Connecting With Consumers Springer Science & Business Media

During the past decade, the media landscape and the coverage of sports events have changed fundamentally. Sports fans can consume the sports content of their choice, on the platform they prefer and at the time they want. Furthermore, thanks to electronic devices and Internet, content can now be created and distributed by every sports fan. As a result, it is argued that media regulation which traditionally contains rules safeguarding access to information and diversity would become redundant. Moreover, it is sometimes proposed to leave the regulation of the broadcasting market solely to competition law. This book, illustrates that media law is still needed, even in an era of abundance, to guarantee public's access to live and full sports coverage. Dealing with the impact of new media on both media and competition law this book will greatly appeal to academics and stakeholders from various disciplines, such as legal and public policy, political science, media and communications studies, journalism and European studies. Additionally it contains valuable information and points of view for policy makers, lawyers and international and intergovernmental organisations, active in media development. The book contains an up-to-date analysis and overview of the different competition authorities' decisions and media provisions dealing with the sale, acquisition and exploitation of sports broadcasting rights. Katrien Lefever is Senior Legal Researcher at IBBT - The Interdisciplinary Centre for Law and ICT (ICRI), KU Leuven, Belgium. The book appears in the ASSER International Sports Law Series, under the editorship of Prof. Dr. Robert Siekmann, Dr. Janwillem Soek and Marco van der Harst LL.M.

Handbook of Energy-Aware and Green Computing, Volume 2 CRC Press

We can't all camp out in old-growth forests, lying down in front of the bulldozers. And it's not only that we're too busy: Some of us just don't want our fabulous threads to get caked with mud. But that doesn't mean we don't care passionately about the environment. Luckily, the days when becoming environmentally aware entailed eating bread that tasted like dirt, wearing clothes that looked like frayed burlap sacks, and spending summer vacations assailing whaling ships with Greenpeace are passing away. It is now perfectly possible (and increasingly easy) to be well fed, well coiffed, well dressed, and well traveled while remaining deeply committed to an ecologically sustainable lifestyle. In *The Lazy Environmentalist*, Josh Dorfman, host of the Sirius Satellite Radio program of the same name, provides comprehensive guidance to fashion-forward consumers who are as concerned about the long-term health of our planet as they are about the design of their bathroom fixtures. Covering topics that range from clothing to electronic gadgetry, home decor to recreation, and gardening to financial investment,

Dorfman lets us know which trends to watch and which eco-conscious products to buy. Green, it turns out, can be an extremely stylish color.

The consumer electronics industry is entering an era of extraordinary growth. The industry's best companies will ride that wave to unprecedented success. But, today, many CE companies are struggling with business models that are simply untenable. They must change to survive: they must change even more dramatically to win. In this book, two world-renowned consultants preview the industry's future—from online gaming to telehealthcare, and beyond. Next, they present a powerful new blueprint, offering indispensable guidance on everything from technology platforms to user interface design, branding to channel strategies. You'll discover how to uncover new sources of value, design better models for doing business, and fuel growth by reaching new geographical markets. Whatever your role in the industry, this book will help you: · Make better decisions, find your differentiators, and focus on your key success drivers · Tap into the emergent "meta-value" that arises when technologies, devices, services, and content come together · Reach tomorrow's smart, service-sensitive shopper: not just the "technology-hungry" customers · Widen margins by adding value consumers will pay for · Transform cost structures to support rapid growth and nonstop change · Sell into China, India, and other fast-growing emerging markets · Preview "telehealthcare": the surprising application for the living room · Gain new insights into online gaming, smart home technology, and more · Discover the immense power of IBM's Cell Broadband Engine processor—and the business opportunities it enables · Leverage embedded Linux to build more affordable, profitable, consumer-centric products · Develop higher-value software for connected consumer electronics · Differentiate products through state-of-the-art design and user interfaces · Discover what the industry's "winners" will look like in five years—and how to be one of them The consumer electronics industry continues to grow at breakneck speed: from MP3 players to home healthcare devices, consumers are adopting new technologies faster than ever before. But most consumer electronics companies are struggling with razor-thin margins, or even losses. Their traditional business models simply aren't working anymore. In *Irresistible! Markets, Models, and Meta-Value in Consumer Electronics*, IBM's leading consumer electronic industry consultants reveal powerful new opportunities to profit—and offer realistic advice for leveraging them. Drawing on their experience working with innovators from Helsinki to Osaka, the authors and contributors introduce revolutionary On Demand Business models for improving profitability, and identify tomorrow's most profitable CE opportunities. They cover every element of success: technology, design, service, branding, channel strategies, and much more. Whether you're an executive or engineer, strategist or entrepreneur, this book will help you find your differentiators, focus on your key success drivers—and become one of this industry's big long-term winners!
