Excerpt: The Panasonic Lumix DMC-GH1 is a digital mirrorless interchangeable lens camera adhering to the

Olympus and Panasonic developed Micro Four Thirds System (MFT) system design standard. Panasonic classified the GH1 as a hybrid stills/video camera and the GH1 was introduced and marketed as a higher end camera than Panasonic's first MFT camera, the stills only, non-video capable Lumix DMC-G1. The Panasonic Lumix DMC-GH1 was the second MFT camera introduced under the MFT design standard and the first MFT camera to include HD video recording capability. The GH1 was announced at the April 2009 Photo Marketing Association Annual Convention and Trade Show. As part of the marketing of this camera, Panasonic sponsored some professional filmmakers by allowing them to borrow the GH1 camera for their projects. One such GH1 model camera was used to film the pilot of the Swedish horror film Marianne. When announced in March 2009, the Panasonic Lumix DMC GH1 was marketed as a new class of "Creative HD Hybrid" camera, and as Panasonic's...

The Workshop on the Economics of Information Security (WEIS) is the leading forum for interdisciplinary scholarship on information security, combining expertise from the fields of economics, social science, business, law, policy and computer science. Prior workshops have explored the role of incentives between attackers and defenders, identified market failures dogging Internet security, and assessed investments in cyber-defense. Current contributions build on past efforts using empirical and analytic tools to not only understand threats, but also strengthen security through novel evaluations of available solutions. Economics of Information Security and Privacy III addresses the following questions: how should information risk be modeled given the constraints of rare incidence and

high interdependence; how do individuals' and organizations' perceptions of privacy and security color their decision making; how can we move towards a more secure information infrastructure and code base while accounting for the incentives of stakeholders?

Excerpt: The Micro Four Thirds system (MFT) is a standard created by Olympus and Panasonic, and announced on August 5, 2008, for mirrorless interchangeable lens digital cameras and camcorders design and development. However, unlike the preceding Four Thirds System, it is not an open standard. MFT shares the original image sensor size and specification with the Four Thirds system, designed for DSLRs. Unlike Four Thirds, the MFT system design specification does not provide space for a mirror box and a pentaprism, allowing smaller bodies to be designed, and a shorter flange focal distance and hence smaller lenses to be designed.

Virtually any lens can be used on MFT camera bodies, as long as an

adapter exists. For instance, Four Third lenses can be used with auto focus using the adapters designed by Olympus and Panasonic.

Drawing showing the relative sizes of sensors used in most current digital cameras, relative to a 35mm film frame. The image sensor of Four Thirds and MFT is commonly referred to as a 4/3" type or 4/3 type sensor (inch-based sizing system is derived from now obsolete video camera tubes). The sensor measures 18 mm x 13.5 mm (22.5 mm diagonal), with an imaging area of 17.3 mm x 13.0 mm (21.6 mm diagonal), comparable to the frame size of 110 film. Its area, ca. 220 mm², is approximately 40% less than the APS-C sensors used in other manufacturers' DSLRs, yet is around 9 times larger than the 1/2.5" sensors...

A specialist title aimed at bird watchers, this handy book contains all the expertise you need to make your bird-watching trip into a rewarding photo session: there is copious advice on equipment, technique and field craft, and a wealth of wonderful photos to inspire you. Finally, a section on the digital darkroom will help you turn your shots into perfect prints.

Electronics Buying Guide neobooks

Madrid es una gran ciudad, repleta de atractivos e interesantes lugares, unos bien conocidos y otros ocultos. Recorrerla es un placer, tanto para el visitante ocasional, que se verá sorprendido por las novedades que podrá encontrar deambulando tanto por sus barrios antiguos como por los más modernos, así como para sus propios habitantes, si saben disfrutar de ella. En este libro vamos a visitar, desde distintas perspectivas, de la mano de las fotografías de Javier Sánchez y las explicaciones de Alfonso del Barrio, la Puerta del Sol, donde está el llamado kilómetro cero de las carreteras de

