Through My Eyes Houghton Mifflin

Recurrent crises in emerging markets and in advanced economies in the last decades cast doubt about the ability of financial liberalization to meet the aims of sustainable economic growth and development. The increasing importance of financial markets and financial efficiency criterion over economic decisions and policies since the 1980s laid down the conditions of the development process of emerging market economies. Numerous crises experienced thereafter gave rise to flourishing work on the links between financialization and economic

development. Several decades of observations and lessons can now be integrated into economic and econometric models to give more sophisticated and multivariable approaches to financial development with respect to growth and development issues. In the markets-based and private-enterprise dominated world economy, two conditions for a successful growth-enhancing financial evolution can at least be brought fore: macroeconomic stability and consistent supervision. But even after the 2007-2008 global crisis, economists do not agree on the meaning of those conditions. For

liberal and equilibrium-market economists, good finance and supervision mean market-friendly structures while for institutionalists, post-Keynesian and Marxist economists, good finance and supervision must lie in collectively designed and managed public structures. Drawing heavily on the tumultuous crises of the 1990s-2000s, this book argues that those experiences can shed light on such a crucial issue and lead economic theory and policy to go beyond the blindness of efficient free markets doctrine to economic catastrophes. It also points to new challenges to global stability in the

wake of reconfiguration of international financial arena under the weight of major emerging market economies.

Stolen Treasure is a book almost 70 years in the writing! Written over the decades since 1946, this collection of observations, quotes, proverbs, witticisms and rules for living have guided the author since his youth growing up in India, through his time in the Indian Navy, and for the bulk of his life since moving to Ireland in 1960. Now in his mid-80s, the author presents a lifetime of humour and words of wisdom for a happy life in this book. A true treasure collection of one-line gems and snip-bits of life's

experiences, the book presents an insight into the observations of life over the author's lifetime that so many of us experience but never document. At first, observations from an idealistic young man are presented. This is followed by wisdom learned in early adulthood and gathered as an Officer with the Indian Navy. The observations continue from a happy lifetime in Ireland with a large focus on what the author learned about life as a husband and father, as well as engineer and lecturer, to retiree. These have been collected over the years as the author has experienced them in life or overheard them in social occasions, and carefully recorded by hand. In the decades before the internet and social media, these were the original status updates that tell a story of how life and perception of what matters has changed over almost 70 years. An

intriguing read for every person of all ages and all interests.
