This focused workshop provides over 3 hours of high-quality video training on editing your own personal videos in Adobe® Premiere

Elements® 10. Video expert and trainer Maxim Jago starts by introducing you to the Premiere Elements workspace and explaining how to bring video files into the program. Next, you'll learn how to assemble your video clips into great-looking movies complete with titles, transitions, and special effects. Maxim will also show you some of the new features in Premiere Elements 10, like the Cartoon Effect filter and techniques for sweetening audio. Finally, you'll learn how to share your movies with friends and family on DVDs or the Web. The lessons are wrapped in a feature-rich interface that lets you jump to any topic and bookmark individual sections for later review. Full-Screen mode provides a hi-def, immersive experience, and Watch-and-Work mode shrinks the video into a small window so you can play the videos alongside your application. As with all titles in the Learn by Video series, the project files used in the lessons are included with the course, and interactive review questions help reinforce what you've learned.

This is an updated and newly revised edition of the classic book *The Art of Photography: An Approach to Personal Expression*. Originally published in 1994 and first revised in 2010, *The Art of Photography* has sold well over 100,000 copies and has firmly established itself as the most readable, understandable, and complete textbook on photography. Featuring nearly 200 beautiful photographs in both black-and-white and color, as well as numerous charts, graphs, and tables, this book presents the world of photography to beginner, intermediate, and advanced photographers who seek to make a personal statement through the medium of photography. Without talking down to anyone or talking over anyone's head, renowned photographer, teacher, and author Bruce Barnbaum presents how-to techniques for both traditional and digital approaches. In this newest edition of the book, Barnbaum has included many new images and has completely revised the text, with particular focus on two crucial chapters covering digital photography: he revised a chapter covering the digital zone system, and includes a brand-new chapter on image adjustments using digital tools. There is also a new chapter discussing the concepts of "art versus technique" and "traditional versus digital" approaches to photography. Throughout the book, Barnbaum goes well beyond the technical, as he delves deeply into the philosophical, expressive, and creative aspects of photography so often avoided in other books. Barnbaum is recognized as one of the world's finest landscape and architectural photographers, and for decades has been considered one of the best instructors in the field of photography. This latest incarnation of his textbook—which has evolved, grown, and been refined over the past 45 years—will prove to be an ongoing, invaluable photographic reference for years to come. It is truly the resource of choice for the thinking photographer. Topics include: • Elements of Composition • Visualization • Light and Color • Filters • Black-and-White • The Digital Zone System • The Zone System for Film • Printing and Presentation • Exploding Photographic Myths • Artistic Integrity • Realism, Abstraction, and Art • Creativity and Intuition • A Personal Philosophy • And much, much more...

Book and accompanying video with over six hours of video

training—all geared to teach you everything about shooting video with your DSLR With the arrival of high-definition video-enabled DSLR cameras, photographers are faced with an opportunity for creativity and a competitive edge in their field unlike anything they've experienced before. Add to that the expanding demands from a video-hungry audience and it's no longer a matter of if you are going to add video to your repertoire of skills, it's when. Here to guide you in a thorough exploration of the video-making process — from preproduction to post — and to ease your transition from still to motion are four veterans who speak the language of both photography and video fluently. With their clear, instructive approach, they quickly get you up to speed on everything from picking your gear, to properly lighting for motion, to using professional-level audio, color correction, and editing techniques, to media management and outputting, and much more. Here are just a few highlights from this richly illustrated, completely interactive book and video: Explores the entire spectrum of video for DSLR camera owners, with recommendations on gear, planning, lighting, lenses, audio, editing, color correcting, exporting, media management, and more. Covers a wide variety of shooting styles, including indoor, outdoor, studio, portrait, event, and available light. Addresses technical challenges associated with DSLR video, such as camera movement, multiple camera coverage, low-light videography, and synchronized sound. Explores additional creative techniques such as stop motion and timelapse photography in depth. Includes a real-world example of a music video and promo package throughout the book to demonstrate concepts in action, with additional profiles of photography experts in nature, sports, commercial, and weddings and events. The accompanying video contains over 6 hours of video training that delves deeper into each topic, as well as high-definition footage, hands-on project files, and templates to experiment with and follow along. With amazing low-light capabilities, incredible definition, intelligent autofocus and a host of other features, digital cameras have now become so powerful that they have left their users behind. Most photographers can take competent shots in a range of conditions, or fix imperfect exposures in Photoshop or Lightroom, but very few have the skill to push their cameras to the limit and capture the perfect shot, under all conditions, with no post-processing required. In Camera is the perfect way to take your photography to that level; to master your camera, understand light, exposure and composition, and make amazing photographs, whatever your camera, without cheating after the event. One hundred of Gordon's beautiful photos are given with his own expert commentary; full settings and camera details are included, and a host of tips and tricks let photographers of any level learn something from every example. The shots are taken with a wide range of cameras, and the emphasis is on getting results by improving your own skills, not wasting money on expensive equipment.

The formative years of the 1950s are explored in this fourth installment of Evro's decade-by-decade series covering all Formula 1 cars and teams. When the World Championship was first held in 1950, red Italian cars predominated, from Alfa Romeo, Ferrari and Maserati, and continued to do so for much of the period. But by the time the decade closed, green British cars were in their ascendancy, first Vanwall and then rear-engined Cooper playing the starring roles, and BRM and Lotus having walk-on parts. As for drivers, one stood out above the others, Argentine Juan Manuel Fangio, becoming World Champion five times. Much of the fascination of this era also lies in its numerous privateers and also-rans, all of which receive their due coverage in this complete work. Year-by-year treatment covers each season in fascinating depth, running through the teams -- and their various cars -- in order of importance. Alfa Romeo's supercharged 1 1/2-litre cars dominated the first two years, with titles won by Giuseppe Farina (1950) and Fangio (1951). The new marque of Ferrari steamrolled the opposition in two seasons run to Formula 2 rules (1952-53), Alberto Ascari becoming champion both times, and the same manufacturer took two more crowns with Fangio (1956) and Mike Hawthorn (1958). Maserati's fabulous 250F, the decade's most significant racing car, propelled Fangio to two more of his five championships (1954 and 1957). German manufacturer Mercedes-Benz stepped briefly into Formula 1 (1954-55) and won almost everything with Fangio and up-and-coming Stirling Moss. Green finally beat red when the Vanwalls, driven by Moss and Tony Brooks, won the inaugural constructors' title (1958). Then along came Cooper, rear-engine pioneers, to signpost Formula 1's future when Jack Brabham became World Champion (1959).
