So begins the narrator's tale, within which we encounter strange characters such as Chris The Crossword Compiler and Mark Twain (or at least, his namesake) and hear of an enigmatic organisation of moral vigilantes called The Amino. But who is the kidnapper? What are his/her motives? And why would he/she wish to pass a death sentence on the narrator?

Fresh meat! From a hospital of horrors to a runaway zombie train, it's an all-new onslaught of the slaving undead in the sequel to Kirsty McKay's killer debut! Just when you think you're out...it's the morning after the night of the return of the living dead. Or something like that. After running/bus-driving/snowboarding for her life alongside rebel Smitty, geeky Pete, and popular Alice, Bobby thought she'd found the antidote to the Carrot Man Veggie Juice that had turned the rest of their classmates into zombies. When Smitty (mmm...nom, nom) got chomped, Bobby pumped a syringe full of it into him herself. But now Bobby's a prisoner in some hospital of horrors, with no clue how she got there. And Smitty is missing. What if he isn't cured after all? Bobby knows she's got to find him, even if it means facing Scotland's hungry hordes -- plus Alice's buckets of snark -- again. And this time, zombies aren't the only evil stressing her out. The brain-dead are bad enough, but how can Bobby stop the big pharma business behind the epidemic? Especially when her own mom works for the company?

Master's Thesis from the year 2018 in the subject Economics - Foreign Trade Theory, Trade Policy, grade: Excellent, course: Development Economics, language: English, abstract: This study is conducted to investigate Ethiopian exports efficiency by using a stochastic frontier analysis model with panel data to estimate if countries operated at the frontier with its major trading partners. Export efficiency is defined as the ratio of actual exports to the maximum possible volume. In addition, the study investigates the factors of export efficiency, focusing on Ethiopia's exports to its major trading partners during the period 2006 to 2017. The arable land, gross domestic product and population of Ethiopia and of the trade partner's countries, distance between Ethiopia and trade partners' countries, gross capital formation, and geographical location of trade partner's countries determines the export flows of Ethiopian export. As a result the estimated coefficient of determinants shows that population and gross domestic product have significantly and positively affect the Ethiopian export sector. The empirical results show that the volume of Ethiopian actual exports is far below the estimated efficient level, and that there is considerable room for increasing Ethiopia's exports. The trend of agricultural export efficiency shows some improvement over the stated years while manufacturing sector shows decreases. Those findings imply that Ethiopia should search the redemption policy that enables the country to maximize the efficiency of the sector by using all possible potential.

This book explores the significance of silence within and beyond pedagogical contexts. Silence is a complex and multidimensional phenomenon for everyday life: since schools mirror society, it is also significant in education. While silence can be experienced in a multitude of different ways, the author reflects on whether silence itself can bear a message: is there an aspect of dialogue in silence, or is it a language all of its own? This book examines a variety of silences essential for education, examining such topics as silence and aspects of power, silent students, and the relationship between listening and silence. Drawing on a range of empirical data, the author elucidates the significance of silence in pedagogical contexts.
