was a French physician and
author. He was born in
Montebourg in the Cotentin*

Peninsula of Normandy in north-west France, studied medicine at the University of Caen and began practising as a physician in 1744. His novels, written for the most part anonymously, take place in the wake of two of the 18th century's great philosophical movements of Rationalism and Illuminism, and often combine scientific considerations with cabalistic, magical and alchemical ones. He is noted for anticipating many social and scientific inventions including photography, synthetic food and television. This work was first published in 1760 and the title in the original French, Giphantie, is an anagram of the author's given name. Reprinted from the English translation of
