Anyone can make a short film, right? Just grab some

friends and your handheld and you can do it in a weekend or two before being accepted to a slew of film festivals, right? Wrong. Roberta Munroe screened short film submissions at Sundance for five years, and is an award-winning short filmmaker in her own right. So she knows a thing or two about how not to make a short film. From the first draft of your script to casting, production, editing, and distribution, this is your one-stop primer for breaking into the business. Featuring interviews with many of today's most talented writers, producers, and directors, as well as revealing stories (e.g., what to do when the skinhead crack addict next door begins screaming obscenities as soon as you call "action") from the sets of her own short films, Roberta walks you through the minefield of mistakes that an aspiring filmmaker can make--so that you don't have to make them yourself.

With amazing low-light capabilities, incredible definition, intelligent autofocus and a host of other features, digital cameras have now become so powerful that they have left their users behind. Most photographers can take competent shots in a range of conditions, or fix imperfect exposures in Photoshop or Lightroom, but very few have the skill to push their cameras to the limit and capture the perfect shot, under all conditions, with no post-processing required. In Camera is the perfect way to take your photography to that level; to master your camera, understand

light, exposure and composition, and make amazing photographs, whatever your camera, without cheating after the event. One hundred of Gordon's beautiful photos are given with his own expert commentary; full settings and camera details are included, and a host of tips and tricks let photographers of any level learn something from every example. The shots are taken with a wide range of cameras, and the emphasis is on getting results by improving your own skills, not wasting money on expensive equipment.

In Camera: How to Get Perfect Pictures Straight Out of the Camera Academic Press

Many of the sitters in this collection were John Singer Sargent's close friends. They are posed informally, sometimes in the act of painting or singing, and it is evident from the bold way they confront us that they are personalities of a creative stamp. Brilliant as these pictures are as works of art and penetrating studies of character, they are also records of relationships, allegiances, influences and aspirations. This volume, and the exhibition it accompanies, aims to explore these friendships in depth and draw out their significance in the story of Sargent's life and the development of his art. The book is

structured chronologically, with sections arranged according to the places Sargent worked and formed relationships during his cosmopolitan career: Paris, London, New York, Italy and the Alps. The cast of characters includes famous names, among them Gabriel Fauré and Auguste Rodin, Robert Louis Stevenson and Henry James. But the authors also make their point with images of Sargent's familiars, such as the artists Jane and Wilfrid de Glehn who accompanied him on his sketching expeditions to the Continent, and the Italian painter Ambrogio Raffele, a recurrent model in his Alpine studies. In such paintings Sargent explored the making of art (his own included) and the relationship of the artist to the natural world. These are examples of an absorbing range of images and personalities, all distinguished in one way or another for their artistry, and all linked by friendship and a shared aesthetic to the central figure of Sargent himself.

The signature creation of cartoonist Roger Langridge, *Fred the Clown* is the thinking man's idiot. Fred has an eye for the ladies, as well as several other organs, but the only part of themselves they're willing to share with him is a

carefully placed kneecap. Fred the Clown's misadventures are a curious balance of bleakness and joyful absurdism; the universe may dump on Fred from a great height, but he never gives up. More often than not, they involve the pursuit of a lady—any lady will do, it seems, but bearded ladies are at the top of the list. Disappointment seems inevitable, and it usually is; yet, almost despite himself, Langridge will occasionally give Fred a happy ending out of nowhere... p.pl {margin: 0.0px 0.0px 0.0px; font: 13.9px Arial; color: #424242}

Guide to Filmmaking Prentice Hall
Voice & Vision is a comprehensive manual for the independent filmmakers and film students who want a solid grounding in the tools, techniques, and processes of narrative film in order to achieve their artistic vision. This book includes essential and detailed information on relevant film and digital video tools, a thorough overview of the filmmaking stages, and the aesthetic considerations for telling a visual story. The ultimate goal of this book is to help you develop your creative voice while acquiring the solid practical skills and confidence to use it. Unlike many books that privilege raw technical information or the line-producing aspects of production, Voice & Vision places creativity, visual expression, and cinematic ideas front and center. After all, every practical decision a filmmaker makes, like choosing a location, an actor, a film stock, a focal length, a lighting set-up, an edit point, or a sound effect is also an expressive one and should serve the filmmaker's vision. Every decision, from the largest conceptual choices to the smallest practical solutions, has a profound impact on what appears on the screen and how it moves an audience. "In Practice sidebars throughout Voice & Vision

connect conceptual, aesthetic and technical issues to their application in the real world. Some provide a brief analysis of a scene or technique from easily rentable films which illustrate how a specific technology or process is used to support a conceptual, narrative, or aesthetic choice. Others recount common production challenges encountered on real student and professional shoots which will inspire you to be innovative and resourceful when you are solving your own filmmaking challenges.