España; el castizo barrio del Rastro, donde se encuentra un tradicional y típico mercadillo dominical; el gran Parque de Retiro, con multitud de parajes, tanto distintivos, como discretos; así como otros muchos lugares, conocidos y desconocidos. También haremos un repaso con las imágenes más bellas desde los cielos de Madrid, para lo que no es necesario volar, y os mostraremos algunos humildes bares, que sin embargo ocultan historias que los han convertido en míticos. De hecho, en Madrid, los lugares que no han hecho historia, tienen sus propias historias que son dignas de ser conocidas. Tendrás la ocasión de contemplar hechos anacrónicos como las ovejas que recorren la calle de Alcalá una vez al año, así como conocer interesantes anecdotas. Para facilitar su localización, hemos incluido un código QR con cada imagen, de forma que no tendrás más que apuntar el móvil hacia él y pedirle que os indique cómo llegar. Pero esta obra no es una guía turística o monumental, sino una guía fotográfica en la que te explicamos cómo fotografiar Madrid de la mejor manera, en la que incluimos los conocimientos técnicos básicos necesarios para que puedas conseguir al menos 50 imágenes espectaculares, como las fotos comentadas con rigor, sencillez y precisión en este extraordinario y novedoso libro.

Dalam dunia fotografi, kamera merupakan suatu piranti untuk membentuk dan merekam suatu bayangan potret pada lembaran film. Pada kamera televisi, sistem lensa membentuk gambar pada

sebuah lempeng yang peka cahaya. Lempeng ini akan memancarkan elektron ke lempeng sasaran bila terkena cahaya. Selanjutnya, pancaran elektron itu diperlakukan secara elektronik. Untuk memperdalam keilmuan fotografi maka anda harus memahami jenis-jenis kamera dari merk hingga tetek bengek lainnya. Yang selalu menjadi perbincangan hangat dibanyak forum adalah kamera DSLR merek Canon dengan Nikon. Memang kedua merek tersebut sedang bersaing ketat khususnya di Indonesia, walaupun ada merk lain yang juga patut menjadi perbincangan. Buku yang berisikan tentang Kamera DSLR ini menyajikan hal-hal yang berhubungan seputar kamera DSLR. Pertama-tama pembaca akan diperkenalkan tentang kamera SLR sebagai variasi dasar dari kamera DSLR, dilanjutkan dengan pengenalan kamera DSLR, dasar-dasar kamera DSLR, serta hal-hal lain seputar kamera DSLR termasuk perbandingan kamera-kamera DSLR merk-merk terkenal di dunia. Selain itu, buku yang diterbitkan oleh JAL PUBLISHING ini juga dilengkapi dengan informasi beberapa kamera DSLR yang terbaik pada masa ini serta tips-tips merawat kamera. -Lembar Langit Indonesia Group-

Unternehmen sind heute mit kaum mehr berechenbarem multioptionalen Konsumentenverhalten konfrontiert. Es stellt sich daher nicht mehr die Frage, ob "Mono-" oder "Multichannel-Marketing", sondern vielmehr, ob es durch die gewählte Strategie gelingt, die Möglichkeiten des Multichannel-Management optimal auszunutzen. Daher gehört die Gestaltung einer Multichannel-Kommunikation zu den schwierigsten Aufgaben des strategischen Managements. Dies beinhaltet die Konfiguration, Gestaltung und Steuerung von Kommunikationskanalen (klassische Kanäle, Web

2.0-Welt), Medien (TV, Internet, M-Commerce etc.) und Marken (kooperative Markenführung, E-Branding). Die Schwierigkeit besteht vor allem in der ganzheitlichen Abstimmung von Online- und Offline-Kanalen sowie in der zielgruppengenauen Ausrichtung der unternehmerischen Kommunikationsstrategie. Christin Emrich bietet in ihrem Buch wissenschaftlich fundierte Konzepte für Leser, die mehr als Grundlagenwissen suchen.

In this long-awaited fifth edition of the best-selling book, Martin Edge continues to provide the definitive guide to underwater photography. The book covers everything from the basic principles, the equipment and approaches to composition and lighting through to creating an individual style. The book features over 400 updated colour images - taken on numerous dives around the world - with an accompanying narrative that provides detailed information on how the shots were taken, their strengths and weaknesses and how to fix mistakes. Practical examples take you step-by-step through the basic techniques: photographing shipwrecks, divers, marine life, macro images and taking photographs at night. New chapters cover the latest equipment, processes and techniques including SLR Cameras, water contact lenses, mirrorless interchangeable lens cameras, micro four third systems, super macro techniques, motion blur, LED lighting and more. Packed with inspiring examples from global diving destinations and speciality chapters written by professionals in the field, this book is an indispensable masterclass for both the novice and seasoned underwater photographer.
