers will learn how to: Control the most basic camera functions-focus and exposure Navigate the camera's menu system Achieve a range of artistic effects

using various camera settings Use the camera's automated controls, and override those controls to obtain better exposure Use the GH2 in its video mode to obtain HD videos Post-process images and videos on a computer Expand the camera's use by mounting it on a telescope or microscope And much more...

With amazing low-light capabilities, incredible definition, intelligent autofocus and a host of other features, digital cameras have now become so powerful that they have left their users behind. Most photographers can take competent shots in a range of conditions, or fix

imperfect exposures in Photoshop or Lightroom, but very few have the skill to push their cameras to the limit and capture the perfect shot, under all conditions, with no post-processing required. In Camera is the perfect way to take your photography to that level; to master your camera, understand light, exposure and composition, and make amazing photographs, whatever your camera, without cheating after the event. One hundred of

Gordon's beautiful photos are given with his own expert commentary; full settings and camera details are included, and a host of tips and tricks let photographers of any level learn something from every example. The shots are taken with a wide range of cameras, and the emphasis is on getting results by improving your own skills, not wasting money on expensive equipment.

A new survey of the best works by the elusive and spectacular Spanish Impressionist Joaquín Sorolla. Often compared to his contemporary, the American artist John Singer Sargent, Joaquín Sorolla (1863–1923) was a master draftsman and painter of landscapes, formal portraits, and monumental, historically themed canvases. Highly influenced by French Impressionism, the Valencian artist was a

master plein-air painter known for his luminous seaside scenes of frolicking youths and for vivid depictions of Spanish rural life and its pleasures and customs. This beautifully designed and produced volume brings together one hundred of Sorolla's major paintings, selected by his great-granddaughter Blanca Pons-Sorolla, the foremost authority on the artist. Benefiting from close proximity to the artist and his personal archives, she

presents an in-depth essay that explores Sorolla's life, work, and remarkable international legacy. With virtually all of the artist's previous publications now out of print, this much-anticipated volume is an important addition to the literature on this great Spanish master.

Telephoto Work Mantle Electrical codes, standards, recommended practices and regulations can be complex subjects, yet are essential in both electrical design and life safety issues. This book demystifies their usage. It is a handbook of codes, standards, recommended practices and regulations in the United States involving electrical safety and design. Many engineers and electrical safety professionals may not be aware of all of those documents and their

applicability. This book identifies those documents by category, allowing the ready and easy access to the relevant requirements. Because these documents may be updated on a regular basis, this book was written so that its information is not reliant on the latest edition or release of those codes, standards, recommended practices or regulations. No single document on the market today attempts to not only list the majority of relevant electrical design and safety codes, standards, recommended practices and

regulations, but also explain their use and updating cycles. This book, one-stop-information-center for electrical engineers, electrical safety professionals, and designers, does. Many of the sitters in this collection were John Singer Sargent's close friends. They are posed informally, sometimes in the act of painting or singing, and it is evident

from the bold way they confront us that they are personalities of a creative stamp. Brilliant as these pictures are as works of art and penetrating studies of character, they are also records of relationships, allegiances, influences and aspirations. This volume, and the exhibition it accompanies, aims to explore these friendships in depth and draw out their significance in the story of Sargent's life and the development of his art. The book is structured

chronologically, with sections arranged according to the places Sargent worked and formed relationships during his cosmopolitan career: Paris, London, New York, Italy and the Alps. The cast of characters includes famous names, among them Gabriel Fauré and Auguste Rodin, Robert Louis Stevenson and Henry James. But the authors also make their point with images of Sargent's familiars, such

as the artists Jane and Wilfrid de Glehn who accompanied him on his sketching expeditions to the Continent, and the Italian painter Ambrogio Raffele, a recurrent model in his Alpine studies. In such paintings Sargent explored the making of art (his own included) and the relationship of the artist to the natural world. These are examples of an absorbing range of images and personalities, all distinguished in one way or another for their artistry,

and all linked by friendship and a shared aesthetic to the central figure of Sargent himself. *The Standard BASIC Dictionary for Programming CreateSpace* The Panasonic Lumix DMC-GH2: The Unofficial Quintessential Guide provides a wealth of information and professional insights for owners of this powerful HD camera. If you had the chance to escape from your life and,

better still, fight for a cause you believe in, would you take it? At seventeen, disenfranchised with her life in London, with a mother too sick to care for her and a father too broken to, Sofia Mounir packs her bags and heads to the only place that makes sense: Raqqa. A place where she can be part of something greater than herself. Where she can help build a new society from the ground up. But what happens when that world isn't everything you dreamed of? When you realize that other people's

intentions might not be as pure as your own? And what happens when you're not allowed to leave alive?
